Subcommittee on Environment, Technology, and Standards, 2006 Undersea Vehicles and National Needs National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Committee on Undersea Vehicles and National Needs, 1996-12-19 The United States faces decisions requiring information about the oceans in vastly expanded scales of time and space and from oceanic sectors not accessible with the suite of tools now used by scientists and engineers. Advances in guidance and control, communications, sensors and other technologies for undersea vehicles can provide an opportunity to understand the oceans' influence on the energy and chemical balance that sustains humankind and to manage and deliver resources from and beneath the sea. This book assesses the state of undersea vehicle technology and opportunities for vehicle applications in science and industry. It provides guidance about vehicle subsystem development priorities and describes how national research can be focused most effectively. **WTEC Panel on Research Submersibles and Undersea Technologies** Richard J. Underwater Medicine and Related Sciences Margaret F. Werts, Charles W. Shilling, 2012-12-06 This volume is the third annotated bibliography on this subject area to be compiled by these authors. The first published by Gordon and Breach Science Publishers in 1971 was entitled AN ANNOTATED BIBLIOGRAPHY ON DIVING AND SUBMARINE MEDICINE. It covered material published during the 1960's. The second volume entitled UNDERWATER MEDICINE AND RELATED SCIENCES: A GUIDE TO THE LITERATURE published in 1973 by Plenum Press covered primarily material published during 1970 and 1971 with some material from 1968 and 1969. The present volume covers material published during 1972 and 1973 but here again some earlier material has been included. The purpose of these annotated bibliographies is to make available a

large proportion of the published material in abstract form indexed in such a manner as to make it possible to compile a reasonably complete annotated bibliography on any specific subject area in the field It is possible thus to learn where the work is being done by whom and how extensively Also it becomes obvious what areas of research are lacking or inadequate These specific searches can also form a background of reference material on which to base further research or from which to write monographs or state of the art surveys Papers articles and reports listed here are in most cases readily available
