Regional Security in Southeast Asia Mely Caballero Anthony, 2005 The book examines ASEAN s mechanisms in managing challenges and threats to regional security Its extensive analyses of the ASEAN story of managing regional security cover the different phases of ASEAN s development as a regional organization and explore the perceptible changes that have occurred in regional mechanisms of conflict management The book also examines the roles of relevant actors beyond the states of ASEAN and the key interactions that have evolved over time which have been instrumental in moving regional mechanisms beyond the ASEAN way The book argues that the ASEAN way has not been impervious to change As the association finds its way through periods of crises and continues to confront the many challenges ahead ASEAN and its mechanisms are already being transformed beyond the narrow confines of the modalities associated with the ASEAN way The changes in the political and security landscape of the region as well as the democratic transitions taking place in some member states have set the stage

for a much more dynamic set of regional actors and processes that bring into question the kind of regionalism that is now taking place in the region the way regionalism is changing in Southeast Asia

*Security, Arms Control and Defence Restructuring in East Asia* Bjørn Møller, 2019-01-22 First published in 1998 this volume examines East Asia especially Northeast Asia which has been a region of considerable political security of importance for several key reasons It features several great and medium powers China Japan and Russia as well as North and South Korea Even though no arms race is yet discernible among these states with the partial exception of the two Koreas it is conceivable that one might commence If it did the level of militarization could become quite alarming if only because of the tremendous and rapidly growing economic potential of the regional states Even though relations among

regional states except the two Koreas are currently peaceful the region features several unresolved issues e g concerning territory and a historical legacy of enmity between several states To prevent such conflicts of interest from erupting into armed conflict is of the utmost importance A stabilizing factor is that the military potentials in the region are still predominantly defensively oriented i e most states lack the requisite power projection or invasion capabilities to inflict serious harm on each other However this might change in the not so distant future Hence the importance of confidence building measures of an institutionalization of regional relations and of a strengthening of commitments to defensive military strategies and postures

Security Cooperation in Africa Yonny Kulendi, 1997 This thesis argues that when West African states united to form the Economic Community of West African States Monitoring Group ECOMOG they did so for reasons very different from those that are advanced by most scholars and West African policy makers The conventional wisdom holds that the ECOMOG intervention in Liberia was motivated by the desire of West African leaders to relieve the humanitarian disaster caused by the Liberian civil war In contrast I will argue that humanitarian considerations were far less important to the participating states than their desire to protect the political stability of their own regimes which they believed would be threatened by a rebel victory over President Samuel Doe's Armed Forces of Liberia AFL In particular they worried that a rebel victory in Liberia would constitute a dangerous precedent for other dissidents within the sub region Moreover they were concerned that a Charles Taylor controlled Liberia could become a breeding ground for similar insurgencies by dissidents fleeing their regimes
