Substrata Versus Universals In Creole Genesis:

Substrata versus Universals in Creole Genesis Pieter Muysken, Norval Smith, 1986-01-01 Two of the most prominent hypotheses about why the structures of the Creole languages of the Atlantic and the Pacific differ are the universalist and the substrate hypotheses. The universalist hypothesis claims essentially that the particular grammatical properties of Creole languages directly reflect universal aspects of the human language capacity and thus Creole genesis involves then the stripping away of the accretions of language history. The substrate hypothesis claims on the other hand that creole genesis results from the confrontation of two systems: the native languages of the colonized groups and the dominant colonial language and that the native language leaves strong traces in the resulting Creole. The contributions of this ground breaking collection present new and historical research on the old debate of substrata versus universals in Creole languages.

Creolization and Contact Norval Smith, Tonjes Veenstra, 2001 This volume contains revised and extended versions of a selection of the papers presented at The Amsterdam Workshop on Language Contact and Creolization. These studies apply the concept of relexification to creoles as well as other contact languages, highlight the relevance of strategies of second language learning for theories of pidgin/creole genesis, critically discuss the notions levelling, koine formation and convergence, the relation between types of contact situations and processes of crosslinguistic influence as well as the linguistic consequences of the social structure of the plantation system. In addition to discussing English, French and Dutch related creoles, the papers cover a wide range of contact languages spoken throughout Africa, Asia and Europe. The breadth and coverage makes this an indispensable title for research in the field of contact linguistics. **Language Change and**

Language Contact in Pidgins and Creoles John McWhorter, 2000-05-15 This book collects a selection of fifteen papers presented at three meetings of the Society for Pidgin and Creole Linguistics in 1996 and 1997. The focus is on papers which approach issues in creole studies with novel perspectives, address understudied pidgin and creole varieties or compellingly argue for controversial positions. The papers demonstrate how pidgins and creoles shed light on issues such as verb movement, contact induced language change and its gradations, discourse management via tense aspect particles, language genesis, substratal transfer and Universal Grammar, and cover a wide range of contact languages ranging from English and French based creoles through Portuguese creoles of Africa and Asia, Sango, Popular Brazilian Portuguese, West African Pidgin Englishes and Hawaiian Creole English. **Word-Formation and Creolisation** Maria Braun, 2009-12-23 This book explores

a relatively little investigated area of creole languages: word formation. It provides the most comprehensive account so far of the word formation patterns of an English based creole language, Sranan, as found in its earliest sources and compares them with the patterns attested in the input languages. One of the few studies of creole morphology based on historical data, the book discusses the theoretical problems arising with the historical analysis of creole word formation and provides an analysis along the lines of Booij's 2005/2007 *Construction Morphology*, in which the assumed boundaries between affixation

compounding and syntactic constructions play a very minor role It shows that Early Sranan word formation is characterised by the absence of superstrate derivational affixes the use of free morphemes as derivational markers and of compounding as the major word formation strategy The emergence of Early Sranan word formation involved multiple sources the input languages universals language internal development and different mechanisms reanalysis of free morphemes as derivational markers adaptation of superstrate complex words transfer from the substrates and the creation of innovations The findings render untenable theoretical accounts of creole genesis based on one explanatory factor such as superstrate or substrate influence

The Routledge Handbook of Language Contact Evangelia Adamou,Yaron Matras,2020-07-26 The Routledge Handbook of Language Contact provides an overview of the state of the art of current research in contact linguistics Presenting contact linguistics as an established field of investigation in its own right and featuring 26 chapters this handbook brings together a broad range of approaches to contact linguistics including experimental and observational approaches and formal theories a focus on social and cognitive factors that impact the outcome of language contact situations and bilingual language processing the emergence of new languages and speech varieties in contact situations and contact linguistic phenomena in urban speech and linguistic landscapes With contributions from an international range of leading and emerging scholars in their fields the four sections of this text deal with methodological and theoretical approaches the factors that condition and shape language contact the impact of language contact on individuals and language change repertoires and formation This handbook is an essential reference for anyone with an interest in language contact in particular regions of the world including Anatolia Eastern Polynesia the Balkans Asia Melanesia North America and West Africa

Language Variation - European Perspectives VI Isabelle Buchstaller,Beat Siebenhaar,2017-07-26 Language Variation European Perspectives VI showcases a selection of papers from the 8th International Conference on Language Variation in Europe which was held in Leipzig in 2015 The volume includes plenaries by Miriam Meyerhoff and Steffen Klaere The large and the small of it Big issues with smaller samples in the study of language variation Martin Haspelmath and Susanne Maria Michaelis Analytic and synthetic Typological change in varieties of European languages and J rgen Erich Schmidt Dynamics variation and the brain In addition the editors have selected 11 papers which exemplify the breadth of research on European languages The contributions to this volume encompass languages as varied as Swedish Greek Galician Dutch German Swedish English including English lexified contact varieties French Spanish Croatian Luxembourgish and Romani The variety of theoretical frameworks and methodological perspectives and particularly the combination of different methods attests to the scope of research currently being conducted on language variation and change in European languages **Creoles, their Substrates, and Language Typology** Claire Lefebvre,2011-02-17 Since creole languages draw their properties from both their substrate and superstrate sources the typological classification of creoles has long been a major issue for creolists typologists and linguists in general Several contradictory proposals have been put forward in the literature For example creole languages typologically pair with their superstrate languages Chaudenson 2003 with their substrate languages Lefebvre 1998 or even creole languages are alike Bickerton 1984 such that they constitute a definable typological class McWhorter 1998 This book contains 25 chapters bearing on detailed comparisons of some 30 creoles and their substrate languages As the substrate languages of these creoles are typologically different the detailed investigation of substrate features in the creoles leads to a particular answer to the question of how creoles should be classified typologically The bulk of the data show that creoles reproduce the typological features of their substrate languages This argues that creoles cannot

be claimed to constitute a definable typological class

Language Creation and Language Change Michel DeGraff, 1999
 Research on creolization language change and language acquisition has been converging toward a triangulation of the constraints along which grammatical systems develop within individual speakers and viewed externally across generations of speakers The originality of this volume is in its comparison of various sorts of language development from a number of linguistic theoretic and empirical perspectives using data from both speech and gestural modalities and from a diversity of acquisition environments In turn this comparison yields fresh insights on the mental bases of language creation The book is organized into five parts creolization and acquisition acquisition under exceptional circumstances language processing and syntactic change parameter setting in acquisition and through creolization and language change and a concluding part integrating the contributors observations and proposals into a series of commentaries on the state of the art in our understanding of language development its role in creolization and diachrony and implications for linguistic theory Contributors Dany Adone Derek Bickerton Adrienne Bruyn Marie Coppola Michel DeGraff Viviane D prez Alison Henry Judy Kegl David Lightfoot John S Lumsden Salikoko S Mufwene Pieter Muysken Elissa L Newport Luigi Rizzi Ian Roberts Ann Senghas Rex A Sprouse Denise Tangney Anne Vainikka Barbara S Vance Maaïke Verrips

Variation and Change Mirjam Fried, Jan-Ola Östman, Jef Verschueren, 2010 The ten volumes of the Handbook of Pragmatics Highlights focus on the most salient topics in the field of pragmatics thus dividing its wide interdisciplinary spectrum in a transparent and manageable way While the other volumes select specific philosophical cognitive grammatical cultural interactional or discursive angles this sixth volume focuses on the dynamic aspects of language and reviews the relevant developments in variationist and diachronic scholarship The areas explored in the volume concern several general themes specific methodological approaches from comparative reconstruction to evolutionary pragmatics issues in intra lingual variation in terms of standard and non standard varieties cross linguistic variation including its cross cultural dimension and the study of diachronic relations across linguistic patterns including changes in all areas of pragmatic patterns and categories The contributions document two prominent and interrelated trends that shape contemporary variationist and diachronic research One it has moved from situating change within context independent systems toward incorporating patterns of language use and the speaker s role in language change And two it has reoriented its focus away from cataloguing instances of variation and toward seeking theoretically informed accounts that aim at explaining variation and change On the whole the volume argues for accepting and developing actively a systematic connection between research in diachrony synchronic variation and typology while also incorporating the socio cognitive perspective in linguistic analysis as a particularly promising source of useful methodology and explanatory models

Gradual Creolization Rachel Selbach, Hugo C. Cardoso, Margot van den Berg, 2009-04-08 Is creolization an abrupt or a gradual process In this volume leading scholars provide both comparative and case studies that outline their working definitions and their views on the particular or average time depth or key processes necessary for

contact language formation providing a state of the art assessment of the theory of gradual creolization Authors scrutinize the roles of nativization demography initial settlement language composition koineization adstrate presence bilingualism as well as a variety of structural features in pidgins creoles and other contact languages world wide From Pacific to Atlantic French English Dutch Portuguese and other lexified restructured varieties are covered Syntactic lexical phonological historical and socio cultural studies are grouped into Part 1 Linguistic analysis and Part 2 Social reconstruction This volume provides the multi faceted groundwork and expert discussion that will help formulate further a model of gradual creolization as called for by the work of the late Jacques Arends

Encyclopedia of Linguistics Philipp Strazny, 2013-02-01 Utilizing a historical and international approach this valuable two volume resource makes even the more complex linguistic issues understandable for the non specialized reader Containing over 500 alphabetically arranged entries and an expansive glossary by a team of international scholars the Encyclopedia of Linguistics explores the varied perspectives figures and methodologies that make up the field

The Making of a Mixed Language Maarten Mous, 2003-01-01 The Mbugu or Ma language Tanzania is one of the few genuine mixed languages reputedly combining Bantu grammar with Cushitic vocabulary In fact the people speak two languages one mixed and one closely related to the Bantu language Pare This book is the first comprehensive description of these languages It shows that these two languages share one grammar while their lexicon is parallel In the distant past the people shifted from a Cushitic to a Bantu language and in the process rebuilt a language of their own that expresses their separate ethnic identity in a Bantu environment This linguistic history is explained in the context of the intricate history of the people The discussion of the processes that were involved in the formation of Ma a Mbugu is extremely relevant for both creole studies and for contact linguistics in general
