American Outback is a place in the heart that will not let go and they do this through the strong presence of personae. Notable in these poems is a high sense of loss that has been rendered tenable by the kind of lyric narrative that Yeats knew so well. The poet affirms for us the passing of the many things we never really held though we may have thought we did. These poems are not talking poems. They sing. They chant. They leave indelible tracks across our eyes. The book begins with a kind of quiet precision found in Emily Dickinson, moves into haunting narrative lyrics, and ends in the realm of the hard history of self and place. And everywhere there is evidence of the poet's compassion without evidence of the poet himself. *Directory*

Publishing, 2014-08-14 A compelling analysis of the species that are most at risk of disappearing from our world and what it means to us to lose them. We asked 100 conservation groups around the world if you could pick one species that epitomises your work, which would it be? From the RSPB to WWF to the Cheetah Conservation Fund and many, many more, the answers came rolling in. Each provided a synopsis of the threats faced by their selected species, a summary of their degree of threat, an outline of the work being done to save them, and a number of ways in which the reader could help to conserve that species. With beautiful full-page photographs of each of the 100 species, this is a book that will both fascinate and educate and hopefully help to secure the future of the threatened animals and plants that it showcases.
