The Power Of Being Creative Featuring The Story Of Thomas Edison:

The Power of Being Creative Patricia Metten,1984 Biography of the famous inventor Thomas Edison *Organizing Creativity* Stephan M. Schaefer,2023-09-22 Creativity is a defining feature of contemporary work life Who has not taken part in brainstorming sessions read glossy pamphlets about innovation and creativity as important cornerstones of a new business strategy or been made aware of the importance of creative skills for one s career But what does it mean to be creative in and as an organization *Organizing Creativity* provides an answer to this question The book builds on the premise that creativity is essentially about ideas Every organization is dependent on valuable ideas for solving everyday problems as well as inventing new processes products or services The main argument of the book is that an analysis of organizational creativity should always account for the interdependency of context process and practice Based on cultural and processual perspectives it highlights the implications of context process and practice for different aspects of the creative process generating evaluating and facilitating ideas Furthermore it reflects on how dominant notions of creativity in the economy and society prevent transformative changes and suggests a radical transformative approach to organizing creativity as an alternative To support and illustrate its argument *Organizing Creativity* draws on abundant empirical examples case illustrations and seminal research from Sociology Social Psychology and Organization Studies It provides us with a multi dimensional perspective and will both further our understanding of and spark critical reflection on the complex interplay of the organizational social and cultural contexts processes and practices of organizing creativity *Organizing Creativity* Stephan M. Schaefer,2023 The introductory chapter places creativity in a historical context It shows how objectivist and subjectivist research philosophies have emerged and how they relate to technical practical and emancipatory knowledge interests which inform the study of organizational creativity Based on a sensitizing concept of organizational creativity the chapter then suggests context process and practice as the conceptual framing for the subsequent arguments of the book *The Biography Book* Daniel S. Burt,2001-02-28 From Marilyn to Mussolini people captivate people A E s Biography best selling autobiographies and biographical novels testify to the popularity of the genre But where does one begin Collected here are descriptions and evaluations of over 10 000 biographical works including books of fact and fiction biographies for young readers and documentaries and movies all based on the lives of over 500 historical figures from scientists and writers to political and military leaders to artists and musicians Each entry includes a brief profile autobiographical and primary sources and recommended works Short reviews describe the pertinent biographical works and offer insight into the qualities and special features of each title helping readers to find the best biographical material available on hundreds of fascinating individuals *Becoming Earth* Anne Reinertsen,2016-03-22 *Becoming earth* is about how we can write and tell stories in a way that allows us to collaborate and be stewards and partners of the natural world our earth rather than dominators of it That is what this assemblage is about about trying to take seriously the minor politics of sensing experimenting with questions of

attending and attuning to difference contestation nomadism relationality and permeability in sensing cultivating muchness newness communities of acceptance and decision making Going beyond the binaries dualisms instrumentalist criteria etc and supplying third space conceptions of agency not tied to human action alone but rather examining human and more than human relational assemblages of affecting and being affected The tasks for educators becoming not merely people who pass on traditions institutions systems and or structures but prepare for future contingent events ultimately creates vital pedagogies of many prospects in our classrooms and exceeds forms of contracts between generations These are embodied ecologies and or enacting ecologies in practice showing the practical and political strength of new materialisms and presenting its potential and usefulness to simultaneously work and analyse local and global political strategies and sustainability Making virtuality productive as a form of life our wonderings are thus always stronger than our assertions The sometimes fierce stories in this book might light some paths *Every Book Is a Social Studies Book* Jeannette
