The Print Connoisseur ,1922 **The Connoisseur** ,1906 **Creative Ventures** Paul Weiss,1992 Paul Weiss systematically maps creativity in its many manifestations creative ventures in the arts in mathematics and the sciences in moral development in social movements and in government A truly creative work arises from a combination of factors Weiss argues that among these factors are two kinds of ultimates one of which he calls the Dunamis an absolute ground of being of sufficient complexity to warrant an appendix of its own The other ultimate is divided into five conditions voluminous rational stratifying affiliating and coordinating each of which is primarily operative upon one of the five kinds of creative ventures Weiss traces the ways these ultimates are combined with the creator s individual being and with the obdurate material at hand as the creator strives toward a creative ideal The result is the rare truly creative venture sustaining human existence

Chaos and Cosmos Karen Ann Lang,2006 Writing in 1940 the prominent German art historian Erwin Panofsky asked How then is it possible to build up art history as a respectable scholarly discipline if its objects come into being by an irrational and subjective process In *Chaos and Cosmos* Karen Lang addresses the power of art to resist the pressures of the transcendental vantage point history Uncovering the intellectual and cultural richness of the early years of academic art history in Germany the period from the 1880s to 1940 she explores various attempts within art history to transform aesthetic phenomena chaos into the cosmos of a systematic unified field of inquiry Lang starts by examining Panofsky s approach to aesthetic phenomena in his early theoretical essays alongside Ernst Cassirer s contemporaneous publications on the substance and function of scientific concepts and on Einstein s theory of

relativity She then turns to the subject of aesthetic judgment through a rereading of Kantian subjectivity and Kant's uneasy legacy in art history From here Lang considers the different organizing theories of symbolic form proposed by Aby Warburg and Cassirer as well as Goethe's inspiration for both Alois Riegl's notion of age value and Walter Benjamin's conceptions of the aura concluding with an extended examination of objectivity and the figure of the art connoisseur Extensively illustrated with works of art from the Enlightenment to the present day this venturesome book illuminates an intellectual legacy that has profoundly shaped the study of the history of art in ways that have until now been largely unacknowledged Addressing the interplay of chaos and cosmos in terms of history art history philosophy and epistemology Lang traces shifts in point of view in art history and the way these shifts change aesthetic objects into historical objects and even objects of knowledge
