The Power of Human Rights Thomas Risse, Stephen C. Ropp, Kathryn Sikkink, 1999-08-05 This book celebrated the 50th anniversary of the Universal Declaration of Human Rights by showing how global human rights norms have influenced national government practices in eleven different countries around the world Had the principles articulated in the Declaration had any effect on the behavior of states towards their citizens What are the conditions under which international human rights norms are internalized in domestic practices And what can we learn from this case about why how and under what conditions international norms in general influence the actions of states This book draws on the work of social constructivists to examine these important issues The contributors examine eleven countries representing five different world regions Northern Africa Sub Saharan Africa Southeast Asia Latin America and Eastern Europe drawing practical lessons for activists and policy makers concerned with preserving and extending the human rights gains made during the past fifty years

Pacific Symposium on Biocomputing 2010, Kamuela, Hawaii, USA, 4-8 January 2010 Russ B. Altman, 2009-10-23 The Pacific Symposium on Biocomputing PSB 2010 is an international multidisciplinary conference for the presentation and discussion of current research in the theory and application of computational methods in problems of biological significance Presentations are rigorously peer reviewed and are published in an archival proceedings volume PSB 2010 will be held on January 4 8 2010 in Kohala Coast Hawaii Tutorials and workshops will be offered prior to the start of the conference PSB 2010 will bring together top researchers from the US Asia Pacific and around the world to exchange research results and address pertinent issues in all aspects of computational biology It is a forum for the presentation of work in databases algorithms interfaces visualization modeling and other computational methods as applied to biological problems with emphasis on applications in data rich areas of molecular biology The PSB has been designed to be responsive to the need for critical mass in sub disciplines within biocomputing For that reason it is the only meeting whose

sessions are defined dynamically each year in response to specific proposals PSB sessions are organized by leaders of research in biocomputing s hot topics In this way the meeting provides an early forum for serious examination of emerging methods and approaches in this rapidly changing field Handbook of Child Psychology, Theoretical Models of Human Development William Damon, Richard M. Lerner, 2006-05-19 Part of the authoritative four volume reference that spans the entire field of child development and has set the standard against which all other scholarly references are compared Updated and revised to reflect the new developments in the field the Handbook of Child Psychology Sixth Edition contains new chapters on such topics as spirituality social understanding and non verbal communication Volume 1 Theoretical Models of Human Development edited by Richard M Lerner Tufts University explores a variety of theoretical approaches including life span life course theories socio culture theories structural theories object relations theories and diversity and development theories New chapters cover phenomenology and ecological systems theory positive youth development and religious and spiritual development **Official Gazette of the United States Patent and Trademark Office** United States. Patent and Trademark Office, 2002 *Gender, Interaction, and Inequality* Cecilia L. Ridgeway, 1992 Causal explanations are essential for theory building In focusing on causal mechanisms rather than descriptive effects the goal of this volume is to increase our theoretical understanding of the way gender operates in interaction Theoretical analyses of gender s effects in interaction in turn are necessary to understand how such effects might be implicated with individual level and social structural level processes in the larger system of gender inequality Despite other differences the contributors to this book all take what might be loosely called a microstructural approach to gender and interaction All agree that individuals come to interaction with certain common socially created beliefs cultural meanings experiences and social rules These include stereotypes about gendered activities and skills beliefs about the status value of gender rules for interacting in certain settings and so on However as individuals apply these beliefs and rules to the specific contingent events of interaction they combine and reshape their implications in distinctive ways that are particular to the encounter As a result individuals actively construct their social relations in the encounter through their interaction The patterns of relations that develop are not completely determined or scripted in advance by the beliefs and rules of the larger society Consequently there is a reciprocal causal relationship between constructed patterns of interaction and larger social structural forms The constructed patterns of social relations among a set of interactants can be thought of as micro level social structures or more simply microstructures

Effective Field Theory in Particle Physics and Cosmology Sacha Davidson, Paolo Gambino, Mikko Laine, Matthias Neubert, Christophe Salomon, 2020-04-20 The topic of the CVIII session of the Ecole de Physique des Houches held in July 2017 was Effective Field Theory in Particle Physics and Cosmology Effective Field Theory EFT is a general method for describing quantum systems with multiple length scales in a tractable fashion It allows to perform precise calculations in established models such as the Standard Models of particle physics and cosmology as well as to concisely parametrise

possible effects from physics beyond the Standard Models The goal of this school was to offer a broad introduction to the foundations and modern applications of Effective Field Theory in many of its incarnations This is all the more important as there are precious few textbooks covering the subject none of them in a complete way In this book the lecturers present the concepts in a pedagogical way so that readers can adapt some of the latest developments to their own problems The chapters cover almost all the lectures given at the school and will serve as an introduction to the topic and as a reference manual to students and researchers

Designing Experiments and Analyzing Data Scott E. Maxwell, Harold D. Delaney, Ken Kelley, 2017-09-11 *Designing Experiments and Analyzing Data A Model Comparison Perspective* 3rd edition offers an integrative conceptual framework for understanding experimental design and data analysis Maxwell Delaney and Kelley first apply fundamental principles to simple experimental designs followed by an application of the same principles to more complicated designs Their integrative conceptual framework better prepares readers to understand the logic behind a general strategy of data analysis that is appropriate for a wide variety of designs which allows for the introduction of more complex topics that are generally omitted from other books Numerous pedagogical features further facilitate understanding examples of published research demonstrate the applicability of each chapter's content flowcharts assist in choosing the most appropriate procedure end of chapter lists of important formulas highlight key ideas and assist readers in locating the initial presentation of equations useful programming code and tips are provided throughout the book and in associated resources available online and extensive sets of exercises help develop a deeper understanding of the subject Detailed solutions for some of the exercises and realistic data sets are included on the website DesigningExperiments.com The pedagogical approach used throughout the book enables readers to gain an overview of experimental design from conceptualization of the research question to analysis of the data The book and its companion website with web apps tutorials and detailed code are ideal for students and researchers seeking the optimal way to design their studies and analyze the resulting data

The Power of the Supreme People's Court Ding Qi, 2019-08-09 This book explores the recent development of the Supreme People's Court of China the world's largest highest court Recognizing that its approach to exercising power in an authoritarian context has presented a challenge to the understanding of judicial power in both democratic and non democratic legal settings it captures the essence of the Court through its institutional design as well as functional practice It argues that regardless of the deep seated political and institutional constraints the Court has demonstrated a highly pragmatic interest in fulfilling its primary functions and prudently expanding judicial power in the context of reform era China This notwithstanding it also discusses

how the Court's incompetence and reluctance to challenge the bureaucratism and politicization suggests that the call for an impartial and authoritative judicial power will continue to be jeopardized while the Court operates in the shadow of Party authority and lacks meaningful checks and balances Drawing on the experience of the Court this book reflects on some deep rooted misunderstandings of legal development in China providing a source of inspiration for reconceptualizing the internal logic of a distinct category of judicial power

Character Studies in the Gospel of Matthew Matthew Ryan Hauge, Craig Evan Anderson, 2024-02-08 This volume examines a multitude of characters in Matthew's gospel and provides an in depth look at the different approaches currently employed by scholars working with literary and reader oriented methods Beginning with an introduction on the properties of character and the several aspects involved in the creation of person the contributors provide a close reading of numerous characters and character types in the Gospel of Matthew Including Mary King Herod John the Baptist Jesus the Preacher Jesus the Teacher God the Father the Roman Centurion Peter Women Gentiles Scribes and Pharisees and Romans Such close studies aid the understanding of different issues in Matthean characterization while also charting the development of hermeneutical vistas that have developed in contemporary scholarship resulting in a collection of exegetical character studies that are self consciously working from a literary narrative critical reader oriented or related methodology
