geography of America's presidential elections from Washington to Obama. An invaluable addition to the library of all those interested in presidential elections and U.S. politics. Marion Orr, Frederick Lippitt Professor of Public Policy and Professor of Political Science, Brown University. This volume sets an extraordinarily high standard in scholarship, completeness, description, and explanation of our political process. It has been said that all politics are local, but never before has this been demonstrated with such clarity and panache using the simple method of standardized tables summarizing voting, then showing state and county breakdowns of the numbers, greatly strengthened by beautiful full-color maps and cartograms. Every scholar of politics and democracy will benefit from the work laid out in this volume. Keith Clarke, Professor of Geography, University of California, Santa Barbara. Presidential Elections is an almanac of the popular vote in every presidential election in American history, analyzed at the county level with histories of each campaign, graphs, and stunning four-color maps. Most Americans are familiar with the crude red-state/blue-state maps used by commentators and campaign strategists, and even for want of an alternative by many academics. In providing a higher-resolution view of voting behavior, the authors of this new volume enable examination of local and regional political trends that are invisible in state-level aggregations. Presidential Elections will enable scholars to more subtly analyze voting behavior, campaigns, and presidential politics; commentators will use it to analyze trends and trace the historical evolution of new coalitions and voting blocs; strategists will use it to plan campaigns and mobilize constituencies. Presidential Elections will become the standard almanac on the subject, a required resource for academic and public libraries as well as for scholars, consultants, and pundits nationwide. Donald R. Deskins Jr. is a political geographer and Emeritus Professor of Sociology and a former Associate Dean of the Horace H. Rackham School of Graduate Studies at the University of Michigan. Hanes Walton Jr. is Professor of Political Science at the University of Michigan. He also holds positions as Senior Research Scientist at the Center for Political Studies and as a faculty member in the Center for Afroamerican and African Studies. Sherman C. Puckett is a Ph.D. graduate of the University of Michigan in urban and regional planning. He was a mayoral appointee in the data processing department of the Coleman A. Young administration in the City of Detroit and recently retired from Wayne County government as manager of technology, geographic information systems, and development of maintenance management systems.

Presidential Campaigns Daniel M. Shea, Brian M. Harward, 2013-10-31. Combining primary sources with expert commentary, this timely book probes critical moments in U.S. presidential elections in the last 20th and early 21st centuries, empowering readers to better understand and analyze the electoral process. Presidential Campaigns Documents Decoded illuminates both the high stakes of a presidential campaign and the gaffes, controversies, and excesses that often influence the outcome. With a view to enabling readers to develop skills essential to political literacy, the book examines crisis points in modern presidential elections from the early 1950s through the late 2000s. Chronologically organized, the study focuses on key events pertinent to each election. It provides an original account of the event, such as a debate transcript or news report, as well as a discussion.

detailing how the issue emerged and why it was important This unique and engaging approach enables students to experience the actual source material as voters might have At the same time it shows them how an expert views the material facilitating a deeper understanding of the narratives every presidential campaign constructs around its candidates its party and its opponents

Decade of Nightmares Philip Jenkins,2006-03-15 Why did the youthful optimism and openness of the sixties give way to Ronald Reagan and the spirit of conservative reaction a spirit that remains ascendant today Drawing on a wide array of sources including tabloid journalism popular fiction movies and television shows Philip Jenkins argues that a remarkable confluence of panics scares and a few genuine threats created a climate of fear that led to the conservative reaction He identifies 1975 to 1986 as the watershed years During this time he says there was a sharp increase in perceived threats to our security at home and abroad At home America seemed to be threatened by monstrous criminals serial killers child abusers Satanic cults and predatory drug dealers to name just a few On the international scene we were confronted by the Soviet Union and its evil empire by OPEC with its stranglehold on global oil by the Ayatollahs who made hostages of our diplomats in Iran Increasingly these dangers began to be described in terms of moral evil Rejecting the radicalism of the 60s which many saw as the source of the crisis Americans adopted a more pessimistic interpretation of human behavior which harked back to much older themes in American culture This simpler but darker vision ultimately brought us Ronald Reagan and the ascendancy of the political Right which more than two decades later shows no sign of loosening its grip Writing in his usual crisp and witty prose Jenkins offers a truly original and persuasive account of a period that continues to fascinate the American public It is bound to captivate anyone who lived through this period as well as all those who want to understand the forces that transformed and continue to define the American political landscape
