Object Recognition Thomas M. Strat,2012-12-06 Natural Object Recognition presents a totally new approach to the automation of scene understanding Rather than attempting to construct highly specialized algorithms for recognizing physical objects as is customary in modern computer vision research the application and subsequent evaluation of large numbers of relatively straightforward image processing routines is used to recognize natural features such as trees bushes and rocks The use of contextual information is the key to simplifying the problem to the extent that well understood algorithms give reliable results in ground level outdoor scenes **Prosodic Morphology in Mandarin Chinese** Shengli

Feng,2017-12-14 It is not entirely clear if modern Chinese is a monosyllabic or disyllabic language Although a disyllabic prosodic unit of some sort has long been considered by many to be at play in Chinese grammar the intuition is not always rigidly fleshed out theoretically in the area of Chinese morphology In this book Shengli Feng applies the theoretical model of prosodic morphology to Chinese morphology to provide the theoretical clarity regarding how and why Mandarin Chinese words are structured in a particular way All of the facts generated by the system of prosodic morphology in Chinese provide new perspectives for linguistic theory as well as insights for teaching Chinese and studying of Chinese poetic prosody
