Using the New CAT will supersede the author's successful Choosing and Using a Schmidt Cassegrain Telescope which has enjoyed enthusiastic support from the amateur astronomy community for the past seven years. Since the first book was published a lot has changed in the technology of amateur astronomy. The sophistication and variety of the telescopes available to amateurs has increased dramatically. Computerized SCTs, Maksutov Cassegrains, and most recently Meade's new and acclaimed Ritchey Chr. tiens have come to dominate the market. That means that all amateurs considering the purchase of a new telescope, not only a SCT and not just beginners, will benefit from this detailed guide. Choosing the right telescope for particular kinds of observation or even for general work is far from easy, but Rod Mollise gives invaluable advice and guidance.

Imaging has been a slow-moving area in ophthalmology for some time, but now OCT is providing another, more detailed source of demonstrable change in the eye in diagnostic, therapeutic, or post-surgical settings. OCT and ultrasound both measure advancing disease states and post-surgical healing. The difference is that OCT shows more subtle changes, particularly post-surgically.
