## **Two Centuries of Compensation for U.S. Production Workers**

**in Manufacturing** L. Officer, 2009-05-11 Production workers continue to be an important group in the economy Two Centuries of Compensation for U S Production Workers in Manufacturing is the first long run annual series of average hourly compensation for U S production workers in manufacturing Officer reviews both data sources and existing literature on related historical series as well as using current official statistics The new series provides original insights into the standard of living of these workers *Essays in Economic History* Lawrence H. Officer, 2022-10-05 This book is the culmination of and a collection of distinguished scholar Lawrence Officer s principal research over 50 years of scholarly activity The collection consists primarily of three topics on which the author has spent the major part of his research purchasing power parity standard of living and monetary standards There is also a unique chapter on economics and economic history in science fiction This volume is ideal for academics graduate and undergraduate students and practitioners *The Downsizing of Economics Professors* Steven Payson, 2017-10-24 The number of economics professors now teaching at universities will decline substantially over the next couple of decades This will happen for one main reason the advent of distance learning especially in the form of Massive Open Online Courses MOOCs which enable a single professor to lecture to tens of thousands of students Other academic fields will undoubtedly encounter similar reductions in their numbers of professors However as this book argues at several levels academic economics is the one profession that is most qualified to study and address the topic In this sense it is the one profession that should best recognize the economic benefits of this transition which this book describes and take responsibility for leading the transition among all academic fields Unfortunately the position espoused by several academic economists has been against this inevitable transition a position that politically upholds their employment and the status of their institutions They have asserted that MOOCs lower the quality of education and threaten the financial viability of traditional universities Based on extensive evidence and analysis however this book argues that their position untenable Their position is hypocritical as well given the fact that economics professors more than anyone else have upheld the idea that jobs should be lost and new ones should be gained in response to technological changes that promote economic efficiency There is also irony in the fact that the high tuitions required to maintain traditional classrooms effectively deny a college education to those who cannot afford it Thus unsound arguments that traditional lectures are needed to preserve the quality of education actually do not improve the quality of education but have the only real effect of denying education to many people who would otherwise be able to receive it To address this topic comprehensively the book goes deep into fundamental questions about what economics professors really do with their time and energy and what they should be doing in the best interests of their students and of society These are areas that the profession has needed to address for a long time but has failed to do so *Essentials of Economics* Paul Krugman, Paul R.
