Social Classes In Marxist Theory:

Social Classes in Marxist Theory Allin Cottrell, 2019-11-19 First published in 1984 This study critically examines the conceptions of social class employed by Marx and by modern Marxist writers to probe their problematic areas and to propose certain modifications to those conceptions The author also tests the conclusions deriving from this theoretical reflection against the task of analysing some aspects of the development of class relations in a particular social formation in Britain This title will be of interest to students of philosophy and politics *Classes, Strata and Power (RLE Social Theory)*

Włodzimierz Wesolowski, 2014-08-21 Professor Wesolowski presents a detailed study of Marx's theory of class structure and compares it with non-Marxist theories of social stratification in particular the functionalist theory of stratification and the theory of power elite He is also concerned to develop and extend the Marxist approach to the study of class structure and social stratification in a socialist society The book begins with a thorough and original reconstruction of Marx's theory of class domination in a capitalist society and goes on to show that contemporary non-Marxist theories of power elites complement rather than contradict Marx's concept of class domination The author examines in detail the functionalist theory of stratification but rejects it preferring the Marxist approach Finally though he demonstrates the complementary nature of the two approaches to the study of class structure by expounding a comprehensive paradigm for empirical research based on Marxist theory but including some elements of contemporary stratification theories as well Marxist Class Theory for a

Skeptical World Raju J Das, 2017-01-16 Marxist Theory of Class for a Skeptical World is a critique of some of the influential radical theories of class and presents an alternative approach to it This book critically discusses Analytical Marxist and Post-structuralist Marxist theories of class and offers an alternative approach that is rooted in the ideas of Marx and Engels as well as Lenin and Trotsky It presents a materialist dialectical foundation for class theory and conceptualizes class at the trans-historical level and at the level of capitalism It shows that capitalism is an objectively existing articulation of exchange property and value relations between capital and labour at multiple geographical scales and that the state is an arm of class relation It draws out implications of class relations for consciousness and political power of the proletariat *Critical*

perspectives on Marx's approach to Social Classes in Society Saied Qadir Faqir Ibrahim, Rebaz Jalal Mahmood, 2016-02-01 Scientific Essay from the year 2016 in the subject Sociology Social System and Social Structure language English abstract

Social class issues have taken a crucial role in the social sciences Martti 2000 The term social class was developed in the 18th and 19th centuries and has been used widely particularly by sociologists and political economic theorists such as Thomas Hobbes John Locke Jean Jacques Rousseau Karl Marx Max Weber Ralf Dahrendorf and so on Encyclopaedia Britannica 2012 It is clear that societies have been stratified into various classes Roberts 2001 Social inequality and the differences between people are two such obvious characteristics in every society that it has become necessary to classify society into the different classes Crompton and Gubbay 1980 Furthermore Steenberge 2012 states that normally individuals

are grouped into classes based on their economic positions and similar political and economic interests within their culture. Inequalities can be seen as being stratified on the basis of social class and this has been a main area of Marx's theory. Social class is a key to comprehending the different social opportunities available to different social groups and individuals in societies. Marsh et al 2000. In the Communist Manifesto, Marx saw the whole of society as likely to have just two huge classes: Bourgeoisie and Proletariat, which come into direct conflict with one another, especially in capitalist societies. Crompton 1993. Whilst Weber's viewpoint about social class is analogous with Marx's perspective, he supposed that having private property could have a role in the formation of social classes in societies. Reid 1981. He also assumed that the variances between social classes in society might be a source of social conflict between them but viewed the conflict in a different way to Marx as Weber had seen that the social struggle between the classes over making goods as a normal conflict in all societies. A further divergence in Dahrendorf and Marx's perspectives is that the former focuses on the amount of power to explain the structure of social class in society.

Marxism, Class Analysis and Socialist Pluralism (RLE Marxism) Les Johnston, 2015-04-17. This book, first published in 1986, presents a radical challenge to socialist orthodoxy, subjecting a key component of that orthodoxy, Marxism, to sustained criticism. Les Johnston argues that Marxism cannot provide the foundations for a rigorous socialist theory or an effective socialist politics. A fundamental element of this criticism is the suggestion that the problem of reductionism, which has preoccupied Marxists, is a red herring. Marxism's problem is not its reductionism but its theoretical incoherence. Marxism is not deterministic for there is invariably an indeterminate relationship between the materialism it invokes and the forms of politics it adopts. However, materialism is an obstacle to socialist theory. The contradictions and failures of Marxist class analysis suggest that the class concept is inadequate to the demands that socialists continue to place on it. It is not merely class which is problematic, however, but the conception of political interests which is associated with it. Even recent Marxist revisionists who dispense with class primacy are unwilling to come to terms with the question of how socialist political interests are constituted. Socialist theory has to recognise the varied forces and interests on the left and an effective socialism will have to be a pluralistic one. This means there can be no general theory of socialism since a pluralistic socialism has to be able to adjust to varying social conditions.
