Social Communication in Advertising William Leiss, Stephen Kline, Sut Jhally, 1990 Now available in a significantly updated second edition featuring two new chapters Social Communication in Advertising remains the most comprehensive historical study of advertising and its function within contemporary society It traces advertising s influence within three key social domains the new commodities industry popular culture and the mass media which manages the constellation of images that unifies all three *Social Communication in Advertising* William Leiss, Stephen Kline, Sut Jhally, 1990 **Social**

Communication in Advertising William Leiss, 1986 **Gendered Moods** Elizabeth Ettorre, Elianne Riska, 2012-11-12 Tranquillisers are prescribed to almost twice as many women as men yet very little gender based research has been carried out on the social context of their use Gendered Moods offers the first feminist analysis of the gendered character of psychotropic drug use based on studies of long term psychotropic drug users and the content of drug advertising The authors argue that gender differences in psychotropic drug use are manifestations of the gendered construction of society as a whole and that as a result women are particularly susceptible to being channelled into a state of dependency on prescribed drugs Exploring current social scientific debates relating to drug users and providers Gendered Moods also provides a critical review of previous research It is a much needed introduction to a neglected area of study **Imperial persuaders** Anandi Ramamurthy, 2017-03-01 The first book to provide an historical survey of images of black people in advertising during the colonial period Analyses the various conflicting and changing ideologies of colonialism and racism in British advertising Reveals the historical and production context of many well known advertising icons as well as the specific commercial interests that various companies images projected Provides a chronological understanding of changing colonial ideologies in relation to advertising while each chapter explores images produced to sell specific products such as soap cocoa tea and tobacco

Contemporary Marketing and Consumer Behavior John F. Sherry,1995-05-02 Scholarly and extensively footnoted the book is meant to be used as a sourcebook for anthropological research The book s primary audience should be marketing and anthropology researchers and graduate students faculty and researchers P G Kishel in Choice As a business person responsible for the development of advertising strategies and advertising campaigns I was impressed with the contributors willingness and desire to apply anthropological principles to real world problems John Sherry Jr s comment sums it up nicely Anthropology is a practical discipline anchoring the blue sky thinking it encourages firmly to the local ground it inhabits We need to encourage blue sky thinking so we don t repeatedly get the same answers to our inquiries Anthropologists can help us with these issues This book gives me enormous hope that applied anthropology will help restore the tremendous value that can be gained through qualitative research techniques Today in marketing and

advertising focus groups are grossly overused misused and underanalyzed I was encouraged and excited about the authors discussions of good ethnographies and focus groups that for example instead of simply asking respondents whether or not EMF causes cancer a far more creative and insightful exercise was performed with consumers and then was intensely analyzed by anthropologists All too often today qualitative research is carelessly and quickly administered and the analysis consists of a 30 minute debriefing at the end of the last focus group In the last few years the need for cross cultural consumer understanding has grown rapidly This phenomenon makes it imperative that not only must we fully understand the meanings of brands and products to our domestic consumers but we must know which meanings are transportable to consumers in other cultures John Sherry Jr s book suggests that anthropologists could and should have a major role in cross cultural consumer understanding Patricia A Cafferata President and Chief Executive Officer Young anthropologists as consumer researchers have been a powerful underground force for the past 15 years of innovative marketing Major companies as well as government and private institutions have looked to anthropologists to help when other research has failed John Sherry Jr has collected outstanding anthropological practitioners in this volume and they have written cutting edge chapters on product symbolism consumer culture advertising efficacy and international marketing The power of this collection lies in the fresh insights to each of these themes and the ability to reframe old problems to re-perceive what it means to live the life of a consumer as we approach the next century Steve Barnett Managing Director Global Business Network Containing original articles and empirical substance Contemporary Marketing and Consumer Behavior responds to a growing demand for scholarship more tuned to the empirical and practical realities of consumer culture Written by leading anthropologists who specialize in marketing and consumer research it is intended as a sourcebook for readers interested in consumption and its managerial consequences The topics and their treatments run a gamut of concerns including elements of the marketing mix such as goods and services advertising and promotion relationship management managerial intervention and development class and gender linked consumer behaviors and the production of consumption Anthropological perspectives and methods employed by the authors range from materialistic to semiotic and both qualitative and quantitative methods are employed Contributors range across time space and topics in pursuit of understanding The result is a multifaceted perspective of marketing and consumer behavior Also the remarks of eminent senior Fellows of the Association for Consumer Research who have drawn upon anthropology to make their own seminal contributions to a number of disciplines punctuate this exceptional volume A remarkable and extraordinary text Contemporary Marketing and Consumer Behavior is ideal for scholars students and professionals in marketing cultural studies gender studies psychology sociology anthropology and communication

Gender and the Media Rosalind Gill, 2015-10-02 Written in a clear and accessible style with lots of examples from Anglo American media Gender and the Media offers a critical introduction to the study of gender in the media and an up to date assessment of the key issues and debates Eschewing a straightforwardly positive or

negative assessment the book explores the contradictory character of contemporary gender representations where confident expressions of girl power sit alongside reports of epidemic levels of anorexia among young women moral panics about the impact on men of idealized representations of the six pack but near silence about the pervasive re sexualization of women's bodies along with a growing use of irony and playfulness that render critique extremely difficult The book looks in depth at five areas of media talk shows magazines news advertising and contemporary screen and paperback romances to examine how representations of women and men are changing in the twenty first century partly in response to feminist queer and anti racist critique Gender and the Media is also concerned with the theoretical tools available for analysing representations A range of approaches from semiotics to postcolonial theory are discussed and Gill asks how useful notions such as objectification backlash and positive images are for making sense of gender in today's Western media Finally Gender and the Media also raises questions about cultural politics namely what forms of critique and intervention are effective at a moment when ironic quotation marks seem to protect much media content from criticism and when much media content from Sex and the City to revenge adverts can be labelled postfeminist This is a book that will be of particular interest to students and scholars in gender and media studies as well as those in sociology and cultural studies more generally

Reading Graphic Design History David Raizman, 2020-12-10 Reading Graphic Design History uses a series of key artifacts from the history of print culture in light of their specific historical contexts It encourages the reader to look carefully and critically at print advertising illustration posters magazine art

direction and typography often addressing issues of class race and gender David Raizman's innovative approach intentionally challenges the canon of graphic design history and various traditional understandings of graphic design He re-examines icons of graphic design in light of their local contexts avoiding generalisation to explore underlying attitudes about various social issues He encourages new ways of reading graphic design that take into account a broader context for graphic design activity rather than broad views that discourage the understanding of difference and the means by which graphic design communicates cultural values With a foreword by Steven Heller

Discourse as Cultural Struggle Shi-xu,2006-11-01 Discourse as Cultural Struggle challenges the cultural imbalance in current research traditions and argues for a culturalist perspective in facilitating better intercultural exchange amidst accelerated processes of globalization It is the first engagement with discourses in non mainstream cultures Covering a wide range of issues in public professional media and intercultural communication the twelve original essays here tackle culturally pressing issues by aligning viewpoints from various geopolitical contexts This is a thought provoking book for scholars and researchers of language and communication studies who seek innovative approaches in their fields of interest Here is a book that takes diversity seriously and lifts it to the level of an epistemic paradigm What we know is culturally constituted and discursively articulated this relativism is converted into an absolutism due to historical power relations and we find ourselves a curious situation in which anything that suggests diversity at fundamental levels of thought becomes a serious theoretical problem This book addresses this absurdity and in the context of globalization the exercise is to be welcomed Jan Blommaert University of London This volume opens up new and innovative perspectives for all interested in discourse analysis cross cultural communication and social change It links and relates approaches which originate more in the West with those stemming from the East Thus a challenging debate is finally made possible which ultimately could and should lead to more collaborative research and even more importantly to better and mutual understanding Ruth Wodak Lancaster University This fine volume enters the large field of Discourse Studies by insisting that cultural knowledge of discourses is essential and thus necessary for our understanding of how discourse shapes human communities and relations among them It is a rich collection of conceptual and case studies a fine addition to our literatures and worthy of our careful study Donal Carbaugh University of Massachusetts at Amherst

Cultural Economy Paul du Gay,Michael Pryke,2002-01-31 Phrases such as corporate culture market culture and the knowledge economy have

now become familiar clarion calls in the world of work They are calls that have echoed through organizations and markets Clearly something is happening to the ways markets and organizations are being represented and intervened in and this signals a need to reassess their very constitution In particular the once clean divide that placed the economy dealt with mainly by economists on one side and culture addressed chiefly by those in anthropology sociology and the other cultural sciences on the other can no longer hold This volume presents the work of an international group of academics from a range of disciplines including sociology media and cultural studies social anthropology and geography all of whom are involved not only in thinking culture into the economy but thinking culture and economy together

Shopping for Meaningful Lives

Bruce P. Rittenhouse, 2013-03-27 Consumerism is a problem It deforms individual character our sense of obligation to one another and our concern for future generations and the environment Even in the aftermath of the worst economic downturn in seventy years it remains a defining feature of Western cultures But beyond this assessment neither Christian theologians and ethicists nor secular economists and sociologists have understood what drives consumerism or what can be done to counteract it This is the problem that Bruce P Rittenhouse solves in Shopping for Meaningful Lives Dr Rittenhouse analyzes economic sociological and psychological evidence to prove that consumers behave differently than the current theories predict Dr Rittenhouse shows that consumerism functions as a religion It provides a means of assurance that an individual life is meaningful Because we need this assurance to live out our everyday lives consumerism takes precedence over whatever other values a person professes unless a person can adopt a different way to secure the meaning of his or her life This interpretation explains how consumers actually behave From the perspective of Christian theology consumerism is a wrong answer to a problem of human existence that should be answered by faith in Christ
