Social Change In Contemporary Hb:

Social Change in Modern France Henri Mendras, Alistair Cole, 1991-03-14 Social Change in Modern France is a concise and lucid account of the profound transformations that have reshaped French society over the past thirty years. The authors show how the characteristic institutions of the Third Republic have been weakened, destroyed or severely altered in the face of a late and rapid industrialization. The church, the army, the trade unions, the schools, even the French communist party, all have lost their capacity to excite major conflict and tension and in their stead a series of local institutions, voluntary associations and family ties have arisen serving as the basic network for social relations and social life. Traditional French *joie de vivre* has assumed new forms and the authors maintain a very sturdy and cohesive society has arisen based on widespread consensus.

Women in Contemporary Russia Vitalina Koval, 1995 The position of Russia has always been difficult. In spite of the Revolution in 1917, the legal, economic, social and political inequalities between men and women have remained severe. For more than seventy years the official propaganda of the Soviet system deliberately concealed from the public in the West as well as the East the actual position of women, presenting it in rose-colored hues and proclaiming that under socialism the issue of the position of women in society had been resolved once and for all. However, the opposite was true: women increasingly suffered from overt and covert discrimination. In fact, the discrepancy between the official and actual positioning of working women became so acute that it led to serious social problems. The democratic reforms of the mid-1980s brought some positive changes at last; for the first time the women's issue was recognized as an urgent socio-political problem requiring serious investigation and practical measures. The authors of this collection of original essays, most of whom are social scientists at the Moscow Academy of Science, examine those aspects of life of women in Russia today which are most pressing, not least those arising from the multi-ethnic composition of the Russian Federation that comprises more than one hundred different nationalities and in which women constitute fifty-three per cent of the population.

Law and Religion in Indonesia Melissa Crouch, 2013-11-12 Understanding and managing inter-religious relations, particularly between Muslims and Christians, presents a challenge for states around the world. This book investigates legal

disputes between religious communities in the world's largest majority Muslim democratic country Indonesia. It considers how the interaction between state and religion has influenced relations between religious communities in the transition to democracy. The book presents original case studies based on empirical field research of court disputes in West Java, a majority Muslim province with a history of radical Islam. These include criminal court cases as well as cases of judicial review relating to disputes concerning religious education, permits for religious buildings, and the crime of blasphemy. The book argues that the democratic law reform process has been influenced by radical Islamists because of the politicization of religion under democracy and the persistence of fears of Christianization. It finds that disputes have been localized through the decentralization of power and exacerbated by the central government's ambivalent attitude towards radical Islamists who disregard the rule of law. Examining the challenge facing governments to accommodate minorities and manage religious pluralism, the book furthers understanding of state-religion relations in the Muslim world. This accessible and engaging book is of interest to students and scholars of law and society in Southeast Asia, as well as Islam and the state and the legal regulation of religious diversity.

Popular Culture and Critical Pedagogy Toby Daspit, John A. Weaver, 2012-09-10

This collection attempts to incorporate cultural studies into the understanding of schooling, not simply addressing how students read themselves as members of a distinct culture, but how they, along with teachers and administrators, read popular texts in general. The purpose of this book is to suggest some alternative directions critical pedagogy can take in its critique of popular culture by inviting multiple readings of popular texts into its analysis of schooling and seeing many forms of popular culture as critical pedagogical texts.

Conservation of Contemporary Art Renée van de Vall, Vivian van Saaze, 2023-12-30 This open access book investigates whether and how theoretical findings and insights in contemporary art conservation can be translated into the daily work practices of conservators or vice versa whether and how the problems and dilemmas encountered in conservation practice can inform broader research questions and projects For several decades now the conservation of contemporary art has been a dynamic field of research and reflection Because of contemporary art s variable constitution its care and management calls for a fundamental rethinking of the overall research landscape of museums heritage institutions private sector organizations and universities At first this research was primarily pursued by conservation professionals working in or with museums and other heritage organizations but increasingly academic researchers and universities became involved for instance through collaborative projects This book is the result of such collaboration It sets out to bridge the gap between theory and practice by investigating
