## **Social Construction Of Technological Systems:**

**The Social Construction of Technological Systems** Wiebe E. Bijker, Thomas Parke Hughes, Trevor J. Pinch, Trevor Pinch, 1989 The impact of technology on society is clear and unmistakeable The influence of society on technology is more subtle The 13 essays in this book have been written by a diverse group of scholars united by a common interest in creating a new field the sociology of technology They draw on a wide array of case studies from cooking stoves to missile systems from 15th century Portugal to today s AI labs to outline an original research program based on a synthesis of ideas from the social studies of science and the history of technology Together they affirm the need for a study of technology that gives equal weight to technical social economic and political questions Back cover *The social construction of technological systems*

the integration of empirics and theory The approaches in this volume collectively called SCOT after the volume s title have since broadened their scope and twenty five years after the publication of this book it is difficult to think of a technology that has not been studied from a SCOT perspective and impossible to think of a technology that cannot be studied that way

**Enterprise Information Systems VI** Isabel Seruca, José Cordeiro, Slimane Hammoudi, Joaquim Filipe, 2006-07-08 This book contains the best papers of the Sixth International Conference on Enterprise Information Systems ICEIS 2004 held in Porto Portugal and organized by INSTICC Institute for Systems and Technologies of Information Communication and Control in collaboration with PORTUCALENSE UNIVERSITY who hosted the event Following the route started in 1999 ICEIS has become a major point of contact between research scientists engineers and practitioners on the area of business applications of information systems This conference has received an increased interest every year from especially from the international academic community and it is now one of the world largest conferences in its area This year five simultaneous tracks were held covering different aspects related to enterprise computing including Databases and Information Systems Integration Artificial Intelligence and Decision Support Systems Information Systems Analysis and Specification Software Agents and Internet Computing and Human Computer Interaction The sections of this book reflect the conference tracks *Changing Large Technical Systems* Jane Summerton, 2021-12-13 This international anthology presents case studies of historical and contemporary transformations of large technical systems such as railways telecommunications electricity and automobiles The authors working at the forefront of historical and social science research on the dynamics of large technical systems analyze how and why these systems undergo change Because of their important roles in contemporary society large technical systems such as railways airlines road systems telecommunications and electric power network share drawing considerable academic and political interest In this collaborative study on processes of change in large technical systems the contributing authors present historical and current case studies of transformation within these systems Working at the forefront of historical and social science research on the dynamics of large technical systems the authors specifically analyze how and why the systems undergo change In some cases new technologies are solving old problems and presenting opportunities for system growth In other areas new regulatory approaches have brought competition and deregulation often posing challenges to system builders The authors also show how the breakup of national boundaries and new corporate strategies for global management of technology are transforming systems in ways that will have significant impacts on all consumers *Social Science, Technical Systems, and Cooperative Work* Geoffrey Bowker, Susan Leigh Star, Les Gasser, William Turner, 2014-05-12 This book is the first to directly address the question of how to bridge what has been termed the great divide between the approaches of systems developers and those of social scientists to computer supported cooperative work a question that has been vigorously debated in the systems development literature Traditionally developers have been trained in formal methods and oriented to engineering and formal theoretical problems many social scientists in the CSCW field come from humanistic

traditions in which results are reported in a narrative mode In spite of their differences in style the two groups have been cooperating more and more in the last decade as the people problems associated with computing become increasingly evident to everyone The authors have been encouraged to examine rigorously and in depth the theoretical basis of CSCW With contributions from field leaders in the United Kingdom France Scandinavia Mexico and the United States this volume offers an exciting overview of the cutting edge of research and theory It constitutes a solid foundation for the rapidly coalescing field of social informatics Divided into three parts this volume covers social theory design theory and the sociotechnical system with respect to CSCW The first set of chapters looks at ways of rethinking basic social categories with the development of distributed collaborative computing technology concepts of the group technology information user and text The next section concentrates more on the lessons that can be learned at the design stage given that one wants to build a CSCW system incorporating these insights what kind of work does one need to do and how is understanding of design affected The final part looks at the integration of social and technical in the operation of working sociotechnical systems Collectively the contributors make the argument that the social and technical are irremediably linked in practice and so the great divide not only should be a thing of the past it should never have existed in the first place

**The Governance of Socio-Technical Systems** Susana Borrás, Jakob Edler, 2014-11-28 Why are so few electric cars in our streets today Why is it difficult to introduce electronic patient records in our hospitals To answer these questions we need to understand how state and non state actors interact with the purpose of transforming so

Social Responses to Large Technical Systems Todd R. La Porte, 2012-12-06 This volume stems from the efforts of scholars who seek to understand the social dynamics of large technical systems The purpose is to develop concepts and empirical knowledge concerning the dynamics of such systems with particular emphasis on the processes of control and or management in a variety of national settings and to improve the basis of public policy so that future developments might be less distressing in consequence and more shaped to the desires of their host societies One vehicle for this enterprise is a series of international conferences on the Evolution and Dynamics of Large Technical Systems LTSs This series was instituted to encourage the coalescence of the multidisciplinary group of scholars who are actively engaging in the empirical study of these phenomena Their disciplines span history sociology political science and economics studies They come Australia France the Netherlands Norway Sweden the United Kingdom the United States and West Germany And they possess strong backgrounds in the empirical study of specific technical areas and a taste for conceptual and theoretical integration

**Conceptualizing Technological Change** Govindan Parayil, 2002 Technological change has been rightfully identified as the single most important factor for improving material well being Yet despite its centrality in our lives we seem to know very little about technology and how it develops and changes both spatially and temporally In this original and thoughtful book Govindan Parayil draws together current scholarship from disciplines ranging from history to economics to sociology as he develops a cohesive theory of technological change Drawing on a

detailed case study of the Green Revolution in Indian agriculture Parayil convincingly argues that technological change is contingent upon the social historical process of knowledge change Thus he explores the policy implications of analyzing technological change as a problem solving activity An innovative contribution to the literature on technological change this ambitious book will also be valuable for those interested in such practical applications as understanding the process of technology transfer

**The New Engineer** Sharon Beder,1998

**The Social Psychology of Science** William R. Shadish,Steve Fuller,1994-01-01 The social psychology of science is a compelling new area of study whose shape is still emerging This erudite and innovative book outlines a theoretical and methodological agenda for this new field and bridges the gap between the individually focused aspects of psychology and the sociological elements of science studies Presenting a side of social psychology that until now has received almost no attention in the social sciences literature this volume offers the first detailed and comprehensive study of the social psychology of science complete with a large number of empirical and theoretical examples The volume s introductory section provides a detailed analysis of how modern social psychology might apply to the study of science Chapters show how to analyze science in terms of social cognition attribution theory attitudes and attitude change social motivation social influence and social conformity and intergroup relations weaving extensive illustrations from the science studies literature into the theoretical analysis The nature and role of experimentation are discussed as are metaanalytic methods for summarizing the results of multiple studies Ways to facilitate the generalization of causal inferences from experimental work are also examined The book focuses on such topics as interactions among small groups of scientists and the impact of social motivation influence and conformity on scientific work Also covered are scientists responses to ethical issues in research differences in cognitive style distribution creativity in research and development and the sociologists s view of the social psychology of science and technology In addition the book provides two annotated bibliographies one on the philosophy of science and the other on social psychology to guide readers in both disciplines to salient recent works Valuable to the entire science studies community this text will be of special interest to philosophers sociologists psychologists and historians of science interested in the nature of knowledge development in science Because of its novel application of social psychological theories and methods this book will be useful as a primary text or a secondary text in courses on science studies in psychology sociology or philosophy departments
