objective What is the relationship between art and writing Doesn't description always miss the particularity of the artwork This is the first book length study to show how ideas in philosophy can be applied to artistic research to answer its questions and to make proposals for its future Clive Cazeaux argues that artistic research is an exciting development in the historical debate between aesthetics and the theory of knowledge The book draws upon Kant phenomenology and critical theory to show how the immediacies of art and experience are enmeshed in the structures that create knowledge The power of art to act on these structures is illustrated through a series of studies that look closely at a number of contemporary artworks This book will be ideal for postgraduate students and scholars of the visual and creative arts aesthetics and art theory The Open Access version of this book available at www.taylorandfrancis.com has been made available under a Creative Commons Attribution NonCommercial No Derivatives 4.0 license <https://www.taylorfrancis.com/books/9781315764610> *Arab-Islamic Education Systems in the Experience of Migrants and Refugees in Europe* Sara Mazzei, 2025-03-15 In the last decade Europe has welcomed numerous migrants and refugees from Arab countries Their scholastic inclusion has been challenging and the teaching staff had to sometimes deal with unfamiliar realities The issue has been addressed by various perspectives from sociology to psychology insights from which are gathered in intercultural education In it there are scarcity of studies that delve into pupils cultural backgrounds and countries of origin's history is seldom regarded as a decisive factor in the formation of identity Among Arabic speaking communities the Moroccan and Syrian ones are the most significant and Morocco and Syria have interesting histories and education systems Using Nussbaum's 2010 multifactorial analysis this research aims to better understand the educational universe where Arabic speaking pupils come from focusing on humanities and religious education in the experience of pupils especially from Morocco and Syria Methodology comprehends qualitative empirical research conducted in Europe Results show the differences experienced by pupils in their educational paths among diverse Arab and European countries and the more sensitive topics they encounter in their education in Europe in relation to their identity Philosophy Course Nitin Kanani, 2019-12-23 What is Philosophy Quite literally the term philosophy means love of wisdom In a broad sense philosophy is an activity people undertake when they seek to understand fundamental truths about themselves the world in which they live and their relationships to the world and to each other As an academic discipline philosophy is much the same Those who study philosophy are perpetually engaged in asking answering and arguing for their answers to life's most basic questions To make such a pursuit more systematic academic philosophy is traditionally divided into major areas of study Metaphysics At its core the study of metaphysics is the study of the nature of reality of what exists in the world what it is like and how it is ordered In metaphysics philosophers wrestle with such questions as Is there a God What is truth What is a person What makes a person the same through time Is the world strictly composed of matter Do people have minds If so how is the mind related to the body Do people have free wills What is it for one event to cause another Epistemology Epistemology is the study of knowledge It is primarily concerned with what we can

know about the world and how we can know it Typical questions of concern in epistemology are What is knowledge Do we know anything at all How do we know what we know Can we be justified in claiming to know certain things Ethics The study of ethics often concerns what we ought to do and what it would be best to do In struggling with this issue larger questions about what is good and right arise So the ethicist attempts to answer such questions as What is good What makes actions or people good What is right What makes actions right Is morality objective or subjective How should I treat others Logic Another important aspect of the study of philosophy is the arguments or reasons given for people's answers to these questions To this end philosophers employ logic to study the nature and structure of arguments Logicians ask such questions as What constitutes good or bad reasoning How do we determine whether a given piece of reasoning is good or bad History of Philosophy The study of philosophy involves not only forming one's own answers to such questions but also seeking to understand the way in which people have answered such questions in the past So a significant part of philosophy is its history a history of answers and arguments about these very questions In studying the history of philosophy one explores the ideas of such historical figures as Plato Locke Marx Aristotle Hume Mill Aquinas Kant Wittgenstein Descartes Nietzsche Sartre What often motivates the study of philosophy is not merely the answers or arguments themselves but whether or not the arguments are good and the answers are true Moreover many of the questions and issues in the various areas of philosophy overlap and in some cases even converge Thus philosophical questions arise in almost every discipline This is why philosophy also encompasses such areas as Philosophy of Law Philosophy of Feminism Philosophy of Religion Philosophy of Science Philosophy of Mind Philosophy of Literature Political Philosophy Philosophy of the Arts Philosophy of History Philosophy of Language The short answer Philosophy is a way of thinking about certain subjects such as ethics thought existence time meaning and value That way of thinking involves 4 Rs responsiveness reflection reason and re evaluation The aim is to deepen understanding The hope is that by doing philosophy we learn to think better to act more wisely and thereby help to improve the quality of all our lives Its imperative that you read more in this book **A Practical Guide to Qualitative**
