The Concept Of Time:

The Concept of Time Martin Heidegger, 2011-05-12 The Concept of Time presents Heidegger's so called Dilthey review widely considered the first draft of his celebrated masterpiece Being and Time Here Heidegger reveals his deep commitment to Wilhelm Dilthey and Count Yorck von Wartenburg He agrees with them that historicity must be at the centre of the new philosophy to come However he also argues for an ontological approach to history From this ontological turn he develops the so called categories of Dasein This work demonstrates Heidegger's indebtedness to Yorck and Dilthey and gives further evidence to the view that thought about history is the germ cell of Being and Time However it also shows that Heidegger's commitment to Dilthey was not without reservations and that his analysis of Dasein actually employs Husserl's phenomenology The work reopens the question of history in a broader sense as Heidegger struggles to thematize history without aligning it with world historical events The text also provides a concise and readable summary of the main themes of Being and Time and as such is an ideal companion to that text **The Concept of Time in Early Twentieth-Century**

Martin Heidegger, 2009-01-13 Heidegger's lecture course at the University of Marburg in the summer of 1925 an early

version of *Being and Time* 1927 offers a unique glimpse into the motivations that prompted the writing of this great philosopher's master work and the presuppositions that gave shape to it. The book embarks upon a provisional description of what Heidegger calls *Dasein*, the field in which both being and time become manifest. Heidegger analyzes *Dasein* in its everydayness in a deepening sequence of terms: being in the world, worldhood, and care as the being of *Dasein*. The course ends by sketching the themes of death and conscience and their relevance to an ontology that makes the phenomenon of time central. Theodore Kisiel's outstanding translation permits English-speaking readers to appreciate the central importance of this text in the development of Heidegger's thought.

THOUGHTS ON THE CONCEPT OF TIME AHMET

TOPRAK, 2022-04-20 About time, energy, temporal potential, power, energy, mathematics of time travel.

The Concept of Time in the Study of History Martin Heidegger, 2024-05-09 A modern translation of Heidegger's early work *The Concept of Time in the Study of History* (original German title: *Der Zeitbegriff in der Geschichtswissenschaft*, originally published in 1916). This edition contains a new afterword by the Translator, a timeline of Heidegger's life and works, a philosophic index of core Heideggerian concepts, and a guide for terminology across 19th and 20th-century Existentialists. This translation is designed for readability and accessibility to Heidegger's enigmatic and dense philosophy. Complex and specific philosophic terms are translated as literally as possible, and academic footnotes have been removed to ensure easy reading.

Composed during Heidegger's habilitation phase at the University of Freiburg (1915-1916), this early text interrogates how historians conceptualize time, a topic shaped by his mentors Heinrich Rickert and Emil Lask, who sought to reconcile historical methodology with Neo-Kantian epistemology. Heidegger critiques historiographical objectivism, the tendency to treat time as a linear sequence of now-points stripped of lived experience. For the young Heidegger, influenced by Dilthey's hermeneutics and Husserl's nascent phenomenology, historical time cannot be reduced to chronology; it must account for the meaning-structures that emerge from human agency and cultural context. The work's framework remains indebted to Rickert's distinction between natural sciences (generalizing) and historical sciences (individualizing), but Heidegger strains against these limits, hinting at his later existential notion of temporality. Here, time is not yet the ecstatic horizon of *Being and Time* (1927) but a vital temporal flow (*Lebensstrom*) that historical study must interpret hermeneutically. Heidegger argues that historicity (*Geschichtlichkeit*) arises from the interplay of past, present, and future within human projects, a proto-phenomenological move rejecting positivist timelines. Yet his language remains tethered to Neo-Kantian terminology, framing history as a science of meaning rather than a disclosure of *Dasein*'s finite existence. The text's significance lies in its negative space: its failure to fully break from Rickert's formalism exposes the need for Heidegger's later ontological turn. By 1927, this early, vital flow becomes *Dasein*'s care-driven temporality, but in 1916, the tools to dynamite historicism's foundations are still being forged in the shadow of Freiburg's academic orthodoxies.
