The Consortium:

The Consortia Century Stakeholder Alignment Collaborative, 2025 The Consortia Century presents a bold prediction about consortia becoming the defining institutional arrangement of the 21st century. It notes that the prediction holds despite the spanning diverse stakeholders. While consortia are not new concepts for the field, they will have a growing importance in addressing societal challenges that exceed the capacity of any single organization. The Consortia Century also provides an overview of case examples of consortia challenges before discussing the model for achieving sufficient stakeholder alignment for collective action through consortia. Sufficient stakeholder alignment allows interdependent individuals, groups, and organizations to accomplish together what they cannot do separately.

The focus is in particular on projects involving groups of enterprises with a high level of productive interdependence and steady relations that allow sharing of resources and activities. The book is organized into two parts: the first of which discusses the value of the territory for firm competitiveness, examines the importance of social capital in creating sustainable business behaviors and unique networks, and describes principles and tools for the implementation and management of sustainability strategies in networks or clusters. The second part then presents the methodology and outcomes of empirical research conducted on industrial districts and productive centres in Campania, southern Italy, which are representative of Italian productive chains. The book will be of value to all management scholars with an interest in this field, as well as to readers wishing to learn more of the role of local institutions.
