A Review of the Dose Reconstruction Program of the Defense Threat Reduction Agency National Research Council, Division on Earth and Life Studies, Board on Radiation Effects Research, Committee to Review the Dose Reconstruction Program of the Defense Threat Reduction Agency, 2003-08-21 From 1945 through 1962 the US atmospheric nuclear weapons testing program involved hundreds of thousands of military and civilian personnel and some of them were exposed to ionizing radiation Veterans groups have since been concerned that their members health was affected by radiation exposure associated with participation in nuclear tests and have pressured Congress for disability compensation Several pieces of legislation have been passed to compensate both military and civilian personnel for such health effects Veterans concerns about the accuracy of reconstructed doses prompted Congress to have the General Accounting Office GAO review the dose reconstruction program used to estimate exposure The GAO study concluded that dose reconstruction is a valid method of estimating radiation dose and could be used as the basis of compensation It also recommended an independent review of the dose reconstruction program The result of that recommendation was a congressional mandate that the Defense Threat Reduction Agency DTRA a part of the Department of Defense ask the National Research Council to conduct an independent review of the dose reconstruction program In response to that request the National Research Council established the Committee to Review the Dose Reconstruction Program of the Defense Threat Reduction Agency in the Board on Radiation Effects Research BRER The committee randomly selected sample records of doses that had been reconstructed by DTRA and carefully evaluated them The committee s report describes its findings and provides responses to many of the questions that have been raised by the veterans [The ICRP Database of Dose Coefficients: Workers and Members of the Public](#) ICRP Publishing, International Commission on Radiological Protection, 1999-01-01 CD ROM Over the last four years ICRP has developed a number of reports giving ingestion and inhalation dose coefficients for members of the public A summary report locate isbn 0080427375 ICRP Publication 72 was issued giving a compilation of effective dose coefficients for intakes by inhalation and ingestion for nearly 800 radionuclides of 91 elements Earlier in 1994 a similarly wide ranging set of dose coefficients for workers based on the same biokinetic models had been issued in locate isbn 0080426514 ICRP Publication 68 Both of these Publications give only committed effective doses and in the case of inhalation cover only 1 m AMAD aerosols for the public and 1 and 5 m AMAD aerosols for workers A CD ROM is now available which gives inhalation dose coefficients for ten aerosol sizes 0 001 0 003 0 01 0 03 0 1 0 3 1 **Toxicological profile for iodine** ,2004 **Toxicological Profile for Plutonium** ,2010 [Geologic Repository for the Disposal of Spent Nuclear Fuel and High-level Radioactive Waste at Yucca Mountain, Nye County -- Nevada Rail Transportation Corridor; and Rail Alignment for the Construction and Operation of a Railroad in Nevada to a Geologic Repository at Yucca Mountain, Nye County](#) ,2008

Radioactive Releases in the Environment John R. Cooper, Keith Randle, Ranjeet S. Sokhi, 2003-05-07 This text brings

together in one single comprehensive reference the fundamentals of radioactivity It uniquely fills the gap in the market as no other books deal with environmental radioactivity to this degree Timely and invaluable as the studies of environmental processes and the awareness of the impact of human activity on our environment are increasing Links all three main aspects of environmental radioactivity Principles Transport and Measurement Useful to a wide readership students lecturers researchers companies and environmental consultants

Ionizing and Non-ionizing Radiation Adelaja Osibote, 2020-01-15 This book provides readers with comprehensive details on the management and measures to protect health against risks to people and environments generated by the use of ionizing and non ionizing radiation This book is divided into three sections namely Radiation Protection and Measurement Radiation Therapy and Radioactivity The first section covers ionizing radiation protection population exposure to non ionizing density and the system of dosimetry quantities for use in emergency preparedness and response to nuclear or radiological accidents The second section covers various planning techniques for spinal stereotactic body radiotherapy and the application of radiation technology in the development of a malaria vaccine The third section discusses environmental radioactivity monitoring using efficient measurements and the assessment of radiation exposure to humans Also in this section is the evaluation of the effects of chronic radiation exposure on the testes of mice after a nuclear power plant accident

Toxicological Profile for Tungsten , 2005 **Toxicological Profile for Tin and Tin Compounds** , 2005 **Radiation Monitoring and Dose Estimation of the Fukushima Nuclear Accident** Sentaro Takahashi, 2014-02-07 This book provides comprehensive research findings related to the environmental monitoring of radiation levels of radioactive nuclides in various environments and dose estimation in residents after the Fukushima nuclear power plant accident caused severe environmental contamination with radioactive nuclides At the beginning of the book a technical review written by a leading researcher of nuclear reactor technology explains what happened at the power plant The review is followed by a commentary from a former member of the International Commission on Radiological Protection providing the reader with easily understandable information about the concept of radiation dosage In the main part of the book a series of scientific reports presents valuable data on the radiation surveys of the environment environmental radioactivity transfer models and parameters of radioactive nuclides and dose assessment among residents These reports present a wide range of findings from the research carried out in a variety of activities by large governmental organizations as well as by small private groups and individuals The reader thus will find a large collection of valuable and interesting data related to the environmental contamination by radioactive nuclides after the Fukushima accident Although earlier reports on this issue have been made public this book is the only

 Cycle,2009-01-26 The so called nuclear renaissance has increased worldwide interest in nuclear power This potential growth
 also has increased in some quarters concern that nonproliferation considerations are not being given sufficient attention In
 particular since introduction of many new power reactors will lead to requiring increased uranium enrichment services to
 provide the reactor fuel the proliferation risk of adding enrichment facilities in countries that do not have them now led to
 proposals to provide the needed fuel without requiring indigenous enrichment facilities Similar concerns exist for

reprocessing facilities Internationalization of the Nuclear Fuel Cycle summarizes key issues and analyses of the topic offers some criteria for evaluating options and makes findings and recommendations to help the United States the Russian Federation and the international community reduce proliferation and other risks as nuclear power is used more widely This book is intended for all those who are concerned about the need for assuring fuel for new reactors and at the same time limiting the spread of nuclear weapons This audience includes the United States and Russia other nations that currently supply nuclear material and technology many other countries contemplating starting or growing nuclear power programs and the international organizations that support the safe secure functioning of the international nuclear fuel cycle most prominently the International Atomic Energy Agency Nuclear Engineering Handbook Kenneth D. Kok,2016-10-03 Building upon the success of the first edition the Nuclear Engineering Handbook Second Edition provides a comprehensive up to date overview of nuclear power engineering Consisting of chapters written by leading experts this volume spans a wide range of topics in the areas of nuclear power reactor design and operation nuclear fuel cycles and radiation detection Plant safety issues are addressed and the economics of nuclear power generation in the 21st century are presented The Second Edition also includes full coverage of Generation IV reactor designs and new information on MRS technologies small modular reactors and fast reactors **Nuclear Physical Methods in Radioecological Investigations of Nuclear Test Sites** Siegfried S. Hecker,Caroline F.V. Mason,Kairat K. Kadyrzhanov,Serge B. Kislitsin,2012-12-06 It is only with the ending of the Cold War that the issue of environmental hazards at many former nuclear testing sites around the world has attracted international scientific interest This book discusses the environmental ecological and health problems associated with nuclear testing Topics treated include dose assessment risk speciation and transport of radionuclides measurement and separation of radionuclides and remedial options The nuclear test sites examined include the Semipalatinsk Nuclear Test Site Kazakhstan the Nevada test Site USA the Pacific atolls and the Maralinga Test Site Australia The volume also discusses the additional release sites of Chelyabinsk Russia Chernobyl Ukraine Palomares Spain Los Alamos USA and others A valuable compendium of radiological problems for a wide spectrum of readers from non specialist to expert *Current Trends in Radiation Protection* Henri Métivier,2004 No detailed description available for Current trends in radiation protection
