Achieving Inclusive Education in the Caribbean and Beyond Stacey N. J. Blackman,Dennis A. Conrad,Launcelot I. Brown,2019-05-28 This book offers an international perspective of philosophical conceptual and praxis oriented issues that impinge on achieving education for all students It sheds light on the historical systemic structural organizational and

attitudinal barriers that continue to be antithetical to the philosophy and practice of inclusive education within the Caribbean. The first section of the book examines how globalized views of inclusion informed by philosophical ideas from the North have influenced and continue to influence the equity in education agenda in the region. The second section considers how exclusion and marginalization still occur across selected Caribbean islands. It provides both quantitative and qualitative data about the nature and experience of exclusion in selected Caribbean islands, the UK and USA. The third section tackles the practical realities of transforming education systems in the Caribbean for inclusion. In particular, it identifies teacher practices as the mainsite of interrogation that needs to be tackled if inclusion is to be successful. The fourth and final section examines the contribution of principals and exemplars to the development and advocacy for inclusive education. It discusses how educational leadership is understood as well as the role of school principals in making inclusion a reality in schools, the challenges experienced and the qualities of education leaders.

Inclusive Mathematics Education David Kolloosche, Renato Marcone, Michel Knigge, Miriam Godoy Penteado, Ole Skovsmose, 2019-03-25. Originated from a research cooperation between two countries where inclusive education in mathematics has been a major challenge, this volume seeks to make recent research findings available to the international community of mathematics teachers and researchers. In the book, the authors cover a wide variety of special needs that learners of mathematics may have in inclusive settings. They present theoretical frameworks and methodological approaches for research and practice.

Curriculum and the Teacher Nigel Norris, 2014-06-03. Even though the curriculum can be tightly specified and controlled by strong accountability mechanisms, it is teachers who decisively shape the educational experiences of children and young people at school. Bringing together seminal papers from the Cambridge Journal of Education around the theme of curriculum and the teacher, this book explores the changing conceptions of curriculum and teaching and the changing role of the teacher in curriculum development and delivery. The book is organised around three major themes. Taking its lead from Lawrence Stenhouse, Part One looks at defining the curriculum problem from a variety of perspectives and includes papers from some of the most influential curriculum theorists over the last thirty years. Part Two explores the framing of new orders of educational experience. It has papers from leading educational thinkers who have contributed to debates about how to make education more inclusive, humane, liberating, creative and educational. Part Three is focused on teachers and teaching. It offers a selection of papers from significant scholars in the field reflecting on the experience of teaching and how it is personally as well as socially constructed and theorised. The papers are drawn from important and eventful periods of educational history, spanning the curriculum reform movement of the 1960s and 1970s to the present age of surveillance, accountability and control. A specially written Introduction contextualises the papers. Part of the Routledge Education Heritage series, Curriculum and the Teacher presents landmark texts from the Cambridge Journal of Education, offering a wealth of material for students and researchers.
