Moor, 2012-12-06 In 1950 Alan Turing 1912 1954 published his famous article Computing Machinery and Intelligence in the journal Mind This article is arguably the most influential and widely read article in the philosophy of artificial intelligence Indeed most of the debate in the philosophy of artificial intelligence over the last fifty years concerns issues that were raised and discussed by Turing Turing's genius was not only in developing the theory of computability but also in understanding the impact both practical and philosophical that computing machinery would have Turing believed that computers if properly designed and educated could exhibit intelligent behavior even behavior that would be indistinguishable from human intelligent behavior His vision of the possibility of machine intelligence has been highly inspiring and extremely controversial In this classic article Turing presented his well known imitation game and predicted that about the year 2000 an average interrogator will not have more than 70 per cent chance of making the right identification after five minutes of questioning in the imitation game Based on the results of the Loebner 2000 contest and the accomplishments in the field of AI as impressive as they are Turing's prediction remains unfulfilled *Teenage Audiences and British Period Drama* Shelley Anne Galpin, 2024-07-25 This book provides an engaging insight into the responses of teenage audiences to British period drama presenting original data collected from young people across England Situated in relation to debates regarding the heritage film and young people's consumption of the media Teenage Audiences and British Period Drama challenges the often homogenous characterisation of teenagers by demonstrating the range of responses this genre inspires in young viewers Arguing for the period drama's underestimated relevance to younger audiences the book details the varied ways that young people use film and television drama to make sense of the world and their place in it and highlights the under researched significance of collective viewing in influencing viewer response Analysis demonstrates the key role that values play in influencing judgements amongst youth audiences the importance of perceived historical accuracy and the potential for screen texts to inspire a deeper relationship with the past **Industrial Design Engineering** John X. spectrum of scholars in the field that directly address the issue of the Turing Test as a test for intelligence Contributors John R Searle Ned Block Daniel C Dennett and Noam Chomsky in a previously unpublished paper Each chapter is introduced by background material that can also be read as a self contained essay on the Turing Test The Plural Psyche Andrew Samuels,2003-09-02 Samuels proposes the case for pluralism in approaching key issues in depth psychology **Baby Hearts** Susan Goodwyn, Ph.D.,Linda Acredolo, Ph.D.,2007-12-18 Who says your baby can t talk about his or her feelings In fact babies actions often speak louder than words Understanding those actions and responding appropriately to them is the key to giving your child a head start to a healthy and happy future Now the authors of the bestselling Baby Minds and Baby Signs translate the latest research on the rich inner life of babies into practical fun activities that will foster your child s emotional skills during the most critical period between birth and age three This comprehensive guide will help you help your child express emotions effectively develop empathy form healthy friendships and cope with specific challenges Learn how to Talk with your child about emotions in order to help him recognize and control his own Use face to face interaction tone of voice song and touch to make your infant feel safe and secure Start a gratitude journal to help your child appreciate the good things in life Nurture self esteem with try try again activities and simple chores Create a What are they feeling deck of cards to help your child understand and practice emotions Use games and songs to help your child practice self control Overcome temper tantrums aggression shyness separation anxiety and other challenges Whether your child is as easy to raise as a sunflower as difficult as the prickly holly bush requires the patience of the delicate orchid or is as active as the exuberant dandelion Baby Hearts helps you provide the emotional support that may be the most important gift a parent can give
