

# INDUSTRIAL REVOLUTION

The industrial revolution was a period of significant changes that happened in the 18th and 19th centuries.

It was a time when people started using machines to do work, rather than doing everything by hand. This made things faster, cheaper, and more efficient, leading to significant advancements in technology, manufacturing, and transportation.

The industrial revolution had a significant impact on how people lived and worked, transforming society and laying the foundations for the modern world.
