My Henkelinda Nancy Philippi, 2014-07-29 A serendipitous meeting with a young woman in a United Nations refugee camp results in a series of events that transforms the lives of all involved Who would have guessed it could have started on a New

Hampshire road late at night Who would have guessed that a seventeen year old girl could lead her family across six international borders to escape the devastation of war Who would have guessed that another family whose lives were equally shattered by the same war would find a new and rich life in a small town in the United States Who would have guessed that an ordinary woman well past a certain age along with lots of her friends would have played a major role in making it all happen Nothing went right nothing happened easily but it happened This is how *A Case of Mice and Murder* Sally Smith,2025-06-17 The first in a delightful new mystery series set in the hidden heart of London s legal world introducing a wonderfully unwilling sleuth perfect for fans of Richard Osman and Nita Prose *How Religion Evolved* Brian McVeigh,2017-07-12 Why did many religious leaders Moses Old Testament prophets Zoroaster claim they heard divine voices Why do ancient civilizations exhibit key similarities e g the living dead treating the dead as if they were still alive speaking idols care and feeding of effigies monumental mortuary architecture and houses of gods pyramids ziggurats temples How do we explain strange behaviour such as spirit possession speaking in tongues channelling hypnosis and schizophrenic hallucinations Are these lingering vestiges of an older mentality Brian J McVeigh answers these riddles by updating bicameralism First proposed by the psychologist Julian Jaynes this theory postulates that an earlier mentality existed a human the brain s left hemisphere heard voices of gods or ancestors the brain s right hemisphere Therefore ancient religious texts reporting divine voices were recounting of audio visual hallucinations a method of social control when early populations expanded As growing political economic complexity destabilized god governed states in the late second millennium BCE divine voices became inadequate Eventually humans had to culturally acquire new cognitive skills modern religions to accommodate increasing social pressures selves replaced the gods and history witnessed an inward turn This psychological interiorization of spiritual experience laid the foundations for the world s great religions and philosophies that arose in India China Greece and the Middle East in the middle of the first millennium BCE **Western Zen** Raven Walker,2000-03 Western Zen undertakes the task of stripping away the religious trappings of Zen to reveal the practical theory of mind beneath While Western culture conditions the physical being in hundreds of constructive ways we are haphazard in our conditioning of the mental being We teach it to read write do numbers and know facts but otherwise leave mental life to wander as it pleases What is missing is a practical theory for conditioning the mind Zen s intuitive psychology fills this void It not only describes processes of inner conditioning that can make positive improvements in our conscious life it unites these results with the arts of performance creating more effective human behavior Remarkably this psychology in Zen is no foreign import Its reality is well explained by Western Psychology and is fully reflected throughout the course of American Intellectual Tradition Western Zen takes the hidden truth in Eastern Zen shines the light of Western Reason upon it and makes the deeper intuitive psychology universal The practical conditioning of the mind and the emotions to good effect is possible in terms completely consistent with Western science The end result is a mastery of your inner life and a finer quality
