## **The International Regulation Of Frontier Disputes:**

**The International Regulation of Frontier Disputes** Evan Luard, 1970 *Territorial Acquisition, Disputes and International Law* Surya P. Sharma, 2024-01-15 This book analyzes the traditional criteria of territorial acquisition and demonstrates their inadequacies in the modern context. It also addresses contemporary territorial doctrines and conflicts. It regards territorial acquisition as a comprehensive process involving various considerations leading to the establishment or transfer of exclusive control over territory. This approach has many advantages and adds to the development of the law of territorial acquisition. The author also provides an analysis of the claims and counter claims in major contemporary territorial disputes and suggests appropriate legal perspectives bearing upon decision making in regard to them. This book will be highly useful to students, academics and practitioners in the field of international law as well as all governments and institutions dealing with territorial matters.

The Oxford Handbook of the International Law of Global Security Robin Geiß, Nils Melzer, 2021-02-16 Understanding the global security environment and delivering the necessary governance responses is a central challenge of the 21st century. On a global scale the central regulatory tool for such responses is public international law. But what is the state role and relevance of public international law in today's complex and highly dynamic global security environment? Which concepts of security are anchored in international law? How is the global security environment shaping international law and how is international law in turn influencing other normative frameworks? The Oxford Handbook of the International Law of Global Security provides a ground breaking overview of the relationship between international law and global security. It constitutes a comprehensive and systematic mapping of the various sub fields of international law dealing with global security challenges and offers authoritative guidance on key trends and debates around the relationship between public international law and global security governance. This Handbook highlights the central role of public international law in an effective global security architecture and in doing so addresses some of the most pressing legal and policy challenges of our time. The Handbook features original contributions by leading scholars and practitioners from a wide range of professional and disciplinary backgrounds reflecting the fluidity of the concept of global security and the diversity of scholarship in this area.

Toward a New Framework for Peaceful Settlement of China's Territorial and Boundary Disputes Junwu Pan, 2009 As China becomes more integrated in global economic and political systems it has become inevitable that it engages fully and actively in the international legal system. Notably missing in China's international engagement is its participation in international institutions on third party settlement of disputes including territorial and boundary disputes. This work argues that contrary to conventional understanding much could be gained by China if it were to have a more positive attitude towards third party settlement of its territorial and boundary disputes. This volume examines both the problems and opportunities China is confronting within the changing international context and offers new frameworks for settlement of China's major territorial and boundary disputes.

**Nonproliferation Policy and Nuclear Posture** Neil Narang, Erik Gartzke, Matthew Kroenig, 2015-10-08 This volume examines the causes and consequences of nuclear postures and nonproliferation policies The real world importance of nuclear weapons has led to the production of a voluminous scholarly literature on the causes and consequences of nuclear weapons proliferation Missing from this literature however is a more nuanced analysis that moves beyond a binary treatment of nuclear weapons possession to an exploration of how different nuclear postures and nonproliferation policies may influence the proliferation of nuclear weapons and subsequent security outcomes This volume addresses this deficit by focusing on the causes and consequences of nuclear postures and nonproliferation policies It is the aim of this book to advance the development of a new empirical research agenda that brings

systematic research methods to bear on new dimensions of the nuclear weapons phenomenon Prior to the contributions in this volume there has been little evidence to suggest that nuclear postures and policies have a meaningful impact on the spread of nuclear weapons or security outcomes This book brings together a new generation of scholars advancing innovative theoretical positions and performing quantitative tests using original data on nuclear postures nonproliferation policies and WMD proliferation Together the chapters in this volume make novel theoretical empirical and methodological contributions to the field of nuclear weapons proliferation This book will be of much interest to students of nuclear proliferation international relations and security studies      International Law and Boundary Disputes in Africa Gbenga

Oduntan, 2015-06-26 Africa has experienced a number of territorial disputes over land and maritime boundaries due in part to its colonial and post colonial history This book explores the legal political and historical nature of disputes over territory in the African continent and critiques the content and application of contemporary International law to the resolution of African territorial and border disputes Drawing on central concepts of public international law such as sovereignty and jurisdiction and socio political concepts such as colonialism ethnicity nationality and self determination this book interrogates the intimate connection that peoples and nations have to territory and the severe disputes these may lead to Gbenga Oduntan identifies the major principles of law at play in relation to territorial and boundary disputes and argues that the predominant use of foreign based adjudicatory mechanisms in attempting to deal with African boundary disputes alienates those institutions and mechanisms from African people and can contribute to the recurrence of conflicts and disputes in and among African territories He suggests that the understanding and application of multidisciplinary dispute resolution mechanisms and strategies can allow for a more holistic and effective treatment of boundary disputes As an in depth study into the legal socio political and anthropological mechanisms involved in the understanding of territorial boundaries and a unique synthesis of an African jurisprudence of international boundaries law this book will be of great use and interest to students researchers and practitioners in African and Public International Law International Relations and decision makers in need of better understanding the settlement of disputes over territorial boundaries in both Africa and the wider world      *International*

*Frontiers and Boundaries* Victor Prescott, Gillian D. Triggs, 2008-07-31 International frontiers and boundaries separate land rivers and lakes subject to different sovereignties Frontiers are zones of varying widths and they were common many centuries ago By 1900 frontiers had almost disappeared and had been replaced by boundaries that are lines The divisive nature of frontiers and boundaries has formed the focus of inter disciplinary studies by economists geographers historians lawyers and political scientists Scholars from these disciplines have produced a rich literature dealing with frontiers and boundaries The authors surveyed this extensive literature and the introduction reveals the themes which have attracted most attention Following the introduction the book falls into three sections The first section deals systematically with frontiers boundary evolution and boundary disputes The second section considers aspects of international law related to boundaries It

includes chapters dealing with international law and territorial boundaries maps as evidence of international boundaries and river boundaries and international law The third section consists of seven regional chapters that examine the evolution of boundaries in the Americas the Middle East Africa Asia Europe islands off Southeast Asia and Antarctica **Peaceful Territorial Change** Arie Marcelo Kacowicz,1994 **The Theory and History of Ocean Boundary-making** Douglas M. Johnston,1988 In the classical and neo classical periods of international law the law of the sea was chiefly concerned with the need to facilitate the movement of ships In the post World War II period however coastal states began to make jurisdictional claims to extensive areas of the ocean requiring decisions on how ocean boundaries are to be established and maintained

**Law, Power, and the Sovereign State** Michael Ross Fowler,Julie Marie Bunck,2010-11-01 In the wake of the collapse of the Soviet bloc it is timely to ask what continuing role if any the concept of sovereignty can and should play in the emerging new world order The aim of Law Power and the Sovereign State is both to counter the argument that the end of the sovereign state is close at hand and to bring scholarship on sovereignty into the post Cold War era The study assesses sovereignty as status and as power and examines the issue of what precisely constitutes a sovereign state In determining how a political entity gains sovereignty the authors introduce the requirements of de facto independence and de jure independence and explore the ambiguities inherent in each They also examine the political process by which the international community formally confers sovereign status Fowler and Bunck trace the continuing tension of the chunk and basket theories of sovereignty through the history of international sovereignty disputes and conclude by considering the usefulness of sovereignty as a concept in the future study and conduct of international affairs They find that despite frequent predictions of its imminent demise the concept of sovereignty is alive and well as the twentieth century draws to a close

*New Frontiers in Asia-Pacific International Arbitration and Dispute Resolution* Shahla Ali,Bruno Jetin,Luke Nottage,Nobumichi Teramura,2020-12-10 International Arbitration Law Library Volume 59 The eastward shift in international dispute resolution has already involved initiatives not only to improve support for international commercial arbitration ICA and investor state dispute settlement ISDS but also to develop alternatives such as international commercial courts and mediation Focusing on these initiatives and their accompanying case law and trends in the Asia Pacific region this invaluable book challenges existing procedures and frameworks for cross border dispute resolution in both commercial and treaty arbitration Specially assembled for this project an outstanding team of experienced and insightful arbitrators and scholars describes pertinent developments including ICA and ISDS in the context of China s Belt and Road Initiative the Singapore Convention on Mediation the shift to virtual hearings and other challenges from the COVID 19 pandemic mistrust of the application of the rule of law in certain East Asian jurisdictions growing public concern over ISDS arbitration tensions between confidentiality and transparency and potential regional harmonisation of the public policy exception to arbitral enforcement The contributors chart evolving practices and high profile cases to make informed observations about where

changes are needed as well as educated guesses about the chances of reforms being successful and the consequences if they are not. The main jurisdictions covered are China, Hong Kong, Japan, Malaysia, India, Australia, and Singapore. The first in-depth study of recent trends in dispute resolution practice related to business in the Asia Pacific region, the book's practical analysis of new resources for dealing with the increasing competition among countries to become credible regional dispute resolution hubs will prove to be of great value to specialists in the international business law sector. Lawyers will be enabled to make informed decisions on which venue and dispute resolution methods are the most suitable for any specific dispute in the region, and policymakers will confidently assess emerging trends in international dispute resolution policy development and treaty making.

**Peaceful Resolution of Major International Disputes** Julie Dahlitz, 1999. This publication presents lessons from border dispute settlements, arms control, accommodation, commercial dispute settlements within the context of United Nations activities.

**Maritime Boundary Disputes, Settlement Processes, and the Law of the Sea** Seoung Yong Hong, Jon M. Van Dyke, 2009. A surprising number of maritime boundaries remain unresolved, and a range of reasons can be cited to explain why the process of delimiting these boundaries has been so slow. This volume addresses and analyzes some of these reasons, focusing on some of the volatile disputes in Northeast Asia and in North America. Scholars from Asia, the United States, and Europe grapple with festering controversies and apply insights gained from resolved disputes to those that remain unresolved. Islands continue to haunt this process, and the way in which they should affect maritime boundaries remains in dispute. The United States has a number of disputed boundaries with its neighbors to the north and south, and these are examined. Antarctica is a concern of all nations, and the regimes governing the Southern Ocean surrounding Antarctica are analyzed. The International Tribunal for the Law of the Sea was created to allow countries to resolve their disputes peacefully, and two chapters look at how this new court is operating. The impact of sea level rise on maritime boundaries is given special attention in the opening chapter. This volume presents a wonderful collection of provocative chapters written by the top scholars in the field of International Ocean Law. It should help scholars, students, and decision makers to understand the current state of this field and to move some of the difficult disputes toward resolution.
