Abstract: Digital transformation of education is the focus and hot spot of education reform at present, and digital transformation will bring radical changes to the field of education and teaching. Foreign language teaching, because of its special characteristics, can receive more attention and changes, and can produce a process from quantitative to qualitative changes. How to make a good digital transformation of foreign language teaching is very important to promote foreign language teaching methods, innovation and application as well as to explore new teaching modes under digital conditions. Through the introduction of the current background and the research of the current situation at home and abroad, this paper elaborates the significance of digital transformation of foreign language teaching, and introduces the teaching scenarios, teaching contents and teaching forms under digital transformation respectively, and finally summarizes the current opportunities and challenges.

1. Introduction

Informatization and digitization are constantly changing every aspect of people's lives. With the support of technologies such as Internet+, big data, cloud computing, artificial intelligence and blockchain, people's production, life and way of thinking have undergone significant changes, which also profoundly affect the development of the education system. In 2021, Facebook founder Zuckerberg said that the metaverse was the next frontier and officially announced the company's name change to Meta^[1]. Tech giant Microsoft also announced its full-scale entry into the metaverse, and the metaverse concept quickly swept the world. The year 2021 is also defined as the first year of the metaverse by the Internet, which has attracted great interest from governments, technology, finance, education and other fields. This also means that digital transformation has reached a whole new level, and a new digital era has opened up from now on.

Chinese Party Central Committee has made a series of important strategic plans around education modernization, digital China and digital transformation, and the 14th Five-Year Plan and the Long-Range Objectives Through the Year 2035 clearly put forward the following: to accelerate digital development, build a new advantage in digital economy^[2], collaborate To promote digitalization and industrial digital transformation, accelerate the pace of digital society construction, improve the level of digital government construction, create a good digital ecology, and build a digital China. In the future, China will promote the construction of a strong network, accelerate the construction of digital economy, digital society, digital

government, digital transformation of the overall drive production methods, and drive the overall economic development.

In December 2022, CPC Central Committee and State Council issued the Opinions on Building a Data Infrastructure System to Better Play the Role of Data Elements. The Opinions point out that the construction of the data foundation system is related to the overall situation of national development and security. In order to accelerate the construction of the data foundation system, give full play to the advantages of China's massive data scale and rich application scenarios, activate the potential of data elements, make stronger, better and bigger digital economy, enhance the new momentum of economic development, and build a new national competitive advantage, relevant opinions are put forward.

In the field of foreign language education, from education system, organization form, teaching mode and learning paradigm, all of them are facing the challenges of brand new development in the digital era, and it is urgent for universities to carry out digital reform and innovation. How to do the transformation from informatization to digitalization? What are the connotation and core of digital transformation in colleges and universities? The research on these questions will help to explore the essence of digital transformation of colleges and universities and correctly grasp the work focus and practice direction of digital transformation of colleges and universities in the future.
