## **The Imperfect Panacea American Faith In Education 1865 1965:**

*The Imperfect Panacea* Henry J. Perkinson, 1978      **The One Best System** David B. Tyack, 1974 *The One Best System* presents a major new interpretation of what actually happened in the development of one of America's most influential institutions. At the same time it is a narrative in which the participants themselves speak out: farm children and factory workers, frontier teachers and city superintendents, black parents and elite reformers. And it encompasses both the achievements and the failures of the system: the successful assimilation of immigrants, racism and class bias, the opportunities offered to some, the injustices perpetuated for others. David Tyack has placed his colorful, wide-ranging view of history within a broad new framework drawn from the most recent work in history, sociology and political science. He looks at the politics and inertia, the ideologies and power struggles that formed the basis of our present educational system. Using a variety of social perspectives and methods of analysis, Tyack illuminates for all readers the change from village to urban ways of thinking and acting over the course of more than one hundred years.

**Schooled to Order** David Nasaw, 1981 Argues that as public schools became integral to the maintenance of American lifestyles, they increasingly reflected the primary tensions between democratic rhetoric and the reality of a class-divided system.

**From Socrates to Summerhill and Beyond** Ronald Swartz, 2016-06-01 In *From Socrates to Summerhill and Beyond Towards a Philosophy of Education for Personal Responsibility* Ronald Swartz offers an evolving development of fallible liberal democratic self governing educational philosophies He suggests that educators can benefit from having dialogues about questions such as these

- 1 Are there some authorities that can be consistently relied upon to tell school members what they should do and learn while they are in school
- 2 How should the imagination of social theorists be both used and checked in the development and implementation of innovative educational reforms
- 3 How can teachers in personal responsibility schools help their students learn

These questions are representative of problems that Swartz raises in his book Swartz identifies four educational programs as personal responsibility schools These are Little Commonwealth Homer Lane Summerhill A S Neill Orphans Home Janusz Korczak and Sudbury Valley School Daniel Greenberg Swartz then suggests that these learning environments create social institutions that are liberal democratic and self governing and therefore endorse the policy of personal responsibility This policy states All school members students included are fallible authorities who should be personally responsible for determining their own school activities and many policies that govern a school Schools which incorporate this policy can interchangeably be referred to as personal responsibility self governing or Summerhill style schools In providing an historical and philosophical understanding of Summerhill style schools Swartz suggests that these educational alternatives have intellectual roots in the ideas associated with Socrates as portrayed in Plato's *Apology* Specifically in personal responsibility schools teachers are not viewed as authorities who attempt to transmit wisdom to their students Rather self governing schools follow the Socratic tradition which claims that teachers can be viewed as fallible authorities who attempt to engage students in dialogues about questions of interest to students The interpretation of Plato's works used by Swartz can be found in Karl Popper's *The Open Society and Its Enemies* Swartz has also been significantly influenced by the educational writings of Bertrand Russell and Paul Goodman Goodman's *Compulsory Miseducation* makes it clear that schools which follow in the tradition of Summerhill compete with the educational programs that are an outgrowth of John Dewey's writings In summary Swartz's book aims to engage educators in dialogues that will lead to improved educational theories and practices

University Adult Education in England and the USA Richard Taylor, Kathleen Rockhill, Roger Fieldhouse, 2018-11-13 Originally published in 1985 this book is a critique and comparison of the nature structure and provision of university adult education in England and the USA The focus is both contemporary twentieth century and historical and is interdisciplinary involving both social scientific and

historical modes of enquiry and analysis A central concern of the book is the liberal tradition as it has operated in its different ways and the erosion of this tradition and its consequences for the contemporary structure of university adult education form a large part of the book's discussion      Education & the Great Depression David Hicks, 2006 Education and the Great Depression Lessons from a Global History examines the history of schools in terms of pedagogies curricula policies and practices at the point of intersection with worldwide patterns of economic crisis political instability and social transformation Examining the Great Depression in the historical contexts of Egypt Turkey Germany Brazil and New Zealand and in the regional contexts of the United States including Virginia New York City Cleveland Chicago and South Carolina this collection broadens our understanding of the scope of this crisis while also locating more familiar American examples in a global framework      Tinkering toward Utopia David B. TYACK, Larry Cuban, David B Tyack, 2009-06-30 For over a century Americans have translated their cultural anxieties and hopes into dramatic demands for educational reform Although policy talk has sounded a millennial tone the actual reforms have been gradual and incremental Tinkering toward Utopia documents the dynamic tension between Americans' faith in education as a panacea and the moderate pace of change in educational practices In this book David Tyack and Larry Cuban explore some basic questions about the nature of educational reform Why have Americans come to believe that schooling has regressed Have educational reforms occurred in cycles and if so why Why has it been so difficult to change the basic institutional patterns of schooling What actually happened when reformers tried to reinvent schooling Tyack and Cuban argue that the ahistorical nature of most current reform proposals magnifies defects and understates the difficulty of changing the system Policy talk has alternated between lamentation and overconfidence The authors suggest that reformers today need to focus on ways to help teachers improve instruction from the inside out instead of decreeing change by remote control and that reformers must also keep in mind the democratic purposes that guide public education      *Just Schools* David L. Kirp, James D Marver Professor at the Goldman School of Public Policy David L Kirp, 1982-01-01 Examines the goals of equality in education reviews the experiences of five communities and recommends policy measures to improve educational opportunity in the United States      *The Great School Wars* Diane Ravitch, 2000-07-14 Named one of the Ten Best Books about New York City by the New York Times

**Americanizing the West** Frank Van Nuys, 2002 The arrival of immigrants on America's shores has always posed a singular problem once they are here how are these diverse peoples to be transformed into Americans The Americanization movement of the 1910s and 1920s addressed this challenge by seeking to train immigrants for citizenship representing a key element of the Progressives' search for order in a modernizing America Frank Van Nuys examines for the first time how this movement in an effort to help integrate an unruly West into the emerging national system was forced to reconcile the myth of rugged individualism with the demands of a planned society In an era convulsed by world war and socialist revolution the Americanization movement was especially concerned about the susceptibility of immigrants to un-American propaganda and

union agitation As Van Nuys convincingly demonstrates this applied as much to immigrants in the urbanizing and industrializing West as it did to those occupying the ethnic enclaves of cities in the East In Americanizing the West he tells how hundreds of bureaucrats educators employers and reformers participated in this movement by developing adult immigrant education programs and how these attempts contributed more toward bureaucratizing the West than it did to turning immigrants into productive citizens He deftly ties this history to broader national developments and shows how Westerners brought distinctive approaches to Americanization to accommodate and preserve their own sense of history and identity Van Nuys shows that although racism and social control agendas permeated Americanization efforts in the West Americanizers sustained their faith in education as a powerful force in transforming immigrants into productive citizens He also shows how some westerners especially in California believed they faced a racial frontier unlike other parts of the country in light of the influx of Hispanics and Asians so that westerners became major players in the crafting of not only American identity but also immigration policies The mystique of the white pioneer past still maintains a powerful hold on ideas of American identity and we still deal with many of these issues through laws and propositions targeting immigrants and alien workers Americanizing the West makes a clear case for regional distinctiveness in this citizenship program and puts current headlines in perspective by showing how it helped make the West what it is today

**Social Studies in Schools** David Warren Saxe, 1991-12-27 This supplemental text is an historical account of the beginning years of the social studies Using the 1916 Social Studies report as a base the book outlines the issues contexts and individuals that were influential in the genesis of the seminal social studies prototype program The author explains that many of our present interests such as critical thinking decision making inquiry reflective thinking foundational studies and cultural literacy can be found within the texts of the 1916 social studies program Saxe also shows that the roots of the social studies program are found in the social sciences and not the traditional history curriculum Included are chronological time lines that serve to illustrate the growth of the social studies as well as an extensive bibliography of the primary foundational works of the social studies including the 1916 report These materials greatly enhance the value of Saxe's work for social studies educators and students

**Experiences in a Promised Land** G. Thomas Edwards, Carlos A. Schwantes, 1986 Practically since the turn of the century the Northwest has been a region of paradoxes Women who in Washington had acquired suffrage and lost it in the 1880s regained it and later elected a woman mayor of Seattle Exploitation of workers despite or perhaps because of abundance has been extreme and has engendered some of America's most radical labor movements Both racial backlash and enlightened reforms characterize the region

**The Comparative Functionality of Formal and Non-formal Education for Women** Vivian Lowery Derryck, 1979

Free Schools, Free People Ron Miller, 2002-07-17 The first historical account of the free school movement of the 1960s

The Qualified Student Harold S. Wechsler, 2017-09-29 In The Qualified Student Harold S. Wechsler focuses on methods of student selection used by institutions of higher education in the United States More

specifically he discusses the way that college and university reformers employed those methods to introduce higher education into a broader cross section of America by extending access to an increased number of students from nontraditional backgrounds Implicit in much of this book is an underlying social and ethical question How legitimate was and is higher education s regulation of social mobility Public concern over colleges and universities practices became inevitable once they became regulators between social classes The challenging of colleges admissions policies in the courts augments similar concerns that have been present in legislatures for decades The volume is divided into three main sections Prerequisites Columbia and the Selective Function and Implications It focuses mainly on four universities The University of Michigan Columbia University the University of Chicago and the City University of New York Wechsler maintains that unlike other universities these institutions were pacesetters they did not adopt a new policy simply because some other college had already adopted it A new introduction brings the book originally published in 1977 up to date and demonstrates its continuing importance in today s academic world of selective admissions

Dismantling the Public Sphere John E. Buschman, 2003-08-30 This work presents a thorough examination of librarianship and the social and economic contexts in which the profession and its institutions operate As a basis of analysis Buschman employs critical education scholarship and the research of German philosopher Jurgen Habermas whose seminal work on the public sphere the arena in which the public organizes itself and formulates public opinion serves as a meta framework for Buschman s study of librarianship Buschman asserts that a significant shift has occurred from the library as a contributor to the public good to a model where economic rationality directs policy He challenges much of the current thinking and assumptions guiding libraries exploring the circumstances in which librarians and libraries operate and linking the profession back to democratic and public purposes as the core essence of the field Chapters include Crisis Culture and the Need for a Defense of Librarianship in the Public Sphere The New Public Philosophy and Critical Educational Analysis The Public Sphere Rounding Out the Context of Librarianship Studies in Librarianship and the Dismantling of the Public Sphere Follow the Money Library Funding and Information Capitalism Follow the Leader Library Management and the New Public Philosophy On Customer Driven Librarianship Drifting Toward the Corporate Model ALA Notes on Postmodern Technology Technocracy and Libraries The Public Sphere and Democratic Possibility Highly recommended for courses in policy and librarianship as well as for academic and public library directors this work will also be of interest to theorists in the social sciences

*Prejudice and the Old Politics* Allan J. Lichtman, 2000-01-01 Combining statistical analysis with well written narrative history this re evaluation of the 1928 presidential election gives a vivid portrait of the candidates and the campaign Lichtman has based his study primarily on a statistical analysis of data from that election and the presidential elections from 1916 to 1940 for all the 2 058 counties outside the former Confederate South Not relying exclusively on the results of his quantitative analysis however Lichtman has also made an exhaustive survey of previous scholarship and contemporary accounts of the 1928 election He

discusses and challenges previous interpretations especially the ethnocultural and pluralist interpretations and the application of critical election theory to the election In disputing this theory which claims that 1928 was a realigning election in which the coalitions were formed that dominated future elections Lichtman determines that 1928 was an aberration with little impact on later political patterns
