Lieberman,2011-12-08 This innovative textbook is the first to integrate learning and memory behaviour and cognition It focuses on fascinating human research in both memory and learning while also bringing in important animal studies and brings the reader up to date with the latest developments in the subject Students are encouraged to think critically key theories and issues are looked at in detail descriptions of experiments include why they were done and how examining the method can help evaluate competing viewpoints By looking at underlying cognitive processes students come away with a sense of learning and memory being interrelated actions taken by the same human being rather than two separate activities Lively and engaging writing is supported by lots of examples of practical applications that show the relevance of lab based research to everyday life Examples include treatments for phobias and autism ways to improve eyewitness testimony and methods of enhancing study techniques Sex, Sin and Science: What Evolution Says about Religion and Desire C. Roland Cook,2009-08 More than any other major religion ideology or philosophy Christianity associates sex and especially sexual desire with sin and evil People may be able to avoid earthly punishment for their sexual indiscretions but they can not escape God s judgment an afterlife of eternal pain and suffering in hell Religious sanctions of this sort are supposed to be in opposition to man s sinful nature restraining his dangerous sexuality However punishing others for sex is actually part of man s nature In nature sex is highly competitive Dominant males fight and threaten as they try to control sexual access to fertile females Human males behave similarly Rather than being in opposition to human nature religion actually reinforces man s animal instinct to control the

sexual behavior of others This explains why religion inspired sexual restrictions and punishments are so popular among men Of course religion claims that it s really all about morality Without strict religious control over sexual behavior human passions would lead to the destruction of society God has given us His law in order to protect us from ourselves Religion it is often said is what is good for society But if this is so why is it that those societies where religious belief is strongest and which have the harshest penalties for breaking the sexual code are also the societies that tend to be the least orderly and the most corrupt brutal and violent Religion is taken very seriously in many of the Islamic societies of the Middle East and the strictest sexual code is adhered to Yet these societies are characterized not by prosperity and social order but by poverty violence and oppression Meanwhile the most sexually liberal societies especially those of Western Europe are the freest and the most democratic prosperous and orderly If strict sexual morality is not really good for society why do religious conservatives everywhere continue to clamor for it And why do people so willingly accept religion that tells them their sexuality is sinful and shameful The truth is that most of the time people act on their own selfish feelings and desires not on what is good for society as a whole The desire to limit and control the sexual behavior of others is felt by women as well as men Powerful feelings such as sexual jealousy inspire aggressive behavior Strict anti sex religious morality allows people to act aggressively on these feelings in a sociably acceptable way Thus it s not really about doing what is good for society it s all about individual desires This is best explained from an evolutionary perspective which is exactly what this book does

Food Aversion Learning N.

Milgram,2013-11-11 During the past 10 years the study of learned aversions to foods has become one of the most popular areas of research in animal psychology Learned aversions to foods are typically produced in the laboratory by first allowing an animal to eat or drink some distinctively novel substance and then making the animal ill in some way most frequently by either giving it an injection of some illness producing drug such as lithium chloride or by exposing it to a toxic dose of radiation When an animal that has been treated in this way is subsequently given another opportunity to ingest the same or a similar substance one usually observes that it will either totally avoid ingesting the substance or that it will consume less of it than a control animal that was not made ill after previously consuming the same substance This form of learning has attracted the interest of many researchers because there are two apparently striking differences in the acquisition of food aversions and the acquisition of other types of associative learning

Hot Bud Jones, 2000 *Snake Rolling in Hot* is a historical novel about a squadron of Marine Corps helicopter pilots and their crews. It is a true accounting about flying and fighting in Vietnam as well as the training of aircrews before they were sent to Southeast Asia. The combat operations take place in I Corps in Vietnam and from the decks of navy carriers in the South China Sea. The story also takes a look at some of the wild R R escapades Marines experienced in Hong Kong, Bangkok, the Philippines, and other hot spots around the world. There is also a provocative look at the political scene in the U S during the war in Vietnam and how it affected several of the characters in the book in ways they never thought possible when the war began. With dialog that snaps with electricity and realism, *Snake Rolling in Hot* takes the reader into the cockpits of Marine choppers during action-packed missions flown against the Viet Cong and North Vietnamese Army. After reading this book, no one will ever feel the same about helicopters and their crews again.
