Snowy Mountains:

Mountains Rachel Dixon, 2018-03-01 Australia's mountains are not high by world standards but they have influenced the spread of human settlement and they affect the weather and the presence of water in the environment. From the ancient weathered ranges in the deserts to the Great Dividing Range and the extinct volcanoes, Australia's mountain landscapes are varied and beautiful. Many of the plants and animals are unique, such as the hibernating Mountain Pygmy Possum, whose habitat is under constant threat. Mountains are special places for the Australian Aboriginal people. Created by their ancestors and creation spirits, mountains have important connections with the Dreamtime stories that stretch back to the beginning of human civilisation in Australia. Equestrian Cultures Kristen Guest,Monica Mattfeld,2019-02-08 As much as dogs cats or any domestic animal horses exemplify the vast range of human animal interactions Horses have long been deployed to help with a variety of human activities from racing and riding to police work farming warfare and therapy and have figured heavily in the history of natural sciences social sciences and the humanities Most accounts of the equine human relationship however fail to address the last few centuries of Western history focusing instead on pre 1700 interactions Equestrian Cultures fills in the gap telling the story of how prominently horses continue to figure in our lives up to the present day Kristen Guest and Monica Mattfeld place the modern period front and center in this collection illuminating the largely untold story of how the horse has responded to the accelerated pace of modernity The book s contributors explore equine cultures across the globe drawing from numerous interdisciplinary sources to show how horses have unexpectedly influenced such distinctively modern fields as photography anthropology and feminist theory Equestrian Cultures boldly steps forward to redefine our view of the most recent developments in our long history of equine partnership and sets the course for future examinations of this still strong bond

Water Policy in Australia Lin Crase,2011 In the last twenty years policy makers in Australia have been forced to acknowledge that it is not possible to perpetually supply more water at a low cost Consequently the country has begun to focus on water resource management through legislative and institutional change attempting to allocate water in a more economically efficient and socially and environmentally acceptable manner This book

provides insight into the challenges of institutional change as well as valuable lessons on the design of property rights for complex resources Contributors from across disciplines address pertinent issues such as irrigation in the Murray Darling basin one of Australia's largest drainage divisions the progression from common law riparian rights to share based entitlements that encourage sustainable water use and the potential outcomes of the recent National Water Initiative a wide ranging strategy to improve water management and simultaneously maintain healthy groundwater and river systems U.S. Geological Survey Professional Paper ,1931 **Official Year Book of the Commonwealth of Australia No. 62 - 1977 and 1978** Australian Bureau of Statistics,1974 **The city trip guide for Canberra (Australia)** YouGuide Ltd,

Ludwik A. Teclaff,2012-12-06 Fresh water is one of man s most vital needs The distribution of water within river basins has a direct bearing on the organization of water resources development to meet this ever expanding need River basins despite their very great diversity in other respects have one physical characteristic in common each is a more or less self contained unit within whose bounds all the surface and part or all of the ground waters form an interconnected interdependent system This inter dependence has such far reaching implications for pollution and flood control apportionment of supply relations between upstream and downstream riparians to mention only a few examples that the river basin has become almost universally accepted within the past 20 or 30 years at least as the unit of optimal water resources development Professor Teclaff s work which was originally submitted to the New York University School of Law as a doctoral dissertation is the first fully developed response to the important resolution passed by the International Law Association at its New York meeting in 1958 recognizing the legal nature of the international river basin His study quite properly therefore poses the question whether the adoption of the river basin unit is a temporary phenomenon reflecting the current stage of technology and of administrative economic and legal thought on water resources development or whether the determinative influence of the river basin s physical unity which has always operated in the past will continue to operate in the future *Engineering*
