Child Mental Health Practice from the Ecological Perspective Richard L. Munger, 1991 The ecological perspective is a contextual approach which works at the interface between families and the broader ecology or ecosystem of the child the approach is not new but has not been widely adopted due to the lack of illustrative material available for practitioners Through an approach more descriptive and explanatory than empirical the author shows the clinician or other child care professional why the child's environment is crucial and provides techniques to draw people in the child's environment into the healing process

Advances in Clinical Child Psychology Thomas H. Ollendick, Ronald J. Prinz, 2013-06-29 This volume of *Advances in Clinical Child Psychology* which is the second under our editorship and the sixteenth of the series continues the tradition of including a broad range of timely topics on the study and treatment of children and adolescents Volume 16 includes contributions pertaining to prevention adolescents families cognitive processes and methodology The issue of prevention in child clinical psychology is no longer restricted to a few speculative sentences in the future directions part of a discussion section Prevention research is actually being

undertaken as reflected in two contributions to the volume Winett and Anderson provide a promising framework for the development evaluation and dissemination of programs aimed at the prevention of HIV among youth Lorion Myers Bartels and Dennis address some of the conceptual and methodological issues in preventive intervention research with children Adolescent development and adjustment is an important area of study in clinical child psychology Two contributors address key and somewhat related topics social competence and depression in adolescence Inderbitzen critically reviews the assessment methods and methodologies for social competence and peer relations in adolescence Reynolds analyzes contemporary issues and perspectives pertaining to adolescent depression

Teaching Psychological Skills Dale Larson, 1984

Advanced Abnormal Child Psychology Michel Hersen, Robert T. Ammerman, 2000-02

There was a time when abnormal child psychology was the stepchild of abnormal psychology with perhaps one or two chapters in an entire advanced textbook devoted to children Given the explosive amount of new research on child development in general since the 1980s stepchild is obviously no longer a valid characterization Indeed in the last 15 years many new journals devoted to childhood problems have made their appearance on library bookshelves The first edition of this book was assembled in an effort to integrate the empirical and clinical literatures and show the advanced undergraduate and beginning graduate student the breadth and depth of our existing knowledge about the disorders that manifest themselves early in development Now since its publication in 1995 a great deal more work has been done This revised and expanded second edition includes much new material from the first edition authors and from several new ones all respected experts in the field Part I offers an overview It outlines historical developments with documentation of the neglect and abuse that children suffered at the hands of society well into the 20th century developmental psychopathology as a theoretical framework to guide research and clinical efforts psychophysiological determinants of behavior with special attention focused on childhood autism and attention deficit and antisocial conduct disorders theoretical methodological and practical considerations involved in determining investigatory paths including sampling design selection measurement data analysis and pragmatics and the reactions of children families and society to complex and diverse child health problems Part II addresses assessment and treatment issues It discusses behavioral treatment of childhood disorders and multiple case examples of commonly used techniques new developments in pharmacological treatment and sound guidelines for the consideration of pharmacotherapy and formulations and a review of preventive interventions Part III examines specific disorders of childhood and adolescence It discusses anxiety disorders affective and mood disorders mental retardation autism specific developmental disorders conduct disorder attention deficit hyperactivity disorder ADHD and eating disorders psychological aspects of pediatric disorders interventions tailored to the needs of the child and family to maximize adaptation and recovery and substance use disorders ranging from models emphasizing social influences to those focusing on biological vulnerabilities Each chapter in Part III has an identical structure clinical description causes course familial contributions psychological and genetic influences current treatments
