Powell,Jon Hendricks,2009-06-10 In recent years major social forces such as ageing populations social trends migration patterns and the globalization of economies have reshaped social welfare policies and practices across the globe Multinational corporations

NGOs and other international organizations have begun to influence social policy at a national and local level. Among the many ramifications of these changes is that globalizing influences may hinder the ability of individual nation states to effect policies that are beneficial to them on a local level. With contributions from thirteen countries worldwide, this collected work represents the first major comparative analysis on the effect of globalization on the international welfare state. *The Welfare State in Post Industrial Society* is divided into two major sections: the first draws from a number of leading social welfare researchers from diverse countries who point to the nation state as case studies highlighting how it goes about establishing and revising social welfare provisions. The second portion of the volume then moves to a more global perspective in its analysis and questioning of the impact of globalization on citizenship, ageing, and marketization. *The Welfare State in Post Industrial Society* seeks to encourage debate about the implications of the most pressing social welfare issues in nation states and integrates analyses of policy and practice in particular countries struggling to provide social welfare support for their needy populations.

This has heightened scientific and political interest in the model and its key aspects, including the provision and production of care as public responsibility. In this engaging volume, contributors from various professional disciplines, including sociologists, anthropologists, political scientists, and educationalists, provide a comprehensive overview of the complex state of paid work in social care within the Nordic welfare states and of the dilemmas facing state-provided care in the region. They develop insights into the conditions, practices, and trends in the area of paid care in the social and health care sector, insights that expose the dilemmas and tensions associated with paid care and care education. Divided into four parts, the book will greatly interest academics, postgraduate students, and professionals concerned with the Nordic model and welfare states. It will also benefit those from outside the region interested in a specific Nordic tradition of research on publicly provided care and the current dilemmas and challenges facing training in care.
