overview of the contemporary debates surrounding social constructionist perspectives in psychology the contributors map important connections between theory method and politics in social research **Social Constructionism** Vivien Burr, 2024-11-15 The fourth edition of this seminal work introduces students to social constructionism Using a variety of examples from everyday experience and from existing research in areas such as personality sexuality and health it clearly explains the basic theoretical assumptions of social constructionism Drawing on a range of empirical studies the book clearly defines the various approaches to social constructionist theory and research and explores the theoretical and practical issues they raise It presents and analyses key debates such as the nature and status of knowledge truth reality and the self in an accessible style The new edition has been updated with relevant and contemporary references to aid understanding of key theoretical and methodological issues The author additionally utilises new illustrative examples from research and contemporary life such as the MeToo movement BlackLivesMatter and Post Truth politics The updated work has also been expanded to include an extended discussion of affect and embodiment and a number of exercises to help illustrate important concepts Social Constructionism extends and updates the material covered in previous editions and will be an invaluable and informative resource for undergraduate and postgraduate students of Psychology Sociology Education and other related disciplines **Unfolding Social Constructionism** Fiona J. Hibberd, 2006-11-24 For more than half of the 20 century

psychologists sought to locate the causes of behaviour in individuals and tended to neglect the possibility of locating the psychological in the social In the late 1960s a reaction to that neglect brought about a crisis in social psychology This crisis did not affect all social psychologists some remained seemingly oblivious to its presence others dismissed its significance and continued much as before But in certain quarters the psychological was re conceptualised as the social and the social was taken to be sui generis Moreover the possibility of developing general laws and theories to describe and explain social interaction was rejected on the grounds that as social beings our actions vary from occasion to occasion and are for many reasons unrepeatable There is so it was thought an inherent instability in the phenomena of interest The nomothetic ideal

was said to rest on individualistic cause effect positivism of the kind which arguably characterised the natural sciences but social psychology so it was said is an historical inquiry and its conclusions are necessarily historically relative Gergen 1973 Events outside psychology converged to give impetus to the crisis within **What Is a Person?** Christian Smith,2010-09-15 What is a person This fundamental question is a perennial concern of philosophers and theologians But Christian Smith here argues it also lies at the center of the social scientist s quest to interpret and explain social life In this ambitious book Smith presents a new model for social theory that does justice to the best of our humanistic visions of people life and society Finding much current thinking on personhood to be confusing or misleading Smith finds inspiration in critical realism and personalism Drawing on these ideas he constructs a theory of personhood that forges a middle path between the extremes of positivist science and relativism Smith then builds on the work of Pierre Bourdieu Anthony Giddens and William Sewell to demonstrate the importance of personhood to our understanding of social structures From there he broadens his scope to consider how we can know what is good in personal and social life and what sociology can tell us about human rights and dignity Innovative critical and constructive What Is a Person offers an inspiring vision of a social science committed to pursuing causal explanations interpretive understanding and general knowledge in the service of truth and the moral good

**Narrative Psychology and Vygotsky in Dialogue** Jill Bradbury,2019-09-06 This book draws together two domains of psychological theory Vygotsky s cultural historical theory of cognition and narrative theories of identity to offer a way of rethinking the human subject as embodied relational and temporal A dialogue between these two ostensibly disparate and contested

theoretical trajectories provides a new vantage point from which to explore questions of personal and political change In a world of deepening inequalities and increasing economic precarity the demand for free decolonised quality education as articulated by the South African Student Movement and in many other contexts around the world is disrupting established institutional practices and reinvigorating possibilities for change This context provokes new lines of hopeful thought and critical reflection on discontinuities across historical time theories of social and psychological developmental processes and the practices of intergenerational life particularly in the domain of education for the making of emancipatory futures This is essential reading for academics and students interested in Vygotskian and narrative theory and critical psychology as well as those interested in the politics and praxis of higher education

**Rethinking Basic Writing** Laura Gray-Rosendale, 1999-12

This book surveys the history of basic writing scholarship suggesting that we cannot adequately theorize the situations of basic writers unless we examine how they construct their own conceptions of their identities their constructions of their relationships to social forces and their representations of their relationships to written work Using a cross disciplinary analytic model Gray Rosendale offers a detailed examination of the oral conversations that take place within one basic writing peer revision group She explains the ways in which the students own conversational structures impact and shape their written products Gray Rosendale then draws out the potentials of her work for basic writing administrators curricula builders and teachers
