Social Approaches To Communication:

Social Approaches to Communication Wendy Leeds-Hurwitz, 1995-07-28 Long before there were formal organizations or mass media there was face to face interaction the practice which comprises very core of the study of communication Until recently however research in the field of interpersonal communication has been dominated by a behavioral science approach closely aligned with experimental social psychology This timely and provocative volume critiques the limitations of past models exploring a range of social approaches which help bring communication up to date Social approaches writes Leeds Hurwitz question whether the traditional theoretical assumptions and research methods followed in the field are still valid and appropriate While the roots of these approaches are diverse and interdisciplinary they overlap in their concern for the social construction of self other and event and in their acknowledgment of the researcher s role in establishing not only the research questions but also the research context Social approaches stress the necessity of recognizing the impact of cultural differences on communication research and identify the ways in which research inquiry creates meanings at the same time as it investigates them Most importantly they focus on instances of contact between individuals the actual social transactions in which people engage Together they demonstrate the ability to disregard labels in pursuit of a common goal the construction of a more adequate understanding of human interaction Robert T Craig s Foreword describes the historical tension in interpersonal communication between behavioral science approaches on the one hand and interpretive social approaches on the other Parts I and II of the volume highlight the theoretical underpinnings of social approaches and the philosophical grounding of some of the more central ideas Part III elaborates on the assumptions shared by social approaches focusing on a series of key concepts including the dichotomy between qualitative and quantitative research reflexivity social constructionism and the individual Part IV begins the task of applying social approaches to particular research topics including the use of case studies rapport in research interviews ethnography as theory continuity in relationships and the co construction of personal narratives Part V examines where the various chapters lead us making a strong case for practical theory as the necessary next step A unique overview of current theoretical innovations in the study of interpersonal communication SOCIAL APPROACHES TO COMMUNICATION belongs on the shelf of every professional and student in communication It will be especially valuable to those interested in communication theory interpersonal communication and social interaction

Social Approaches to Communication Wendy Leeds-Hurwitz, 1995-07-28 Long before there were formal organizations or mass media there was face to face interaction the practice which comprises very core of the study of communication Until recently however research in the field of interpersonal communication has been dominated by a behavioral science approach closely aligned with experimental social psychology This timely and provocative volume critiques the limitations of past models exploring a range of social approaches which help bring communication up to date Social approaches writes Leeds Hurwitz question whether the traditional theoretical assumptions and research methods

followed in the field are still valid and appropriate. While the roots of these approaches are diverse and interdisciplinary, they overlap in their concern for the social construction of self, other, and event, and in their acknowledgment of the researcher's role in establishing not only the research questions but also the research context. Social approaches stress the necessity of recognizing the impact of cultural differences on communication research and identify the ways in which research inquiry creates meanings at the same time as it investigates them. Most importantly, they focus on instances of contact between individuals, the actual social transactions in which people engage. Together, they demonstrate the ability to disregard labels in pursuit of a common goal: the construction of a more adequate understanding of human interaction. Robert T. Craig's Foreword describes the historical tension in interpersonal communication between behavioral science approaches on the one hand and interpretive social approaches on the other. Parts I and II of the volume highlight the theoretical underpinnings of social approaches and the philosophical grounding of some of the more central ideas. Part III elaborates on the assumptions shared by social approaches, focusing on a series of key concepts including the dichotomy between qualitative and quantitative research, reflexivity, social constructionism, and the individual. Part IV begins the task of applying social approaches to particular research topics, including the use of case studies, rapport in research interviews, ethnography as theory, continuity in relationships, and the co-construction of personal narratives. Part V examines where the various chapters lead us, making a strong case for practical theory as the necessary next step. A unique overview of current theoretical innovations in the study of interpersonal communication, *SOCIAL APPROACHES TO COMMUNICATION* belongs on the shelf of every professional and student in communication. It will be especially valuable to those interested in communication theory, interpersonal communication, and social interaction. **Communicating Social Change** Mohan J. Dutta, 2011-05-10

Communicating Social Change describes the social challenges that exist in current globalization politics and examines the communicative processes, strategies, and tactics through which social change interventions are constituted in response to the challenges. **Reconstructing Communicating** Robyn Penman, 2000-07-01. In this innovative and potentially controversial book, Penman examines the future of communication as a discipline. She foresees a time in which communicating is conceived as a social construction process in the anticipation that this will allow a genuine practical response to contemporary social problems. The book sets out a map toward accomplishing that future, laying the foundations for a different way of conceiving of communication, enabling direct action rather than just theorizing about it. It begins with a history illustrating how the communication discipline has arrived to where it is today and then goes on to demonstrate Penman's conception of communication. *Reconstructing Communicating* is an exploration of what it means to inquire into communicating, to treat communicating as the essential problematic of concern, and to recognize that we construct our reality in our communicating. In undertaking this exploration, the author pursues a central theme of what constitutes good communicating and good communication research. Arguments throughout this book provide a radical departure from mainstream communication

studies and especially from the rationalist's quest for truth and scientific knowledge. A way of acting in good faith is offered both with the process of communicating and with the participants in it that generates practical understandings for constructing new futures. Designed for communication scholars and graduate students primarily in organizational communication, public relations, and communication theory, this book will also interest those in management and business as it deals with practical communication issues.
