The Community Of Self:

The Community of the Spirit C. Norman Kraus, 2008-03-01 A revised edition of this classic work by C Norman Kraus Key material from another influential book *The Authentic Witness* is incorporated and a new chapter is added Repeatedly Kraus stresses the key point the good news of the gospel is not that all will be well in the future The good news is that the Spirit of God is among us now He asks the church to become a dynamic God Movement by opening itself to this now present Spirit

A Community of One Martin A. Danahay, 1993-08-24 Complementing recent feminist studies of female self representation this book examines the dynamics of masculine self representation in nineteenth century British literature Arguing that the category autobiography was a product of nineteenth century individualism the author analyzes the dependence of the nineteenth century masculine subject on autonomy or self naming as the prerequisite for the composition of a life history The masculine autobiographer achieves this autonomy by using a feminized other as a metaphorical mirror for the self The feminized other in these texts represents the social cost of masculine autobiography Authors from Wordsworth to Arnold including Samuel Taylor Coleridge Thomas De Quincey John Ruskin Alfred Tennyson Robert Louis Stevenson John Stuart Mill and Edmund Gosse use female lovers and family members as symbols for the community with which they feel they have lost contact In the theoretical introduction the author argues that these texts actually privilege the autonomous self over the images of community they ostensibly value creating in the process a self enclosed and self referential community of one

The Community of Advantage Robert Sugden, 2018-06-18 The Community of

Advantage asks how economists should do normative analysis Normative analysis in economics has usually aimed at satisfying individuals preferences Its conclusions have supported a long standing liberal tradition of economics that values economic freedom and views markets favourably However behavioural research shows that individuals preferences as revealed in choices are often unstable and vary according to contextual factors that seem irrelevant for welfare Robert Sugden proposes a reformulation of normative economics that is compatible with what is now known about the psychology of choice The growing consensus in favour of paternalism and nudging is based on a very different way of reconciling normative economics with behavioural findings This is to assume that people have well defined latent preferences which because of psychologically induced errors are not always revealed in actual choices The economist s job is then to reconstruct latent preferences and to design policies to satisfy them Challenging this consensus The Community of Advantage argues that latent preference and error are psychologically ungrounded concepts and that economics needs to be more radical in giving up rationality assumptions Sugden advocates a kind of normative economics that does not use the concept of preference Its recommendations are addressed not to an imagined social planner but to citizens viewed as potential parties to mutually beneficial agreements Its normative criterion is the provision of opportunities for individuals to participate in voluntary transactions Using this approach Sugden reconstructs many of the normative conclusions of the liberal tradition He argues that a well functioning market economy is an institution that individuals have reason to value whether or not their preferences satisfy conventional axioms of rationality and that individuals motivations in such an economy can be cooperative rather than self interested

Professional Learning in a School-Based Community of Science Teachers Wayne Melville, 2010-01-01 The ubiquitous science department occupies an unusual position in most secondary schools Traditionally they have been part of the organisational structure of schools with administrative responsibilities over room allocations teaching assignments and the management of laboratory equipment These are important roles but they only tell half the story Science teachers are more than members of an organisational structure They are also members of a science education community which is shaped by their shared understanding of science The science department as community also possesses a pivotal if undervalued role in teacher professional learning This book conceptualises professional learning as the engagement of teachers in a virtues based personal reflection and or public discourse around the episteme techne and phronesis in the spaces in between the metaphors of understanding community meanings practice and identity As such it speaks to heads of science departments school administrators and those with an interest in leadership within schools
