The Contemporary Theory Of Metaphor A Perspective From Chinese Human Cognitive Processing Vol 1:

The Contemporary Theory of Metaphor Ning Yu,1998-01-01 This volume aims to contribute to the theory of metaphor from the viewpoint of Chinese in order to help place the theory into a wider cross linguistic and cross cultural perspective It focuses on metaphors of emotion the time as space metaphor and the Event Structure Metaphor **The "Other"**

Psychology of Julian Jaynes Brian J. McVeigh,2018-01-17 In his provocative but critically acclaimed theory about the origin of introspectable mentality Julian Jaynes argued that until the late second millennium people possessed a different psychology a two chambered bicameral neurocultural arrangement in which a commanding god guided admonished and ordered about a listening mortal via voices visions and visitations Out of the cauldron of civilizational collapse and chaos an adaptive self reflexive consciousness emerged better suited to the pressures of larger more complex sociopolitical systems Though often described as boldly iconoclastic and far ahead of it time Jaynes s thinking actually resonates with a second or other psychological tradition that explores the cultural historical evolution of psyche Brian J McVeigh a student of Jaynes points out the blind spots of mainstream establishment psychology by providing empirical support for Jaynes s ideas on sociohistorical shifts in cognition He argues that from around 3500 to 1000 BCE the archaeological and historical record reveals features of hallucinatory super religiosity in every known civilization As social pressures eroded the god centered authority of bicamerality an upgraded psychology of interiorized self awareness arose during the Late Bronze Age Collapse A key explanatory component of Jaynes s theorizing was how metaphors constructed a mental landscape populated with I s and me s that replaced a declining worldview dominated by gods ancestors and spirits McVeigh statistically substantiates how linguo conceptual changes reflected psychohistorical developments because supernatural entities functioned in place of our inner selves vocabularies for psychological terms were strikingly limited in ancient languages McVeigh also demonstrates the surprising ubiquity of hearing voices in modern times contending that hallucinations are bicameral vestiges and that mental imagery a controllable semi hallucinatory experience is the successor to the divine hallucinations that once held societies together This thought provoking work will appeal to anyone interested in the transformative power of metaphors the development of mental lexicons and the adaptive role of hallucinations **The Routledge Linguistics Encyclopedia**
