## **The Hundredfold Problem:**

**The Hundredfold Problem** John Grant, 2003-03-01 The story begins several million years ago when sentient machines from an alien civilization build a Dyson Sphere around the sun's Red Dwarf companion star which is why we've never seen it and seed the Sphere with Neanderthals. Or maybe it begins in the future after terrestrial humanity has discovered the Sphere now called the Big Dunkin Donut colonized it and enslaved the natives. Whatever the Donut is in peril. Atheist fundamentalist preachers Rev Rick The Man Hamfist and Rev Bo No Messin Fingers inspired by dastardly Dennis the Complete Bloody Sadist are waging an evangelical war there with the aim of destroying the local very real goddess Korax. Using a matter transmitter Earth sends holochips of two plucky adventurers to sort this out: heavy weapons toting xeno anthropologist and scantily clad babe Petula McTavish and by the rules supercop Dave Knuckle. But Knuckle's holochip is accidentally shattered on arrival into one hundred fragments which are reconstituted to form one hundred lethally diverse partial versions of the supercop McTavish. Now she has a one hundredfold problem to solve. Actually a hundred and one but that wouldn't have made as good a title. And that's before she falls in love. The Hundredfold Problem is that rarest of things: a gloriously funny romp populated by outrageous larger than life characters that's also an extremely imaginative challenging sf novel. [The Savage Amusement](#) David Bishop, 2015-08-12 It's election day in Mega City One and Judge Death is leading the polls. He's running for mayor on the All Life is a Crime ticket. But if the Psi Judges' predictions are right the Big Meg may soon be a crime free zone. Out on the streets the city's top lawman is doing his job. A robot torturing maniac has taken over Weather Control but Judge Dredd can handle it. Then he finds out a satellite housing development is heading straight to the ground and someone has let the supervillains out of iso block 666. Meanwhile a clone killing virus is spreading through the ranks of the Judges. Even for Mega City One it's shaping up to be a bad day. *Mathematical Problems in the Biological Sciences* Sol I. Rubinow, 1973-01-01 Represents a small and highly selective sample of the quantitative approach to biology. The author encourages the reader to disseminate further the cause of mathematics applied to the biological sciences. *The Sex Column and Other Misprints* David Langford, 2005-07-01 A collection of columns by the author some previously published in SFX magazine. **Guts** David Langford, John Grant, 2001-07-26 **The Dignity of Manual Labour** Zacharias Tanee Fomum, 2015-04-20 God has given talents to human beings so that they can use them in the service of God of others and of personal service. Everyone must discover their talent in order to use it to meet these needs. These talents are received either at birth or by asking them of God in order to accomplish his work. God will reward all those who have used their talents well because there is a danger of burying this talent or envying others and wanting to do like others. These talents will only be truly useful to God and his service for those who have said goodbye to sin to the self life and to the love of the world. To take advantage of all its potentials we need a radical consecration and total sanctification. Read this book you could discover your talent maximize it and put it at the service of God and his work. **The Church and Social Problems** Joseph Husslein, 1912
