Breaking the Ice in Antarctica Satya S. Sharma, 2001. This is an updated and enlarged edition of the earlier book *Citadel of Ice* by the same author. The book vividly describes India's epoch-making daring scientific adventure in the icy continent of Antarctica. It narrates the story of a group of 12 scientists and soldiers who helped to establish the first ever overwintering Indian base, Dakshin Gangotri, on a floating ice shelf in Antarctica. Beginning with a description of the voyage to Antarctica through the roaring forties, icebergs, pack ice, and fast sea ice, the book recounts the painstaking process of selecting a construction site for Dakshin Gangotri on a 400m thick continental ice shelf and the construction of the station right from its foundation to the commissioning of the life support systems. The book then describes the hair-raising incidents of the long Antarctic blizzards where the wind many a time touched over 250 km/h with snow flying all around which threatened the very existence of the base. It highlights the arduous struggles of psychological and biological adjustment with the mid-night sun and polar night with the temperature going down to as low as -60°C. The book also highlights
