The Illusion Of Borders

Matthew Longo

The Illusion Of Borders:

The Mind of Consciousness Ray Morose, 2011 The Mind of Consciousness The Mind of Consciousness is a book unfolding a new way with new process methods to evaluate your existence It is an experiential work written in textbook format that analytically delineates how and why consciousness and mind interface and function exposing the inter connective dependency of non biological consciousness and the biologically created mind Knowing how that interconnectivity interrelates provides avenues of exploration that reveal the fundamental nature of existence unveiling an innate purpose and direction embedded within consciousness This book works through all the major questions of existence using reproducible and experiential logic allowing everyone to experience the results of that exploration Throughout your life you have two realities at war with one another the primary I am reality formed from non biological consciousness and the secondary I am this or that reality formed by the biological mind You may not be aware of or even appreciate the internal conflict these two inter connective and inter dependent realities create However you experience the resultant turmoil and confusion their subliminal battles establish by not having an experiential appreciation of how those realities are formed function and potentially control your life The text delineates causation for those ongoing internal battles and outlines processes to help overcome the sense of frustration isolation and discord they generate This experiential method of examination creates empirical processes that afford you the opportunity to make an informed choice rather than a conditioned reaction providing a more secure productive directional and enjoyable life This book takes you into the core of your being turning it inside out exposing who and what you are by revealing a self created shadow world controlling your life without you being aware that control exists

The Borders of Inequality Íñigo Moré, 2011-05-15 Recently U S media policymakers and commentators of all stripes have been preoccupied with the nation s border with Mexico Airwaves websites and blogs are filled with concerns over border issues illegal immigrants drug wars narcotics trafficking and securing the border While this is a valid conversation it s rarely contrasted with the other U S border with Canada still the longest unguarded border on Earth In this fascinating book originally published in Spain to much acclaim researcher Igo Mor looks at the bigger picture With a professionally trained eye he examines the world s top twenty most unequal borders What he finds is that many of these border situations share similar characteristics There is always illegal immigration from the poor country to the wealthy one There is always trafficking in illegal substances And the unequal neighbors usually regard each other with suspicion or even open hostility After surveying the top twenty Mor explores in depth the cases of three borders between Germany and Poland Spain and Morocco and the United States and Mexico The core problem he concludes is not drugs or immigration or self protection Rather the problem is inequality itself Unequal borders result he writes from a skewed interaction among markets people and states Using these findings Mor builds a useful new framework for analyzing border dynamics from a quantitative view based on economic inequality The Borders of Inequality illustrates how longstanding multidirectional

misunderstandings can exacerbate cross border problems and consequent public opinion Perpetuating these misunderstandings can inflame and complicate the situation but purposeful efforts to reduce inequality can produce promising results *The Politics of Borders* Matthew Longo,2018 Borders are changing in response to terrorism and immigration This book shows why this matters especially for sovereignty individual liberty and citizenship *The Borders of Inequality* igo MorŽ Mart'nez,2011-05-15 Recently U S media policymakers and commentators of all stripes have been preoccupied with the nation s border with Mexico Airwaves websites and blogs are filled with concerns over border issues illegal immigrants drug wars narcotics trafficking and securing the border While this is a valid conversation it s rarely contrasted with the other U S border with Canada still the longest unguarded border on Earth In this fascinating book originally published in Spain to much acclaim researcher igo Mor looks at the bigger picture With a professionally trained eye he examines the world s top twenty most unequal borders What he finds is that many of these border situations share similar characteristics There is always illegal immigration from the poor country to the wealthy one There is always trafficking in illegal substances And the unequal neighbors usually regard each other with suspicion or even open hostility After surveying the top twenty Mor explores in depth the cases of three borders between Germany and Poland Spain and Morocco and the United States and Mexico The core problem he concludes is not drugs or immigration or self protection Rather the problem is inequality itself Unequal borders result he writes from a skewed interaction among markets people and states Using these findings Mor builds a useful new framework for analyzing border dynamics from a quantitative view based on economic inequality The Borders of Inequality illustrates how longstanding multidirectional misunderstandings can exacerbate cross border problems and consequent public opinion Perpetuating these misunderstandings can inflame and complicate the situation but purposeful efforts to reduce inequality can produce promising results

The Impossible Border Annemarie H. Sammartino,2014-03-17 Between 1914 and 1922 millions of Europeans left their homes as a result of war postwar settlements and revolution After 1918 the immense movement of people across Germany s eastern border posed a sharp challenge to the new Weimar Republic Ethnic Germans flooded over the border from the new Polish state Russian migr s poured into the German capital and East European Jews sought protection in Germany from the upheaval in their homelands Nor was the movement in one direction only German Freikorps sought to found a soldiers colony in Latvia and a group of German socialists planned to settle in a Soviet factory town In *The Impossible Border* Annemarie H Sammartino explores these waves of migration and their consequences for Germany Migration became a flashpoint for such controversies as the relative importance of ethnic and cultural belonging the interaction of nationalism and political ideologies and whether or not Germany could serve as a place of refuge for those seeking asylum Sammartino shows the significance of migration for understanding the difficulties confronting the Weimar Republic and the growing appeal of political extremism Sammartino demonstrates that the moderation of the state in confronting migration was not merely by default but also by design However

the ability of a republican nation state to control its borders became a barometer for its overall success or failure. Meanwhile, debates about migration were a forum for political extremists to develop increasingly radical understandings of the relationship between the state, its citizens, and its frontiers. The widespread conviction that the democratic republic could not control its impossible Eastern borders fostered the ideologies of those on the radical right who sought to resolve the issue by force and for all time.

Globalization and Borders L. Weber, S. Pickering, 2011-11-22. This book analyzes the political and material conditions driving contemporary border control policies and discusses the processes that mediate popular and official understandings of border-related fatalities.

Border Optics Camilla Fojas, 2021-06-08. Examines how the US-Mexico border is seen through visual codes of surveillance. When Donald Trump promised to build a wall on the US-Mexico border, both supporters and opponents visualized a snaking barrier of concrete cleaving through nearly two thousand miles of arid desert. Though only 4 percent of the US population lives in proximity to the border, imagining what the wall would look like came easily to most Americans in part because of how images of the border are reproduced and circulated for national audiences. *Border Optics* considers the US-Mexico border as one of the most visualized and imagined spaces in the US. As a place of continual crisis, permanent visibility, and territorial defense, the border is rendered as a layered visual space of policing, one that is seen from watchtowers, camera-mounted vehicles, helicopters, surveillance balloons, radar systems, unmanned aerial vehicles, and live-streaming websites. It is also a space that is visualized across various forms and genres of media, from maps to geographical surveys, military strategic plans, illustrations, photographs, postcards, novels, film, and television, which combine fascination with the region with the visual codes of surveillance and survey. *Border Optics* elaborates on the expanded vision of the border as a consequence of the interface of militarism, technology, and media. Camilla Fojas describes how the perception of the viewing public is controlled through a booming security industrial complex made up of entertainment media, local and federal police, prisons, and detention centers, the aerospace industry, and all manner of security technology industries. The first study to examine visual codes of surveillance within an analysis of the history and culture of the border region, *Border Optics* is an innovative and groundbreaking examination of security, cultures, race, gender, and colonialism.

CONTENTS Introduction First Chapter Terminology Second Chapter Is There a Right to Leave Third Chapter Is There a Right to Stay Conclusion **The Gender of Borders** Jane Freedman,Alice Latouche,Adelina Miranda,Nina Sahraoui,Glenda Santana de Andrade,Elsa Tyszler,2023-02-27 This book brings an intersectional perspective to border studies drawing on case studies from across the world to consider the ways in which notably gender and race dynamics change the ways in which people cross international borders and how diffuse and virtual borders impact on migrants experiences By bringing together 11 ethnographies the book demonstrates the necessity for in depth empirical research to understand the class gender and race inequalities that shape contemporary borders In doing so the volume sheds light on how migration control produces gendered violence at physical borders but also through the politics of vulnerability across borders and social boundaries It places embodied narratives at the heart of the analysis which sheds light on the agency and the many patterns of resistance of migrants themselves As such it will appeal to scholars of migration and diaspora studies with interests in gender Open Borders Reece Jones,2019 Border control continues to be a highly contested and politically charged subject around the world This collection of essays challenges reactionary nationalism by making the positive case for the benefits of free movement for countries on both ends of the exchange Open Borders counters the knee jerk reaction to build walls and close borders by arguing that there is not a moral legal philosophical or economic case for limiting the movement of human beings at borders The volume brings together essays by theorists in anthropology geography international relations and other fields who argue for open borders with writings by activists who are working to make safe passage a reality on the ground It puts forward a clear concise and convincing case for a world without movement restrictions at borders The essays in the first part of the volume make a theoretical case for free movement by analyzing philosophical legal and moral arguments for opening borders In doing so they articulate a sustained critique of the dominant idea that states should favor the rights of their own citizens over the rights of all human beings The second part sketches out the current situation in the European Union in states that have erected border walls in states that have adopted a policy of inclusion such as Germany

and Uganda and elsewhere in the world to demonstrate the consequences of the current regime of movement restrictions at borders The third part creates a dialogue between theorists and activists examining the work of Calais Migrant Solidarity No Borders Morocco activists in sanctuary cities and others who contest border restrictions on the ground *Border Conditions* Kevin M. F. Platt, 2024-02-15 *Border Conditions* combines history and memory studies with literary and cultural studies to examine lives at the limits of contemporary Europe Russian speakers living in Latvia Since the fall of the USSR in 1991 Latvian Russian speakers have balanced between Russia and Europe as well as a socialist past a capitalist and liberal present and an illiberal regime rising in the Russian Federation Kevin M F Platt describes how members of this population have defined themselves through art literature cultural institutions film and music and how others have sought to define them At the end of the Cold War many anticipated that societies globally could agree on the meaning of past history and a just politics in the present The view from the borders of Europe demonstrates the contradictions pertaining to terms like empire state socialism liberalism and nation that have made it impossible to achieve a consensus In refocusing the examination of state socialism's aftermath around questions of empire and postcolonialism *Border Conditions* helps us understand the distinctions between Russian and Western worldviews driving military confrontation to this day **Migrants and Refugees at UK Borders**

Yasmin Ibrahim, 2022-02-27 This book investigates the hostile environment and politics of visceral and racial denigration which have characterised responses to refugees and migrants within the UK and Europe in recent years The European migrant crisis from 2015 onwards has been characterised by an extremely intimidating atmosphere which denies the basic humanity of refugees and migrants Deep rooted in Western Enlightenment trajectory this racially driven politics is linked to the Western theories of scientific superiority which went on to become the basis of eugenics and coloniality as part of modernity Focusing on the migrant crisis Brexit and the impacts of the global pandemic this book unpicks the waves of crises and neuroses about the Other in Europe and the UK The chapters analyse the rhetoric of camps refrigerated death lorries the notion of channel crossings and accidental drownings the formation of relationship with border architecture such as the razor wire and corporeal resistance in detention centres through hunger strike In examining such specific sites of rhetorical articulation policy formation social imagination and its incumbent visuality the chapters deconstruct the intersection of dominant ideologies power knowledge paradigms including the media as part of the public sphere and their combined re-mediation of the dispossessed humans in the shores and borders of Europe This important interdisciplinary volume will be of interest to researchers of migration humanitarianism geography global development sociology and communication studies

The Science of Illusions Jacques Ninio, 2001 A specialist in visual perception Ninio Centre National des Recherches Scientifiques Paris presents many classic and new illusions explains the underlying logic of the various types and suggests their value for neurological and physiological research He does not provide an index *La Science des Illusions* was published in 1998 by Editions Odile Jacob Philip has translated widely from the French including an autobiography of Francois Jacob c

Book News Inc **Gendering Border Studies** Jane Aaron, Henrice Altink, Chris Weedon, 2010-06-15 The study of borders has recently undergone significant transitions reflecting changes in the functions of boundaries themselves as the world political map has experienced transformations Gender defined as the knowledge about perceived distinctions between the sexes is an important signifier of borders as constructed and contested lines of differences In the interplay with other categories of difference like class race ethnicity and religion it plays a major role in giving meaning to different forms of borders It is not surprising then that an increasing number of studies in the last years have aimed for a gendering of border studies This book explores this new interdisciplinary field and develops it further The main questions it asks are How do we define borders frontiers and boundaries in different disciplinary approaches of gendered border studies What were and are the main fields of gendered border studies in different fields What might be important questions for future research And how useful is an inter or transdisciplinary approach for gendered border studies Sixteen established scholars from various disciplines contribute chapters in which they set out how the issue of gender and borders has been approached in their discipline and describe what they expect from future research

The Material Ghost Gilberto Perez, 2000-12-26 Gilberto Perez draws on his lifelong love of the movies as well as his work as a film scholar to write a lively wide ranging penetrating study of films and filmmakers and the nature of the art form

The Biometric Border World Karen Fog Olwig, Kristina Grünenberg, Perle Møhl, Anja Simonsen, 2019-10-22 Since the 1990s biometric border control has attained key importance throughout Europe Employing digital images of for example fingerprints DNA bones faces or irises biometric technologies use bodies to identify categorize and regulate individuals cross border movements Based on innovative collaborative fieldwork this book examines how biometrics are developed put to use and negotiated in key European border sites It analyses the disparate ways in which the technologies are applied perceived and experienced by border control agents and others managing the cross border flow of people by scientists and developers engaged in making the technologies and by migrants and non government organizations attempting to manoeuvre in the complicated and often unpredictable systems of technological control Biometric technologies are promoted by national and supranational authorities and industry as scientifically exact and neutral methods of identification and verification and as an infallible solution to security threats The ethnographic case studies in this volume demonstrate however that the technologies are in fact characterized by considerable ambiguity and uncertainty and subject to substantial subjective interpretation translation and brokering with different implications for migrants border guards researchers and other actors engaged in the border world

Israel/Palestine Drew Paul, 2020-01-07 Since the early 1990s Israel has greatly expanded a system checkpoints walls and other barriers in the West Bank and Gaza that restrict Palestinian movement Israel Palestine examines how authors and filmmakers have grappled with the spread of these borders Focusing on the works of Elia Suleiman Raba i al Madhoun Ghassan Kanafani Sami Michael and Sayed Kashua it traces how political engagement in literature and film has shifted away

from previously common paradigms of resistance and coexistence and has become reorganised around these now ubiquitous physical barriers. Depictions of these borders interrogate the notion that such spaces are impenetrable and unbreakable. They imagine distinct forms of protest and redefine the relationship between cultural production and political engagement. A *Research Agenda for Border Studies* James W. Scott, 2020-12-25 This innovative Research Agenda uncovers links between different levels of border making processes or bordering from the political to the cognitive and connects everyday processes and experiences of border making to the wider social world. It addresses the question of how everyday bordering practices and discourses can be productively linked to different aspects of social relations.

Feminism on the Border Sonia Saldívar-Hull, 2000-05-09 Sonia Saldívar Hull's book proposes two moves that will no doubt leave a mark on Chicano and Latin American Studies as well as in cultural theory. The first consists in establishing alliances between Chicana and Latin American writers/activists like Gloria Anzaldúa and Cherrie Moraga on the one hand and Rigoberta Menchú and Domitilla Barrios de Chungara on the other. The second move consists in looking for theories where you can find them in the non places of theories such as prefaces, interviews and narratives. By underscoring the non places of theories, Sonia Saldívar Hull indirectly shows the geopolitical distribution of knowledge between the place of theory in white feminism and the theoretical non places of women of color and of third world women. Saldívar Hull has made a signal contribution to Chicano and Latin American Studies and cultural theory. Walter D Mignolo, author of *Local Histories, Global Designs: Coloniality, Subaltern Knowledges and Border Thinking*. This is a major critical claim for the sociohistorical contextualization of Chicanas who are subject to processes of colonization and our conditions of existence. Through a reading of Anzaldúa, Cisneros and Viramontes, Saldívar Hull asks us to consider how the subalternized text speaks, how and why it is muted. How do testimonio, autobiography and history give shape to the literary where embodied wholeness may be possible. It is a critical de-centering of American Studies and Mexican Studies as usual as she traces our crossed genealogies situated on the borders. Norma Alarcon, Professor of Ethnic Studies, University of California Berkeley.

Contributions to Mathematical Psychology, Psychometrics, and Methodology Gerhard H. Fischer, Donald Laming, 2012-12-06 *Contributions to Mathematical Psychology, Psychometrics and Methodology* presents the most esteemed research findings of the 22nd European Mathematical Psychology Group meeting in Vienna, Austria, September 1991. The selection of work appearing in this volume contains not only contributions to mathematical psychology in the narrow sense but also work in psychometrics and methodology with the common element of all contributions being their attempt to deal with scientific problems in psychology with rigorous mathematics reasoning. The book contains 28 chapters divided into five parts: Perception, Learning and Cognition, Choice and Reaction Time, Social Systems, Measurement and Psychometrics and Methodology. It is of interest to all mathematical psychologists, educational psychologists and graduate students in these areas.
