The Immortalist An Approach To The Engineering Of Mans Divinity:

The Immortalist Alan Harrington, 1973 *The Immortalization Commission* John Gray, 2025-06-25 A Globe and Mail Best Books of the Year 2011 Title At the heart of human experience lies an obsession with the nature of death Religion for most of history has provided an explanation for human life and a vision of what comes after it But in the late nineteenth and early twentieth centuries such beliefs came under relentless pressure as new ideas from psychiatry to evolution to communism seemed to suggest that our fate was now in our own hands humans could cease to be animals defeat death and become immortal In *The Immortalization Commission* the acclaimed political philosopher and critic John Gray takes a brilliant and frightening look at humankind's dangerous striving toward a scientific version of immortality Probing the parallel faiths of Bolshevik God builders who sought to reshape the planet and psychical researchers who believed they had evidence of a nonreligious form of life after death Gray raises fascinating questions about how such beliefs threaten the very nature of what it means to be human He looks to philosophers journalists politicians charlatans and mass murderers who all felt driven by a specifically scientific and modern worldview and whose revolt against death resulted in a series of experiments that ravaged whole countries An urgent examination of Darwin's post religious legacy *The Immortalization Commission* is an important work from one of Britain's leading public intellectuals *The Wall Street Journal* *A Traveler's Guide to the Afterlife* Mark Mirabello, 2016-09-15 A grand survey of the world's death and afterlife traditions throughout history Examines beliefs from many different cultures on the soul heaven hell and reincarnation instructions for accessing the different worlds of the afterlife how one may become a god and how ethics and the afterlife may not be connected Explores techniques to communicate with the dead including's ance instructions Includes an extensive bibliography of more than 900 sources from around the world Drawing on death and afterlife traditions from cultures around the world Mark Mirabello explores the many forms of existence beyond death and each tradition's instructions to access the afterlife He examines beliefs on the soul heaven hell and reincarnation and wisdom from Books of the Dead such as the Book of Going Forth by Day from Egypt the Katha Upanishad from India the Bardo Thodol from Tibet the Golden Orphic Tablets from Greece Lieh Tzu from China and Heaven and its Wonders and Hell from Things Heard and Seen from 18th century Europe Considering the question What is Death Mirabello provides answers from a wide range of ancient and modern thinkers including scientist Nicholas Maxwell the seer Emanuel Swedenborg 1st century Buddhist philosopher Nagarjuna and Greek philosopher Euripides who opined that we may already be dead and only dreaming we are alive He explores the trek of the soul through life and death with firsthand accounts of the death journey and notes that what is perceived as death here may actually be life somewhere else He reveals how in many traditions ethics and the afterlife are not connected and how an afterlife is possible even without a god or a soul Sharing evidence that consciousness is not simply a product of the brain he offers a strong rebuttal to nihilists materialists and the Lokayata philosophical school of India who believe in the finality of death He explains how specters and

ghosts are produced and offers techniques to communicate with the dead as well as instructions for an out of body experience and the complete procedure for a séance With an extensive bibliography of more than 900 sources this guide offers comprehensive information on afterlife beliefs from the vast majority of cultures around the world and throughout history a veritable traveler's guide to the afterlife

Julian Huxley, Evolutionism and the History of Transhumanism
Ingrid Dunér, 2025-03-18 The evolutionary biologist Julian Huxley 1887-1975 attempted to promote a religion for the future which he would come to refer to as Transhumanism Transhumanism was an attempt to unite a more traditional humanistic view of the human as containing some form of core essence or potential with an evolutionary point of view of humans as a work in progress Before humans natural selection had been responsible for the transformation of life Through its ordering principles and through chance it had given rise to humankind which had ushered in a new phase of evolution Humanity stood on the threshold of yet another critical point in evolution The consciously purposive phase of evolution This open access book explores the history of transhumanism by analyzing how Julian Huxley's transhumanism develops and why it does at this particular point in time by placing it firmly within the context of his specific scientific and sociopolitical milieu starting roughly in the interwar years and stretching over the Second World War to the 1970s Continuing the study then focuses on the new transhumanists of the 1970s 1980s and 1990s and investigates continuity in mode of thinking contributing to a more coherent understanding of transhumanism its history and of modern projects of human enhancement The book captures how scientific and technological development in relation to society and social order shapes images and expectations of the future and of what future is desirable

A Tour of Bones
Denise Inge, 2014-11-06 A life enhancing exploration of how to live well in the face of mortality Author academic and adventurer Denise Inge grew up in a large and rambunctious family on the east coast of America She crossed the Sahara charmed snakes in Marrakech and cycled the Adirondack mountains but her latest adventure is an interior one It starts with the discovery that her house is built on a crypt full of human skeletons Facing her fear of these strangers bones takes her to other charnel houses in Europe and on a journey into the meaning of bones themselves This exploration though it began before her diagnosis with an inoperable sarcoma takes on a new significance when the question of living well in the face of mortality abruptly ceases to be hypothetical A Tour of Bones is a passionate testament to the conviction that living is more than not dying and that contemplating mortality is not about being prepared to die but about being prepared to live

Death, American Style Lawrence R. Samuel, 2013-07-05 The notion of one day disappearing from the earth forever is contrary to many of America's defining cultural values with death and dying viewed as un-American experiences Arguing that

death and dying may be our last major taboo this book shows how death and dying became almost unmentionable words over the course of the last century Although we have recently made some progress in reconciling the fact that life is a finite resource we remain very unprepared for the approaching tsunami of death as the largest generation in history begins to age and die in great numbers DEATH AMERICAN STYLE is thus highly timely and relevant suggesting that Americans need to individually and collectively come to terms with mortality if we are to learn to treat death as an inevitable part of life and to prepare accordingly As more and more Americans face end of life decisions it will be vital for us to radically change the current view of death and dying The alternative the author argues is that the emerging death centric society may bring with it a period of turmoil equivalent to that of the countercultural 1960s and 1970s **Can We Live Forever?** Bryan S. Turner,2009 Can We Live Forever addresses the modern debate about the Life Extension Project the by product of revolutionary developments actual and predicted in bio medicine transplantation cosmetic surgery genetic counselling stem cell research cryonics cloning and so forth which cumulatively promise to deliver eternal life or at least prolongevity

Better Humans? Michael Hauskeller,2014-09-11 Developments in medical science have afforded us the opportunity to improve and enhance the human species in ways unthinkable to previous generations Whether it s making changes to mitochondrial DNA in a human egg being prescribed Prozac or having a facelift our desire to live longer feel better and look good has presented philosophers medical practitioners and policy makers with considerable ethical challenges But what exactly constitutes human improvement What do we mean when we talk of making better humans In this book Michael Hauskeller explores these questions and the ideas of human good that underpin them Posing some challenging questions about the nature of human enhancement he interrogates the logic behind its processes and examines the justifications behind its criteria Questioning common assumptions about what constitutes human improvement Hauskeller asks whether the criteria proposed by its advocates are convincing The book draws on recent research as well as popular representations of human enhancement from advertising to the internet and provides a non technical and accessible survey of the issues for readers and students interested in the ethics and politics of human enhancement [Catalog of Copyright Entries. Shuchman,1968 **Earthly Immortalities** Peter Moore,2019-06-15 In this thought provoking book Peter Moore examines the often overlooked issues concerning human mortality the fragile ways in which the dead can be said to live on in earthly terms through their children their work the memories of others their possessions and even their bodies Such earthly immortalities raise a host of fascinating questions about our attitudes toward life and toward the world we leave behind us when we die To what extent does the meaning we find in our lives depend upon the assumption there will always be a new generation to continue the human adventure What would it be like if science were able to extend life indefinitely and is this

something already enshrined in the doctrine of reincarnation Can we solve our anxieties about mortality by learning that life is worth living precisely because we do not live forever In a generous and eloquent account these and more are the questions Earthly Immortalities seeks to answer

Why Jesus Returned Peter Walton,2020-07-21 For as Jonas was three days and three nights in the whale s belly so shall the Son of man be three days and three nights in the heart of the earth Matthew 12 40 The premise of this book is that during these three days Jesus was bombarded with images from Satan of future human events trying to convince him that he should not return to the Earth versus images from God s angels showing him future human events to convince him to return Here s a few examples of the over forty chapters of the book I Wear the Chain I Forged in Life Alone with the Sky Nature and God That Others May Live The Evolution Scam Broken Down Computers
