South Asia in the World: An Introduction Susan S Wadley,2014-12-18 This first book in the new Foundations in Global Studies series offers a fresh comprehensive multidisciplinary introduction to South Asia The variations in social cultural economic and political life in this diverse and complex region are explored within the context of the globalising forces affecting all regions of the world In a simple strategy that all books in the series employ the volume begins with foundational material including chapters on history language and in the case of South Asia religion moves to a discussion of globalisation and then focuses the investigation more specifically through the use of case studies The cases expose the student to various disciplinary lenses that are important in understanding the region and are meant to bring the region to life through subjects of high interest and significance to today's readers Resource boxes an important feature of the book are included to maintain currency and add utility They offer links that point readers to a rich archive of additional material connections to timely data reports on recent events official sites local and country based media visual material and so forth A website developed by Syracuse University's South Asia Center will feature additional graphic narrative and case study material to complement the book Routledge Handbook of the History of

Eaton,Munis D. Faruqui,David Gilmartin,Sunil Kumar,2013-03-07 The book encapsulates discussions under the rubric of frontiers in multiple contexts **A History of Christianity in Asia, Vol. I** Samuel Hugh Moffett,2014-07-30 The story of Christianity in the West has often been told but the history of Christianity in the East is not as well known The seed was the

same the good news of Jesus Christ for the whole world which Christians call the gospel But it was sown by different sowers it was planted in different soil it grew with a different flavor and it was gathered by different reapers It is too often forgotten that the faith moved east across Asia as early as it moved west into Europe Western church history tends to follow Paul to Philippi and to Rome and on across Europe to the conversion of Constantine and the barbarians With some outstanding exceptions only intermittently has the West looked beyond Constantinople as its center It was a Christianity that has for centuries remained unashamedly Asian A History of Christianity in Asia makes available immense amounts of research on religious pluralism of Asia and how Christianity spread long before the modern missionary movement went forth in the shelter of Western military might Invaluable for historians of Asia and scholars of mission it is stimulating for all readers interested in Christian history

The Archaeology of Seafaring in Ancient South Asia Himanshu Prabha Ray, 2003-08-14 Prior to European expansion communities of the Indian subcontinent had a strong maritime orientation In this new archaeological study Himanshu Prabha Ray explores seafaring activity religious travel and political economy in this ancient period By using archaeological data from the Red Sea to the Indonesian archipelago she reveals how the early history of peninsular South Asia is interconnected with that of its Asian and Mediterranean partners in the Indian Ocean Region The book departs from traditional studies focusing on the communities maritime history rather than agrarian expansion and the emergence of the state Rather than being a prime mover in social economic and religious change the state is viewed as just one participant in a complex interplay of social actors including merchants guilds boat builders sailors pilgrims religious clergy and craft producers A study that will be welcomed by students of Archaeology and Ancient History particularly those interested in South Asian Studies

An Agrarian History of South Asia David Ludden, 2011-02-17 Originally published in 1999 David Ludden's book offers a comprehensive historical framework for understanding the regional diversity of agrarian South Asia Adopting a long term view of history it treats South Asia not as a single civilization territory but rather as a patchwork of agrarian regions each with their own social cultural and political histories The discussion begins during the first millennium when farming communities displaced pastoral and tribal groups and goes on to consider the development of territoriality from the sixteenth to the nineteenth centuries Subsequent chapters consider the emergence of agrarian capitalism in village societies under the British and demonstrate how economic development in contemporary South Asia continues to reflect the influence of agrarian localism As a comparative synthesis of the literature on agrarian regimes in South Asia the book promises to be a valuable resource for students of agrarian and regional history as well as of comparative world history
