Progressive Learning Frameworks Payne, Carla R., 2009-05-31 This volume is grounded in the thesis that information technology may offer the only viable avenue to the implementation of constructivist and progressive educational principles in higher education and that the numerous efforts now under way to realize these principles deserve examination and evaluation Provided by publisher **English as a Medium of Instruction in South Asia** Ram Ashish Giri, Amol

Padwad, Mian Md. Naushaad Kabir, 2023-10-13 This book examines the English mania phenomenon and the complex circumstances of adopting English Medium Instruction EMI by South Asian education systems and the effect of an uneven distribution of resources on the already under resourced countries in the region Chapters explore linguistic social and economic injustices by using an analytic critical approach to examinations of the place role provisions and practices of EMI in specific English language teaching ELT contexts The book consequently advocates for the wholesale reform of a system which the authors argue is unjust Ultimately the book explores socio cultural poststructuralist and English linguistic

imperialism theories to contribute a South Asian perspective on the controversy surrounding EMI and examine its role within a wider global discourse on equity and social justice Critically examining the spread of English in South Asia this book will be of relevance to researchers scholars and postgraduate students in applied linguistics language education TESOL and sociolinguistics *Current Catalog* National Library of Medicine (U.S.),1983 First multi year cumulation covers six years 1965 70 **New International Encyclopedia. Keeves,Ryo Watanabe,2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region **Catalog of Copyright Entries.
