Accelerating Business and IT Change: Transforming Project Delivery Alan Fowler, 2017-11-28 Despite two decades of investment in project management as many as 80 per cent of business change and IT projects continue to rack up cost overruns and fail to deliver their expected benefits. Business people who must have more certainty in their project investments will find this book refreshing. It contains commonsense but groundbreaking techniques that deal with just this challenge. The authors far from rejecting current methods take an imaginative approach to encapsulating established best practices such as PRINCE2™ within a framework of new thinking, innovative techniques and hard nosed portfolio management. This book shows how project sponsors can radically improve the certainty of getting the benefits that they want and accelerate their projects to get them sooner rather than later or never. Finance and portfolio managers will find techniques that provide them with the means for drilling down and tracking not only the costs but also the cash values of project benefits both tangible and intangible. Business people and project managers will find ideas here that enable them to create and control change in communities of stakeholders which is the ultimate aim of the organizations that are investing time resources and money in projects of this kind. *Accelerating Business and IT Change* is essential reading for anyone seeking to define the nature and value of what they expect from their projects, set realistic implementation schedules and then ensure that all the intended benefits are realized. Important: The CD version of this product requires a Java Run Time environment. If you are planning to use the CD in your office please check with your IT Department to make sure you will be able to use it.

Corporate Risk Management Tony Merna, Faisal F. Al-Thani, 2005-07-15 Corporate Risk Management analyses, compares and contrasts tools and techniques used in risk management at corporate, strategic, business and project level and develops a risk management mechanism for the sequencing of risk assessment through corporate strategic and project stages of an investment in order to meet the requirements of the 1999 Turnbull report. By classifying and categorising risk within these levels readers will learn how to drill down and roll up to any level of the organisational structure, establish the risks that each project is most sensitive to and implement the appropriate risk response strategy to the benefit of all stakeholders.
