## **The Consciousness Of The Atom:**

*The Consciousness of the Atom* Alice A. Bailey, 2020-09-28 There has probably never been a period in the history of thought entirely resembling the present Thinkers everywhere are conscious of two things first that the region of mystery has never before been so clearly defined and secondly that that region can be entered more easily than has hitherto been the case it may therefore perhaps be induced to render up some of its secrets if investigators of all schools pursue their search with determination The problems with which we are faced as we study the known facts of life and existence are susceptible of clearer definition than heretofore and though we do not know the answer to our questions though we have not as yet discovered the solution to our problems though no panacea lies ready to our hand whereby we can remedy the world's ills yet the very fact that we can define them that we can point in the direction in which mystery lies and that the light of science of religion and of philosophy has been shed upon vast tracts which were earlier considered lands of darkness is a guarantee of success in the future We know so much more than was the case five hundred years ago except in a few circles of wise men and mystics we have discovered so many laws of nature even though as yet we cannot apply them and the knowledge of things as they are and I choose these words very deliberately has made immense strides Nevertheless the mystery land still remains to be opened up and our problems are still numerous There is the problem of our own particular life whatever that may be there is the problem of that which is largely termed the Not Self and which concerns our physical body our environment our circumstances and our life conditions if we are of an introspective turn of mind there is the problem of our particular set of emotions and of the thoughts desires and instincts by which we control action Group problems are many why should there be suffering starvation and pain Why should the world as a whole be in the thrall of the direst poverty of sickness of discomfort What is the purpose underlying all that we see around us and what will be the outcome of world affairs viewing them as a whole What is the destiny of the human race what is its origin and what is the key to its present condition Is there more than this one life and is the sole interest to be found in that which is apparent and material Such queries pass through all our minds at various times and have passed through the minds of thinkers right down through the centuries There have been many attempts to reply to these questions and as we study them we find that the answers given fall into three main groups and that three principal solutions are held out for the consideration of men These three solutions are First Realism Another name for this school is that of Materialism It teaches that the presentation which we have in consciousness of an external world is true that things are what they seem that matter and force as we know them are the only reality and that it is not possible for man to get beyond the tangible He should be satisfied with facts as he knows them or as science tells him they are This is a perfectly legitimate method of solution but for some of us it fails in that it does not go far enough In refusing to concern itself with anything except that which can be proven and demonstrated it stops short at the very point where the enquirer says that is so but why It leaves out of its calculation much that is known and realised as truth by the

average man even though he may be unable to explain why he knows it to be true Men everywhere are recognising the accuracy of the facts of the realistic school and of material science yet at the same time they feel innately that there is underlying the proven objective manifestation some vitalising force and some coherent purpose which cannot be accounted for in terms of matter alone      The Consciousness of the Atom Alice Bailey,2020-03-30 The Consciousness of the Atom is a series of lectures of Alice Bailey which guides the reader through her Theosophist theory Theory is based on contemporary scientific discoveries regarding the atom philosophy and both Eastern and Western religions applying what is known about the atom to the cosmos the solar system and to humankind In Bailey s teaching God is not definitely defined as existing in the biblical sense but as a force of energy      **The Consciousness of the Atom** Alice Bailey,2012-04-01 2012 Reprint of 1950 Edition Exact facsimile of the original edition not reproduced with Optical Recognition Software The seven lectures presented here were delivered in New York for the purpose of presenting the testimony of science as to the relation of matter and of consciousness to enable the hearers to observe the identical manifestation of these relations and of certain basic laws in successively higher states of being and thus to bring to them a realization of the universality of the evolutionary process and its actuality and to deal somewhat with the nature of the expanded states of consciousness and the enlarged life toward which all mankind is traveling They thus were intended to serve as an introduction to the more detailed study and application of the laws of life and human enfoldment generally included in the term of occultism Chapters The Field of Evolution The Evolution of Substance The Evolution of Form or Group Evolution The Evolution of Man the Thinker The Evolution of Consciousness The Goal of Evolution Cosmic Evolution      **“The” Consciousness of the Atom** Alice Ann Bailey,1927

*The Consciousness of the Atom. A Series of Lectures ...* Alice Ann Bailey,1934      **The Consciousness of the Atom** Alice Bailey,1922      The Consciousness of the Atom, Alice A. Bailey Alice A. Bailey,2018-11-25 The lectures here presented were delivered in New York during the past winter The purpose of this series was to present to their auditors the testimony of science as to the relation of matter and of consciousness to enable the hearers to observe the identical manifestation of these relations and of certain basic laws in successively higher states of being and thus to bring to them a realization of the universality of the evolutionary process and its actuality and to deal somewhat with the nature of the expanded states of consciousness and the enlarged life toward which all mankind is traveling They thus were intended to serve as an introduction to the more detailed study and application of the laws of life and human enfoldment generally included in the term of occultism It will be observed that there is in this series a considerable amount of repetition as each lecture briefly reviews the matters covered in the preceding addresses As newcomers were present at each lecture in the series it was found necessary on each occasion to present a bird s eye view of the ground covered and the reasons for the position then taken A further advantage was found in the fixing in the minds of the hearers of certain of these basic concepts which were new to many of them and which helped to enable them to grasp and to receive readily the further expansion of the theme In

presenting the lectures in book form it has been deemed advisable to retain the complete text of the lectures as given Those who are already students of the esoteric wisdom will be able to follow the line of the argument of the lectures without difficulty For those however who for the first time approach the consideration of the matters here discussed the occasional repetition of the fundamental points may help to a ready apprehension and it is for this class of readers that the book is primarily intended ALICE A BAILEY      **The Consciousness of the Atom (Classic Reprint)** Alice A. Bailey, 2017-10-13

Excerpt from The Consciousness of the Atom There has probably never been a period in the history of thought entirely resembling the present Thinkers everywhere are conscious of two things first that the region of mystery has never before been so clearly defined and secondly that that region can be entered more easily than has hitherto been the case it may therefore perhaps be induced to render up some of its secrets if investigators of all schools pursue their search with determination The problems with which we are faced as we study the known facts of life and existence are susceptible of clearer definition than heretofore and though we do not know the answer to our questions though we have not as yet discovered the solution to our problems though no panacea lies ready to our hand whereby we can remedy the world's ills yet the very fact that we can define them that we can point in the direction in which mystery lies and that the light of science of religion and of philosophy has been shed upon vast tracts which were earlier considered lands of darkness is a guarantee of success in the future We know so much more than was the case five hundred years ago except in a few circles of wise men and mystics we have discovered so many laws of nature even though as yet we cannot apply them and the knowledge of things as they are and I choose these words very deliberately has made immense strides Nevertheless the mystery land still remains to be opened up and our problems are still numerous There is the problem of our own particular life whatever that may be there is the problem of that which is largely termed the not self and which concerns our physical body our environment our circumstances and our life conditions if we are of an introspective turn of mind there is the problem of our particular set of emotions and of the thoughts desires and instincts by which we control action Group problems are many why should there be suffering starvation and pain Why should the world as a whole be in the thrall of the direst poverty of sickness of discomfort What is the purpose underlying all that we see around us and what will be the outcome of world affairs viewing them as a whole What is the destiny of the human race what is its origin and what is the key to its present condition Is there more than this one life and is the sole interest to be found in that which is apparent and material Such queries pass through all our minds at various times and have passed through the minds of thinkers right down through the centuries About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do

however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      **The Consciousness of the Atom** Alice A. Bailey, 2019-09-20 Alice A Bailey is one of the most noteworthy figures of early 20th century Theosophy Mostly known for her revealed works she also penned several books and compilations of lectures this being one of them namely on the subject of the atom its spiritual significance and attendant subjects Some of the claims it makes are actually accepted today such as the energetic form of the atom in the basic sense while some of its material the human as a central radiation point is largely considered to be pseudoscientific A fascinating look at early 1920s scientific thought as well as religion      **CONSCIOUSNESS OF THE ATOM ALICE A. BAILEY, 2018**
