*The Case for Marriage* Linda Waite, Maggie Gallagher, 2002-03-05 A groundbreaking look at marriage one of the most basic and universal of all human institutions which reveals the emotional physical economic and sexual benefits that marriage brings to individuals and society as a whole *The Case for Marriage* is a critically important intervention in the national debate about the future of family Based on the authoritative research of family sociologist Linda J Waite journalist Maggie Gallagher and a number of other scholars this book's findings dramatically contradict the anti marriage myths that have become the common sense of most Americans Today a broad consensus holds that marriage is a bad deal for women that divorce is better for children when parents are unhappy and that marriage is essentially a private choice not a public institution Waite and Gallagher flatly contradict these assumptions arguing instead that by a broad range of indices marriage is actually better for you than being single or divorced physically materially and spiritually They contend that married people live longer have better health earn more money accumulate more wealth feel more fulfillment in their lives enjoy more satisfying sexual relationships and have happier and more successful children than those who remain single cohabit or get divorced *The Case for Marriage* combines clearheaded analysis penetrating cultural criticism and practical advice for strengthening the institution of marriage and provides clear essential guidelines for reestablishing marriage as the

foundation for a healthy and happy society A compelling defense of a sacred union The Case for Marriage is well written and well argued empirically rigorous and learned practical and commonsensical William J Bennett author of The Book of Virtues Makes the absolutely critical point that marriage has been misrepresented and misunderstood The Wall Street Journal www.broadwaybooks.com *Social Security Bulletin* ,1970 **Special Labor Force Reports** ,1960 The Husband Book Dean Merrill,1977 **Biology at Work** Kingsley R. Browne,2002-06-06 Does biology help explain why women on average earn less money than men Is there any evolutionary basis for the scarcity of female CEOs in Fortune 500 companies According to Kingsley Browne the answer may be yes Biology at Work brings an evolutionary perspective to bear on issues of women in the workplace the glass ceiling the gender gap in pay sexual harassment and occupational segregation While acknowledging the role of discrimination and sexist socialization Browne suggests that until we factor real biological differences between men and women into the equation the explanation remains incomplete Browne looks at behavioral differences between men and women as products of different evolutionary pressures facing them throughout human history Womens biological investment in their offspring has led them to be on average more nurturing and risk averse and to value relationships over competition Men have been biologically rewarded over human history for displays of strength and skill risk taking and status acquisition These behavioral differences have numerous workplace consequences Not surprisingly sex differences in the drive for status lead to sex differences in the achievement of status Browne argues that decision makers should recognize that policies based on the assumption of a single androgynous human nature are unlikely to be successful Simply removing barriers to inequality will not achieve equality as women and men typically value different things in the workplace and will make different workplace choices based on their different preferences Rather than simply putting forward the nature side of the debate Browne suggests that dichotomies such as nature nurture have impeded our understanding of the origins of human behavior Through evolutionary biology we can understand not only how natural selection has created predispositions toward certain types of behavior but also how the social environment interacts with these predispositions to produce observed behavioral patterns **Census of Population: 1960: Subject reports. pts** United States. Bureau of the Census,1963 *Census of Population, 1960* ,1964 **U.S. Census of Population, 1960** ,1963 U.S. Census of Population, 1960. Subject Reports United States. Bureau of the Census,1963 *Careers of Couples in Contemporary Society : From Male Breadwinner to Dual-Earner Families* Hans-Peter Blossfeld,Sonja Drobnic,2001-10-04 This is the first systematic international comparative study of the transformation of couples careers in modern societies The countries included are Germany the Netherlands the Flemish part of Belgium Italy Spain Great Britain the United States Sweden Denmark Poland Hungary and China Using longitudinal data this book explores what has and what has not changed for couples in various countries due to women s greater involvement in paid employment It provides evidence that despite substantial improvement in women s educational attainment and career opportunities in all the countries studied dimensions of role specialization in

dual earner couples have not undergone transformation to the same extent Gender role change within the family has generally been asymmetric so that housework and childcare primarily remain women's work There are however also significant institutional differences among modern societies which determine a country's timing speed and pattern of change from the traditional male breadwinner to the dual earner family model In particular the impact of males' resources on their female partners' employment careers is dependent on the welfare state regime In conservative and Mediterranean welfare state regimes women's paid employment is negatively correlated with the occupational position of their husbands In liberal welfare state regimes no impact of husbands' resources on their wives' labour force participation could be detected In the social democratic welfare state regime and generally in former socialist countries husbands' resources have a positive effect on their wives' employment so that occupational resources cumulate in dual earner families

**Bulletin ,1929 Women, Business and the Law** The World Bank,2013-11-07 Women perform 66% of the world's work produce 50% of the food but earn 10% of the income and own 1% of the property To shed light on why this grim statistic still holds true Women Business and the Law aims to examine legal differentiations on the basis of gender in 143 of the world's economies Women Business and the Law tracks governments' actions to expand economic opportunities for women across six key areas: accessing institutions, using property, getting a job, providing incentives to work, building credit, and going to court The report uncovers legal differentiations for women and married versus unmarried women such as being able to register a business, open a bank account, and work at night These issues are of fundamental importance When, because of tradition, social taboos, or simple prejudice, half of the world's population is prevented from making its contribution to the life of a nation, the economy will suffer The empirical evidence does suggest that slowly but surely governments are making progress in expanding opportunities for women It is our hope that data presented in Women Business and the Law will both facilitate research on linkages between legal differentiation and outcomes for women and promote better informed policy choices on what governments can do to expand opportunities for women
