**The Idea of a Modern University** University Centers for Rational Alternatives, 1974      **The Idea of a Modern University** Sidney Hook, Paul Kurtz, Miro Todorovich, 1974      **The Idea of a University** D. V. Kumar, 2021-07-22 This volume engages with the idea of a university the importance of intellectual inquiry and research and the articulation of diverse political views and dissent It discusses the prominent ideas and debates around universities and their nature and contributions within the historical and social context of India The chapters reflect on the importance of critical thinking and the rigorous research process the engagement of students with socio political discourse and academic freedom They also examine issues around the instrumentalisation of knowledge production commodification of education the clash between political forces and universities intellectual freedom in research and teaching inclusivity and accessibility of higher education as well as the autonomy and identity of universities With insightful contributions from prominent scholars and thinkers in India this volume will be of interest to academics and students of sociology political science education public policy and governance philosophy of education and South Asian studies It will also be useful for readers interested in the debates on universities and their relationship with politics and society      **The Idea of the University** Jaroslav Pelikan, 1992-01-01 The crisis in university education has been the subject of vigorous debate in recent years In this eloquent and deeply personal book a distinguished scholar reflects on the character and aims of the university assessing its guiding principles its practical functions and its role in society Jaroslav Pelikan provides a unique perspective on the university today by reexamining it in light of John Henry Cardinal Newman s 150 year old classic *The Idea of a University* and showing how Cardinal Newman s ideas both illuminate and differ from current problems facing higher education Pelikan begins by affirming the validity of Newman s first principle that knowledge must be an end in itself He goes on to make the case for the inseparability of research and teaching on both intellectual and practical grounds stressing the virtues free inquiry scholarly honesty civility in discourse toleration of diverse beliefs and values and trust in rationality and public verifiability that must be practiced and taught by the university He discusses the business of the university the advancement of knowledge through research the extension and interpretation of knowledge through undergraduate and graduate teaching the preservation of knowledge in libraries museums and galleries and the diffusion of knowledge through scholarly publishing And he argues that be performing these tasks by developing closer ties with other schools at all levels and by involving the community in lifelong education the university will make its greatest contribution to society      **The Idea of a Catholic University** Dennis O'Brien, 2002-04-15 George Bernard Shaw thought that a Catholic university was a contradiction in terms university represents intellectual freedom and Catholic represents dogmatic belief Scholars university administrators and even the Vatican have staked out positions debating Shaw s observation In this refreshing book George Dennis O'Brien argues that contradiction arises both from the secular university s limited concept of academic freedom and the church s defective notion

of dogma Truth is a central concept for both university and church and O'Brien's book is built on the idea that there are different areas of truth scientific artistic and religious each with its own proper warrant and method In this light he argues that one can reverse Shaw's comparison and uncover academic dogma and Christian freedom university infallibility and dogmatic fallibility Drawing on theology and the history of philosophy O'Brien shows how religious truth relates to the work of a Catholic university He then turns to the current controversies over Pope John Paul II's recent statement *Ex Corde Ecclesiae* which seeks to make Catholic universities conform to the church's official teaching office O'Brien rejects the conventional institutional juridical model used by the Vatican as improper both to faith and academic freedom He argues for a sacramental model one that respects the different kinds of truth thus preserving the integrity of both church and university while making their combination in a Catholic university not only possible but desirable O'Brien concludes with a practical consideration of how the ideal Catholic university might be expressed in the actual life of the contemporary curriculum and extracurriculum For anyone concerned about the place of religion in higher education *The Idea of a Catholic University* will be essential reading

*Beyond the Modern University* Marcus P. Ford, 2002-11-30 The modern university which has its origins in 18th and 19th century Germany is currently at war within itself It seeks to portray itself on the one hand as an engine of economic development and on the other hand as existing for the sake of disinterested scholarly reflection and as a repository for human culture The author outlines an entirely different conception of what the university must become if it is to be a force for good in the world The author contends that the modern university actively participates in the breakdown of human communities and the destruction of the natural world He identifies the university's commitments to academic disciplines philosophical materialism and economism the modern faith that infinite economic growth is both possible and desirable as the roots of its negative impact and calls for changes that would make the university a powerful agent for good in the world

*The Non-Modern Crisis of the Modern University* Willy Thayer, 2024-12-15 A landmark work of critical theory about the Western university from the Southern Cone Renowned Chilean philosopher Willy Thayer's *La crisis no moderna de la universidad moderna* first published in 1996 and in an updated edition in 2019 is a landmark work of critical theory from the Southern Cone Presented in English for the first time *The Non-Modern Crisis of the Modern University* rewrites the idea of the Western university while also diagnosing the ills of postdictatorship Chile through a philosophically informed dismantling of its neoliberal institutionalization of higher education Bret Lerault's translation advances the vital work of globalizing critical university studies by disseminating theory from the Global South If the university helped to construct Chile's neoliberal society Thayer's polemical deconstruction of both will help readers reconstruct the cultural politics of the era to better understand the global hegemony of neoliberalism today

**Scholarly Self-Fashioning and Community in the Early Modern University** Richard Kirwan, 2016-04-01 A greater fluidity in social relations and hierarchies was experienced across Europe in the early modern period a consequence of the major political and religious upheavals of the

sixteenth and seventeenth centuries At the same time the universities of Europe became increasingly orientated towards serving the territorial state guided by a humanistic approach to learning which stressed its social and political utility It was in these contexts that the notion of the scholar as a distinct social category gained a foothold and the status of the scholarly group as a social elite was firmly established University scholars demonstrated a great energy when characterizing themselves socially as learned men This book investigates the significance and implications of academic self fashioning throughout Europe in the early modern period It describes a general and growing deliberation in the fashioning of individual communal and categorical academic identity in this period It explores the reasons for this growing self consciousness among scholars and the effects of its expression social and political desired and real

**The Making of the Modern University** Julie A. Reuben, 1996-09-15 Based on extensive research at eight universities Harvard Yale Columbia Johns Hopkins Chicago Stanford Michigan and California at Berkeley Reuben examines the aims of university reformers in the context of nineteenth century ideas about truth She argues that these educators tried to apply new scientific standards to moral education but that their modernization efforts ultimately failed

**A History of the Humanities in the Modern University** Sverre Raffnsøe, 2024-03-27 This book challenges commonplace assertions that the humanities are presently undergoing a severe crisis as a result of a longstanding decline Rather than hearkening to the widespread reactive call for a last ditch defense of the humanities under attack from an ungracious world this book fundamentally reverses the perspective and makes a plea for a different affirmative approach It contends that the humanities have incessantly arrived at critical turning points since they were first constituted in a form that remains recognizable today and assumed a leading role in knowledge organization with the establishment of the modern university around 1800 Assuming a historical perspective the monograph takes the human sciences back to their rightful place in the family tree of sciences and gives due recognition to their continuously decisive role in the production of new knowledge and the creation of new fields of knowledge Situating the ongoing gemmation of the humanities in a broader context this monograph also offers an encompassing introduction to the over all development of knowledge in the last two hundred years

*The University in the Modern World* Lord Robbins, 1966-06-18

*The Laboratory Revolution and the Creation of the Modern University, 1830-1940* Klaas Berkel, Ernst Homburg, 2025-10-01 The modern research university originated in Europe in the second half of the nineteenth century largely due to the creation and expansion of the teaching and research laboratory The universities and the sciences underwent a laboratory revolution that fundamentally changed the nature of both This revolutionary development began in chemistry where Justus Liebig is credited with systematically employing his students in his ongoing research during the 1830s Later this development spread to other fields including the social sciences and the humanities The consequences for the universities were colossal The expansion of the laboratories demanded extensive new building programs reshaping the outlook of the university The social structure of the university also diversified because of this laboratory expansion while what it meant to be a scientist changed dramatically

This volume explores the spatial social and cultural dimensions of the rise of the modern research laboratory within universities and their consequent reshaping The Idea of a modern university Abraham Flexner,1930

Routledge is an imprint of Taylor Francis an informa company *Humboldt and the modern German university* Johan Östling,2018-04-03 This book is about the idea of the university in modern Germany Its primary focus is how the Humboldtian tradition was transformed and how it gave direction to debates around higher education By combining approaches from intellectual history conceptual history and the history of knowledge the study investigates the ways in which Humboldt s ideas have been appropriated for various purposes in different historical contexts and epochs Ultimately it shows that Humboldt s ideals are not timeless they are historical phenomena and have always been determined by the predicaments and issues of the day Nevertheless many of the key concepts and fundamental ideas have endured throughout the twentieth century though they have been interpreted in different ways The Learned Practice of Religion in the Modern University Donald Wiebe,2019-11-14 In these essays Donald Wiebe unveils a significant problem in the academic

study of religion in colleges and universities in North America and Europe that studies almost always exhibit a religious bias To explore this issue Wiebe looks at the religious and moral agendas behind the study of religion showing that the boundaries between the objective study of religion and religious education as a tool for bettering society have become blurred As a result he argues religious studies departments have fostered an environment where religion has become a learned or scholarly practice rather than the object of academic scrutiny This book provides a critical history of the failure of 20th and 21st century scholars to follow through on the 19th century ideal of an objective scientific study of religious thought and behaviour Although emancipated from direct ecclesiastical control and to some extent from sectarian theologizing Wiebe argues that research and scholarship in the academic department of religious studies has failed to break free from religious constraints He shows that an objective scientific study of religious thought and practice is not only possible but the only appropriate approach to the study of religious phenomena *The Global Virtual University* Lalita Rajasingham, John

Tiffin, 2003-12-16 This book is about the shift from the modern university of the nation state to the global virtual university of the future John Tiffin and Lalita Rajasingham launched the idea of virtual universities on the Internet with the publication of *In Search of the Virtual Class Education in an Information Society* in 1995 Since then virtual universities have multiplied worldwide However the authors argue that globalisation and the Internet are still in their infancy and universities have yet to face the challenges of global free trade in broadband telecommunications artificial intelligence and HyperReality Based on material gathered from research in the USA Japan Taiwan Brazil Malaysia Australia and New Zealand this book describes how a global university could function in the future and presents a paradigm from which it might be constructed This unique visionary text will be critical reading for academics postgraduate students and for anyone involved in policymaking and planning within the university community and administration *Leading the Modern University* Lorna R.

Marsden, 2016-10-27 Founded in 1959 York University is now the second largest university in Ontario and third largest university in Canada However starting in 1970s the success of the university was far from guaranteed *Leading the Modern University* documents the challenges and solutions that five successive university presidents H Ian Macdonald Harry Arthurs Susan Mann Lorna Marsden and Mamdouh Shoukri encountered from the very early 1970s up to 2014 This book is the rare occurrence where a series of university presidents describe and analyze the challenges they faced regarding financing morale crises and succession With each president contributing a chapter covering her or his own years in office *Leading the Modern University* reveals that large public institutions have internal dynamics and external forces that supersede any individual leader's years in office This is a case study for those interested in organizational change as seen by the leadership of a major public institution during a dynamic period in higher education *Edmund J. James and the Making of the Modern University of Illinois, 1904-1920* Winton U Solberg, J. David Hoeveler, 2024-11-12 In 1904 Edmund J James inherited the leadership of an educational institution in search of an identity His sixteen year tenure transformed the University of Illinois
