Cards of Identity Nigel Forbes Dennis, 2002 A Scathing Satire On Psychology Identity Theory And Class Prejudice *Cards of Identity* is a scathing satire of psychology identity theory and class prejudice The plot centers on an annual meeting of the Identity Club a group of psychologists who come together to present case histories promoting their chosen theory of identity These case studies three of which are presented in the novel are not scientific treatises but fictional representations of characters in line with the author's biases In fact members of the Club aren't allowed to interact with actual patients when creating their stories Surrounding this meeting is the equally bizarre story of the local townspeople who are brainwashed and transformed into servants for the convention and who end the book with a show stopping Shakespearian play

Sport, Media and Regional Identity Simon Roberts, 2015-11-25 The increasing potency of identity politics across Europe often sees sport acting as a vehicle for the promotion and celebration of regional and sub national identities However while the relationship between sport the media and national identity has featured in numerous academic and political debates in recent years the links between sports media and regional identity have received little attention This seems a curious oversight because the links between sport and region frequently become a celebration of the local and the distinctive emblematic of community and continuity This volume will explore that sense of the counter hegemonic where sport is celebrated by a media often keen to promote notions of difference which might verge on rebellion in some contexts conceived as resisting global homogeneity or national hegemony At other times they may merely reflect a commercial nose for the local audience s tastes but there is always the sense of preserving something important a celebration of the diversity that makes us human This book considers the centrality and cultural significance of particular sports or clubs to regional and sub national identities across Europe and beyond adopting a comparative approach to the mediatized nature of such portrayals

and Football Fan Culture Tom Gibbons, 2016-05-13 In recent years scholars have understood the increasing use of the St George s Cross by football fans to be evidence of a rise in a specifically English identity This has emerged as part of a wider national response to broader political processes such as devolution and European integration which have fragmented identities within the UK Using the controversial figurational sociological approach advocated by the twentieth century theorist Norbert Elias this book challenges such a view drawing on ethnographic research amongst fans to explore the precise nature of the relationship between contemporary English national identity and football fan culture Examining football fans expressions of Englishness in public houses and online spaces the author discusses the effects of globalization European integration and UK devolution on English society revealing that the use of the St George s Cross does not signal the emergence of a specifically English national consciousness but in fact masks a more complex multi layered process of
