Architecture in the Age of Pornography Nadir Lahiji, 2021-09-30 Architecture and its pedagogy in the academy is dominated by the technology of image production that veils the naked power behind its operation It conforms to the principles of cultural logic of the society of the spectacle consistent with neoliberal capitalism The problem with this dominant pedagogy is that it violates the fundamental ethical imperative putting architecture in direct contradiction with the common good In addition it has let architecture enter the brothel of pornographic capitalism which turns every object into an object of obscene gratification of the senses In this book Nadir Lahiji adopts Alain Badiou's thesis from *The Pornographic Age* to demonstrate that contemporary architecture is in absolute complicity with the pornographic present The traits that Badiou identifies in this age are manifestly visible in architectural surfaces which are subordinated to the same regime of images Similarly to Badiou's political indictments of the society which has given rise to the pornographic present the book condemns the architecture that has lent its service to the same society with a license to consummate its transgression to better cater to the imperative of the regime of images Transposing the conceptual categories in Badiou's analysis to the critique of architecture

s pornographic turn in contemporary society the book constructs a conceptual framework by which to demonstrate the specific manifestations of pornography in building The book is aimed at architecture students at higher graduate and post graduate levels

Climate Change in the Age of Artificial Intelligence Alexandru Balasescu, 2025-06-14 This book invites the reader to follow seemingly unrelated paths towards the same goal making sense of what it means to be human in a world that casually blends discourses on nature technology and biology with ideas of progress optimization and their capitalization at the centre The author critically analyses current thinking which often looks at technological solutions to the challenges posed by climate change and where artificial intelligence is instrumental in fulfilling the promise of ecological capitalism He instead advocates that we take a closer look at the politics of optimization within and outside managerial perspectives which could reveal that one of the main sources of our repeated failures related to governance and climate change lies not intrinsically in the qualities of the tools we use but in the underlying assumptions with which we design and in the scope of their use Therefore the book looks at possible solutions for humanity that may lie between the rock of technology and the hard place of nature That is it asks for a revision in our implicit assumptions for building our tools critiques the thinking about our relationships with them and re assesses their use Richly documented imaginatively argued and captivatingly written this book explores unexpected entanglements of nature culture and technology that emerge in A I s unruly and unforeseen trajectories George Paul Meiu Professor of Anthropology University of Basel Balasescu develops wide ranging thick descriptions that provocatively draw together lotus flowers and data banks snakes and algorithms to delve into how bodies cultures and power are invisibly ensconced in every aspect of the digital realm Susan Ossman Distinguished Professor of Anthropology University of California Riverside This important work traces the evolution and development of the
