featuring over 2500 I Ching related websites      **Glossalalia** Julian Wolfreys, 2003 Glossalalia is not a conventional glossary or dictionary. Although arranged alphabetically it is a cutting edge introduction to the state of theory today. Here 26 newly commissioned definitions of theoretical keywords are presented in a playful A-Z format ranging from Animality to Zero. Leading theorists and critics including J Hillis Miller, Gayatri Chakravorty Spivak, Simon Critchley, Ernesto Laclau and many others provide unusual and insightful interpretations of a range of unexpected terms such as Zero X and Yarn. They also reflect with renewed vigor upon such familiar concerns as Difference, Jouissance, Nation and Otherness. Like a standard glossary, the volume invites the reader to start almost anywhere. But Glossalalia steps far beyond the parameters of a standard reference work that is simply about theory by encouraging readers to actively engage with and enjoy theory and to consider the future possibilities of theory in the twenty-first century.

### **ALTERNATIVE FORMS OF KNOWING (IN)**

**MATHEMATICS** Swapna Mukhopadhyay, Wolff-Michael Roth, 2012-12-28 This book grew out of a public lecture series, Alternative forms of knowledge construction in mathematics, conceived and organized by the first editor and held annually at Portland State University from 2006. Starting from the position that mathematics is a human construction implying that it cannot be separated from its historical, cultural, social and political contexts, the purpose of these lectures was to provide a public intellectual space to interrogate conceptions of mathematics and mathematics education, particularly by looking at mathematical practices that are not considered relevant to mainstream mathematics education. One of the main thrusts was to contemplate the fundamental question of whose mathematics is to be valorized in a multicultural world, a world in which, as Paulo Freire said, 'The intellectual activity of those without power is always characterized as non-intellectual.' To date, nineteen scholars, including the second editor, have participated in the series. All of the lectures have been streamed for global dissemination at <http://www.media.pdx.edu/dlc/media/events/AFK>. Most of the speakers contributed a chapter to this book, based either on their original talk or on a related topic. The book is divided into four sections dealing with Mathematics and the politics of knowledge, Ethnomathematics, Learning to see mathematically, Mathematics education for social justice.
