Ponjaert,2022-10-31 There have been significant efforts to implement the Sustainable Development Goals SDGs at multiple levels of governance across all regions of the world However the manner in which the global governance norms underlying the SDGs are actually being diffused is under researched and not well understood This book considers the promotion of the SDGs through the lens of norm diffusion theory with a focus on three SDG policy areas health education and decent work A distinctive feature of the book is that it offers multiple original case studies of SDG norm diffusion involving Asian and European actors A unique feature is that the case studies in the book identify relevant SDG norm senders and norm receivers and examine the relationship between them The book also challenges the assumption that the SDGs themselves are static and unchanging and reveals how SDG norms are dynamic and can be reformulated as a result of contestation between norm senders and norm receivers As well as introducing a diverse and original set of case studies the book therefore allows readers to deepen their understandings of the policy diffusion mechanisms by which SDGs are diffused and grasp the patterns of success and failure in the implementation of these policies Chapters 4 5 and 7 of this book are available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4 0 licence **Myanmar Education System and Policy**
