**Volume I** Iain Dale, Jacqui Smith, 2018-09-04 FOREWORD BY PRIME MINISTER THERESA MAY When Constance Markievicz stood for election as MP for Dublin St Patrick's in 1918 few people believed she could win the seat yet she did A breakthrough in the bitter struggle for female enfranchisement had come earlier that year followed by a second landmark piece of legislation allowing women to be elected to Parliament and Markievicz duly became the first female MP A member of Sinn Féin she refused to take her seat She did however pave the way for future generations and only eleven months later Nancy Astor entered the Commons A century on from that historic event 491 women have now passed through the hallowed doors of Parliament Each one of these pioneers has fought tenaciously to introduce enduring reform and in doing so has helped revolutionise Britain's political landscape ensuring that women's contributions are not consigned to the history books Containing profiles of every woman MP from 1918 to 1996 and with female contributors from Mary Beard to Caroline Lucas Ruth Davidson to Yvette Cooper and Margaret Beckett to Ann Widdecombe The Honourable Ladies is an indispensable and illuminating testament to the stories and achievements of these remarkable women **The Ladies' Companion, and**

Schrover, 2005-08-05 From the traditional stereotyped viewpoint femininity and technology clash This negative association between women and technology is one of the features of the sex typing of jobs Men are seen as technically competent and

creative women are seen as incompetent suited only to work with machines that have been made and maintained by men Men identify themselves with technology and technology is identified with masculinity The relationship between technology technological change and women s work is however very complex Through studies examining technological change and the sexual division of labour this book traces the origins of the segregation between women s work and men s work and sheds light on the complicated relationship between work and technology Drawing on research from a number of European countries England Sweden Denmark and the Netherlands international contributors present detailed studies on women s work spanning two centuries The chapters deal with a variety of work environments office work textiles and pottery food production civil service and cotton and wool industries This work rejects the idea that women were mainly employed as unskilled labour in the industrial revolutions asserting that skill was required from the women but that both the historical record about women s work and the social construction of the concept of skill have denied this
