The Mind of Consciousness Ray Morose,2011 The Mind of Consciousness The Mind of Consciousness is a book unfolding a new way with new process methods to evaluate your existence It is an experiential work written in textbook format that analytically delineates how and why consciousness and mind interface and function exposing the inter connective dependency of non biological consciousness and the biologically created mind Knowing how that interconnectivity interrelates provides avenues of exploration that reveal the fundamental nature of existence unveiling an innate purpose and direction embedded within consciousness This book works through all the major questions of existence using reproducible and experiential logic allowing everyone to experience the results of that exploration Throughout your life you have two realities at war with one another the primary I am reality formed from non biological consciousness and the secondary I am this or that reality formed by the biological mind You may not be aware of or even appreciate the internal conflict these two inter connective and inter dependent realities create However you experience the resultant turmoil and confusion their subliminal battles establish by not having an experiential appreciation of how those realities are formed function and potentially control your life The text delineates causation for those ongoing internal battles and outlines processes to help overcome the sense of frustration isolation and discord they generate This experiential method of examination creates empirical processes that afford you the opportunity to make an informed choice rather than a conditioned reaction providing a more secure productive directional and enjoyable life This book takes you into the core of your being turning it inside out exposing who and what you are by revealing a self created shadow world controlling your life without you being aware that control exists
